

PELVIC CATARRH CAUSES

Paipitation of the Heart, Cold Hands and Feet, Sinking Feelings—Pe-ru-na Cures Catarrh Wherever Located.

Mrs. X. Schneider, 3409 Thirty-seventh Place, Chicago, Ill., writes: "After taking several remedies without result, began in January, 1901, to take your valuable remedy, Peruna. I was a complete wreck. Had palpitation of the heart, cold hands and feet, female weakness, no appetite, trembling, sinking feeling nearly all the time. You said I was suffering with systemic catarrh, and I believe that I received your help in the nick of time. I followed your directions carefully and can say today that I am well again. I cannot thank you enough for my cure. I will always be your debtor. I have already recommended Peruna to my friends and neighbors and they all praise it. I wish that all suffering women would try it. Testify this according to the truth."—Mrs. X. Schneider.

Over half the women have catarrh in some form or another. And yet, probably, not a tenth of the women know that their disease is catarrh. To distinguish catarrh of various organs it has been named very differently.

One woman has dyspepsia, another bronchitis, another Bright's disease, another liver complaint, another consumption, another female complaint. These women would be very much surprised to hear that they are all suffering with chronic catarrh. But it is so, nevertheless.

Each one of these troubles and a great many more are simply catarrh—that is, chronic inflammation of the mucous lining of whichever organ is affected. Any internal remedy that will cure catarrh in one location will cure it in any other. This is why Peruna has become so justly famous in the cure of female diseases. It cures catarrh wherever located. Its cures remain. Peruna does not palliate—it cures.

Hon. Joseph B. Crowley, Congressman from Illinois, writes from Robinson, Ill., the following praise for the great catarrhal tonic Peruna. Congressman Crowley says:

"Mrs. Crowley has taken a number of bottles of Peruna on account of nervous troubles. It has proven a strong tonic and lasting cure. I can cheerfully recommend it."—J. B. Crowley.

FARMER AND PLANTER. DROUGHT RESISTANCE.

Seldom That the Most Serious Drought Can Prevent Fairly Profitable Crops.

It is seldom that the most serious drought can prevent fairly profitable crops in any locality blessed with a generous rain or snowfall during the winter season if the soil has been previously prepared to receive the moisture, and is given proper treatment in the early spring and continued through the growing of the crop.

The first requirement for drought resistance, says a correspondent of Farm and Fireside, is storage capacity for moisture in the subsoil. A subsoiler attachment following in the furrow behind the plow, or what is still more expensive, a separate subsoiling-plow running to the depth of six or eight inches below the bottom of the surface furrow, will afford water-storage for thousands of barrels an acre, and often result in bountiful crops where only failure could otherwise be expected. It is also very easy to understand how the breaking-up and aerating of the subsoil, together with the disintegrating effects of water, frost and the chemical action resulting, must gradually bring large amounts of fertility which are still more or less dormant before out of reach and unavailable.

After storage capacity for moisture has been provided the next most important drought-resisting requirement is the prevention of the escape of moisture by evaporation. But a very few of those intensely drying, windy days frequent in early spring, which suck the water from freshly plowed or bare, untilled soil like a sponge, are required to ruin all chance for a profitable crop when followed by a droughty season. If the soil had received proper tillage and attention at the critical time the crop could have matured in defiance of the drought by means of the store of moisture held in reserve below, which had been prevented from escaping by the mulch of finely-pulverized surface-soil. In this connection it will be evident how important good drainage is. If no water is allowed to stand nearer the surface than ten or twelve inches it becomes possible to get the tillage under way with no loss of time waiting for surface-water to dry out of the lower portions of the fields. After such water-logged and sun-baked portions have once become dried no amount of after-tillage can restore them to a good state of tilth.

A few seasons ago the writer conducted a series of experiments in drought-resistance with corn, potatoes, peas, beans; some red and black-cap raspberries also were included in the plots treated. These experiments were made to determine what might be accomplished when the fullest precautions were undertaken to prevent the escape of moisture by evaporation. The results were surprising, although field-tillage, looking to the same end, had long been practiced, but in a less intensive degree.

