**A HIGH CLASS ENTERTAINMENT**  
The Christian Messenger, of Chicago, has the following to say regarding the Chicago Grand Opera Quintet which will give an entertainment at the high school February 18.  
The Christian church was crowded Wednesday night when the Chicago Grand Opera Quintet gave their high-class entertainment. It was the fifth number of our lecture course and proved to be the best. The solo work was more than pleasing. Harold Tregillus, basso, has a deep and sonorous voice, and his use of it showed broad training. It has been a long time since our people have heard a tenor equal to Adolph Engstrom. His singing revealed a richness and brilliancy rarely found in a high voice. The soprano, Miss Nelson, had an exceptionally sweet voice. Her attractive personality and charming voice made her the favorite of the evening's entertainment.

Miss Gray sang the alto in a rich musical voice and with poise and distinction.  
Without question the Chicago Grand Opera Quintet is the best musical organization that has ever sang in our church. We congratulate those who were fortunate enough to hear them.

### WHOOING COUGH

Whooping-cough is one of the most fatal of the acute diseases affecting children. The death-rate is greater than that from measles and scarlet fever combined. It is caused by a germ which is thrown from a patient's mouth or nostrils in the act of coughing. These germs may be thrown directly into the faces of other children, or into the room where they mix with dust, when the sputum dries and is inhaled. The prevention of whooping-cough may be accomplished by isolating the infected child until the symptoms of the disease disappear. This means until the child has stopped coughing for at least two or three weeks. The period of isolation is necessarily long because it requires from one or two weeks to sometime two or three months for whooping cough to run its course.

During the period of isolation, if the child is old enough, he should be taught to cough into a paper napkin; otherwise, the attendant should, when possible, hold a paper napkin in front of the coughing child. The quarters occupied by the coughing child should contain as little furniture as possible—certainly no carpet—and should be cleaned frequently. The clothing used by the child its attendant should be disinfected in five per cent carbolic acid before being placed in the general washing. All the handkerchiefs used by the child and all excreta should be disinfected. If strict quarantine could be carried out whooping-cough could be practically eradicated. [And quarantine must be depended upon because at this time no antitoxin or vaccine of undoubted efficiency has been affected.

The high death-rate of whooping-cough renders this disease one of the most important of children's diseases, so much so that every parent should take an interest in the disease and assist in its eradication.

**GAINS 40 POUNDS IN 40 DAYS. REMARKABLE RESULTS OF THE NEW TISSUE BUILDER BLOODINE, IN MANY CASES OF RUN-DOWN MEN AND WOMEN. PROVE IT YOURSELF BY BUYING A BOTTLE OF BLOODINE NOW.**  
"By George, I never saw anything like the effects of that new treatment, Bloodine, for the building up of weight and lost nerve force. It acted more like a miracle than a medicine," said a well known gentleman yesterday in speaking of the revolution that had taken place in his condition. "I began to think that there was nothing on earth that could make me fat. I tried tonics, digestives, heavy eating, diets, milk, beer and almost everything else you could think of but without results."  
Any man or woman who is thin can recover normal weight by the remarkable new treatment Bloodine. "I have been thin for years and began to think it was natural for me to be that way. Finally I read about the remarkable processes brought about by the use of Bloodine, so I decided to try it myself. Well, when I look at myself in the mirror now I think it is somebody else. I have put on just forty pounds during the last forty days, and never felt stronger or more 'nervy' in my life."  
Bloodine is a powerful inducer to nutrition, increases cell-growth, makes perfect the assimilation of food, increases the number of blood corpuscles and as a necessary result builds up muscles, and solid healthy flesh, and rounds out the figure.  
For women who can never appear stylish in anything they wear because of their thinness this remarkable treatment may prove a revelation. It is a beauty maker as well as a form builder and nerve strengthener. Bloodine cost 50 cents for the usual \$1.00 a 2c bottles. Mail orders filled by the Bloodine Corporation, Boston, Mass.—BROWN & HAGLER, Special Agents.
