

# One Farmer Tells Another...

Rex A. Brush, Modoc, Kansas, who stores his wheat in two Quonset 40's, recommends these all-steel buildings as "one of the best answers to today's grain storage problem."

## FACTS YOU WANT TO KNOW ABOUT QUONSETS

- No other type of permanent building has the Quonset's superiorities at so low a price.
- Fastest erection through more efficient Stran-Steel arch-rib construction.
- Most thoroughly proved steel building—durable, permanent, quality construction throughout.
- Nailable Stran-Steel framing makes it easy and economical to install bin liners.
- Ideal for storing implements and machinery, and for many other farm uses, as well as for grain storage.

## QUONSETS\* SOLVE GRAIN STORAGE PROBLEM

Best qualified to recommend Quonset buildings for grain storage are the farmers who have used them for that purpose. Without exception, they are enthusiastic in their praise of Quonsets.

For example, a Modoc (Kansas) grower, who purchased a Quonset 40 three years ago, and another this year—both for wheat—writes us as follows:

"Quonset farm storage is the answer to fast combine harvests. It eliminates dumping on the ground, excessive hauling charges at harvest, and all storage charges. Above all, it gives the farmer control of his grain at all times. I would recommend Quonset buildings to grain producers as one of the best answers to today's grain storage problems."

(Signed) REX A. BRUSH

In other words, a Quonset quickly pays for itself . . . and, what's more, you can have one delivered and erected on your farm in a matter of just a few days.