TAKE THE BOYS ALONG.

Farmers Should Remember That Their Boys Will Become the Farmers of the Future.

We have spoken of this matter before, but a good idea will bear repetition. "Line upon line, precept upon precept, here a little and there a little," is the way the pupil puts it. Our farmers and stock-raisers are beginning to utilize the best methods of educating themselves in their special work. They are organizing, cooperating and meeting for discussion, and like the Athenians mentioned by Paul, they travel long distances and spend money and time "in nothing else but to hear some new thing" in agriculture and stock-raising, and they are profiting thereby, because they are becoming better farmers, better fruit growers, and more successful in breeding and handling stock, and the result is they are becoming prosperous financially. This is right, and we are glad we can truthfully chronicle these facts. But while these progressive farmers are thus engaged, where are their boys? They are not at the meetings, but at home and at work. Farmers will carefully select samples of their best products, and take them along to show. And sometimes fine horses, cattle and hogs are placed in evidence of the success of the exhibitor. But their sons, who would be as much benefited by the discussions as their fathers, are left out of the calculation entirely. The older men should not presume that because they tarried in the Jericho of ignorance until their heads were gray, that their boys must do likewise. Youth is the time to acquire knowledge, as well as age, and we believe if farmers would, when attending educational meetings, take their boys with them, that they would learn in any other way, viz: That their boys receive more benefit from such meetings than they themselves do. The ancient Greeks had a better appreciation of this than our own people in this enlightened age. They required the children to eat at the public tables with the men, and attend the schools and lyceums, for the purpose, not of taking part in the ceremonies, but that they might profit by hearing the words of wisdom from the sages present. In those days it was the boast of that wonderful people that every citizen of Greece was capable of filling any office in the republic. Certainly the way they brought up their boys had much to do with this. Take the boys along and give them a chance.—Farm and Ranch.

FARMERS' ORGANIZATIONS.

Numerous and Potent Reason Why The Farmers of the South Should Organize.

Because "in union there is strength." Because those they deal with are organized and consequently strong. The weak, or unorganized, are like a lamb beset by a pack of wolves. The strong are the victors; the weak are the victims. Every business that has proven conspicuously successful—banking, shipping, manu-

MORE WORK FOR SCIENTISTS.

Scientists Must Now Be Deodorized and Water for the Elephant Filtered.

The old-timer drew his chair a little closer to the editor's desk. His eyes assumed a dreamy expression and he wrinkled his nose in a thoughtful way.

"That's about right," he said; "we're all getting a little too fussy, I expect. Too many folders and frills. Things ain't what they used to be—plain an' simple an' unassuming. Why, say, just stop a minute an' look at the circus of to-day for a sort of example."

"Too many rings, eh?" suggested the editor.

"No, no, not more rings," said the old-timer, "but too many lots of other things. Maybe you don't know it, but they tell me every blamed big circus nowadays carries along its own special scientist. Fact. Fallow out of some college, you know, with a lot of letters after his name."

"What sort of an act does he do?" inquired the editor.

"He don't do no act," said the old-timer, according to a writer in the Cleveland Plain Dealer. "Leastways not any act that the public is aware of. He's just busy with his microscope an' his chemicals outside in his little laboratory. They tell me that every ounce of sawdust that's used in the show now has to be deodorized. That's right. They're so plaguesy afraid of the sawbug germ, you know. Of course all the red lemonade is sterilized, and the red in it neutralized by evaporation under high pressure, or something. Then the air inside the big tent is changed three times during each performance by formaldehyde suction pumps, and the outside is showered mornin' an' evenin' with four parts of water to one of muriatic acid, or something. Every purchaser of a ticket buys it with the express understanding that he has been vaccinated recently, an' all the change the ticket sellers give back is fumigated with the mercury at 212. Yes, an' they say you never saw such a cure as there is taken with them animals! They've got so they all stick out their tongues to be antiseptized when the professor moves by—all 'cept the ant-eater, an' he only runs his out by special request, 'cause there's so much of it. Of course there's an awful lot of water to filter, and them elephants have got so knowin' that they can tell the difference in a moment if the boy try to run in the filter on 'em. An' the professor is kept pretty busy, too, huntin' up new diseases for the animals. Why, up in Skowhegan, I think it was, they tell me he hung a red card on the monkey cage marked 'Appendicitis Within, and then kep' the monkeys in quarantine for two weeks. And over at Oshweboah, if I ain't mistaken—"

