ANNOUNCEMENTS

FOR MAYOR
We are authorized to announce J. F. Burnett as a candidate for Mayor of Memphis, at the ensuing Mayoral election.

MEMPHIS, DECEMBER 1, 1887

OUR GERMAN CITIZENS

Our correspondent "Veritas" in a readable and pleasantly written communication undertakes to palliate one of the wrongs which we last week stated were unjustly visited upon the Germans. He endorses our whole article and writes in a kind spirit, and, as he says, with the very best motives in explanation of the causes of the ostracism—to a certain extent—of Germans and their children from the best circles of American society.

There are some men moving in the lower grades of society, and filling subordinate positions, (Americans as well as Germans) who are intelligent and know how to, and do deport themselves properly and creditably in the society of ladies, and if they fall in this particular, ladies themselves very well understand the art of compulsion and we, imagine that they rarely, if ever, hesitate to exercise it. No one does, or can, appreciate the pleasures and benefits of high-toned social life more than a German, refined, intelligent woman and such an one if improperly and unjustly excluded from it naturally chafes at the injustice. She certainly will not voluntarily do anything to deserve it and thereby make it just. If she has pride—and this every true woman has—she will always take advance—and never backward—steps, and will never be entirely satisfied until she attains her due rank in the best society, and be true and real worth is recognized (either willingly or unwillingly) by those who have endeavored to hold themselves above her. We think therefore "Veritas" is mistaken in his premises.

As to the marrying part of his communication, we think that is something in which the ladies themselves are the most interested, and, as they are fully aware that as they make their beds they must lie on them, if they voluntarily make them hard, it is their own business and nobody else's. But in this, too, we must dissent from our correspondent's views. Every woman likes to have beaux and suitors, be she maid or widow, but no true, refined and intelligent lady ever becomes so exceedingly anxious to marry as to unite her fortunes for woe or to those of a man whom she most know her interior in any respect whatever. One of these old maids who ever wrote, said that a woman should always look rather above, than below her or even on her own level, for a husband. We think he might have omitted the latter position, but we are not so sure about it. We are sure, however, that no truly refined and intelligent lady can marry a man in any respect her inferior and ever be happy afterwards, and we don't believe there ever was an exception at instance. But this marrying business, as we said before, a matter that concerns only the interested parties themselves, and neither "Veritas," nor we, nor anybody else has any right to meddle with it.

We are not in favor of obliterating society lines at all; on the contrary we care not how closely and tightly they are drawn; but we are in favor of making true worth, refinement and intelligence the tests and keys of admission. Do this and society will surely prosper.

What does "Veritas" mean? "Veritas" and "falsitas" are Latin words, and mean truth and falsehood respectively. Veritas is the truth, and falsitas is the falsehood. In this communication, the author is pointing out the hypocrisy of the German community, which claims to be American citizens but yet looks down upon their own people.