LOYAL IRISHMEN.

True to England in Battle Although Ever Strong in the Cause of Ireland.

The Irish leaders are not children in politics. They know their way about in political affairs quite as well if not much better than the average Englishman. They know that home rule, in the Irish sense, can only be achieved by the willing or unwilling conversion of England. Yes, some one will say, but how do they seek to accomplish this conversion? By turning the house of commons into a bear garden, by cheering for the enemies of England, and by gloating over English reverses in the field, says a writer in the Contemporary Review. I agree. It is all simply detestable. But these men, let us never forget, are what we have made them. We have taught them that the only way of getting justice to Ireland is by force, by illegal methods, by treasonable and disloyal methods. As the twig is bent, so the tree inclines. I repeat, these men are just what our system of government has made them. One thing is quite certain, we cannot bully or coerce Ireland into loyalty. What about the Irish regiments in South Africa? What about the Dublin fustlers, nationalist and Catholic almost to a man? All through this deplorable South African war they have fought beyond the mark of others. Most of these brave men indeed have fallen in battle, and they have invariably fallen wherever the fight was hottest. None of the Dublins, the Inniskillings or the Connaught Rangers were ever reported by Lord Kitchener to have ridden ⁴/₁₀ miles with the Boers in hot pursuit! No. They have been true in the hour of England's greatest need. Why should Englishmen look at one picture and ignore the other?

Princess with Many Godfathers.

Princess Irene, wife of Prince Henry of Prussia, enjoys the unique distinction of being about 4,000 godfathers. Born in the course of the war of 1866, her father, Prince Henry of Hesse, requested the officers and men of the cavalry brigade under his command to stand sponsors to his baby girl, and at the christening, which took place on the termination of hostilities, deputations of officers, non-commissioned officers and men from each regiment were present in order to respect in the names of their respective corps the readiness of the latter to assume the customary spiritual, moral and material obligations toward their godchild. The name Irene—which means peace—was given to the little princess whose christening was coincident with the end of the war.—N. Y. Sun.

He Followed Directions.

Murphy being sick and alone in his cabin, Hogan volunteered to take care of him. The patient had been getting very little sleep, so the doctor left very few powders and told Hogan to give Murphy one about bedtime. About seven o'clock in the evening Hogan went out for a few minutes and when he returned Murphy was fast asleep. He slept soundly until ten o'clock, when Hogan went to the bed-side, shook the sleeping man vigorously and shouted: "Wa-ake up here, Moopy, till Oi give yez these powders t' ma-ake yez sleep!"—Colorado Springs Gazette.

PRESCRIBED FOR HER.

Desperate Case That Taxed the Doctor's Patience to the Utmost.

When Dr. Black, of Fourteenth street, who had the most recent case of a woman who had been ill for a long time, was called to a patient who had been ill for a long time, he was told that she had been ill for a long time. He examined her and found that she had been ill for a long time. He prescribed for her and she recovered.

It Cures While You Walk.

Allen's Foot-Paste is a certain cure for hot, sweating, callous, and swollen, aching feet.

Feeble Japanese Language.

And now it is announced that the Japanese language looks easy enough.

To Cure a Cold in One Day.

Take Laxative Broom Quinine Tablets. All colds relieved unless it falls to your lot.

How you can get a good job.

Do not believe Place's Cure for Consumption has an equal for coughs and colds.

The War of It.

A man had to go away from home to have L.I.D. or P.A.D. conferred upon him.

Police Captain.

"So you shut the dog up?" "Yes, but he's still there."

WHERE DOCTORS FAIL

To Cure Woman's Ills, Lydia E. Pinkham's Vegetable Compound Succeeds. Mrs. Pauline Judson Writes:

"Dear Mrs. Fiskham:—Soon after my marriage two years ago I found myself in constant pain. The doctor said my womb was twisted, and this caused the pain with considerable inflammation. He prescribed for me for

Mrs. Pauline Judson, Secretary of Scarborough Golf Club, Brooklyn, New York.

Four months, when my husband became impatient because I grew worse instead of better, and in speaking to the doctor he advised him to get Lydia E. Pinkham's Vegetable Compound and Sensitive Wash.

Had I taken that at first, it would have saved me weeks of suffering. It took three long months to restore me, but it is a happy relief, and we are both most grateful to you.

Your Compound has brought a joy to our home and health to me. — Mrs. Pauline Judson, 47 Hurt Street, Brooklyn, N. Y. — \$2.00 per bottle if about nationwide in price.

It would seem by this statement that women would save money and much sickness if they would get Lydia E. Pinkham's Vegetable Compound at once, and also write to Mrs. Pinkham at Lynn, Mass., for special advice. It is free and always helpful.

Allen's Uicerine Salve

Allen's Uicerine Salve

EVERY WOMAN HAS BACKACHE

Every woman who has the care of a family or household has at one time or another spells of backache, nervous weakness, headache, heartburn or indigestion, caused as a rule by worry, overwork, irregular meals or habitual constipation. To all women who suffer in this way we say, take PRICKLY ASH BITTERS, it will cure you. It performs a marvelous transformation. The tired, weak, despondent, pale, nervous victim is soon a strong, bright, happy woman with rosy cheeks and cheerful spirits.

Sold everywhere at \$1.00 per bottle.

STRONG KIDNEYS MEAN GOOD HEALTH.

There are no diseases that more quickly and surely derange the entire constitution than kidney or bladder trouble, and it believes every man and woman suffering from these diseases should have the kidneys cured. The body depends upon the kidneys for the water of the system, and when it fails to do this the result is an interference with digestion, a sudden stoppage of the free circulation of the blood and a serious weakening of the heart. Also rheumatism could not exist if it were not for weak and deranged kidneys.

SMITH MEDICAL CO., St. Louis, Mo. Gentlemen—Enclosed please find draft for \$4.00 per statement. I have bought some of your Sure Kidney Cure from the following party. It gives me the best satisfaction of anything I see for kidney trouble. Respectfully yours, H. H. LUCAS, Ottawa, Kansas.

I have been suffering with a kidney trouble for a good while and have tried kidney remedies and failed to get relief until I had your SMITH'S SURE KIDNEY CURE. Three bottles cured me. Too much can be said in its behalf. Yours respectfully, B. G. JANKAS.

SMITH MEDICAL CO., St. Louis, Mo. Gentlemen—Send me three or four dozen of your Smith's Sure Kidney Cure; I am suffering from several old chronic cases cured, as follows: W. A. SMILEY, M. D., Physician and Druggist, Alvin, Texas.

All you need in any case of kidney or bladder trouble is SMITH'S SURE KIDNEY CURE. SMITH'S SURE KIDNEY CURE contains nothing harmful, but nevertheless it will entirely cure Bright's Disease, diabetes, dropsy, gravel, stone in the bladder, double bladder, frequent desire to urinate, pain in the back, legs, sides and over the kidneys, swollen of the feet and ankles, retention of urine, soiling pain in the bladder, wetting the bed, every form of kidney, bladder and urinary trouble in man, woman or child.

Price 50c and \$1.00 a bottle of druggists generally or direct from the chemist.

FREE SAMPLE SENT ON APPLICATION.
