**A Very Peculiar Ailment.**  
There is a peculiar case near Barbourville, W. Va., which is attracting the attention of the medical fraternity of this whole section of the country. It is a case of general bone breaking without an apparent cause. Mrs. Kelly, wife of Peter Kelly, a well known citizen, is the victim of this peculiar disease, which the local surgeons and doctors, for want of a better name, call fragilitas osium. Mrs. Kelly, who is a delicate lady, was just getting around after a long and serious illness when, a few nights since, she got out of bed and started down stairs to get a drink of water. When but a few steps down one of the bones of her right leg broke with a peculiar glasslike snap, without having come in contact with anything, and from no apparent cause. She called her husband, and he picked her up and started back toward the bedroom with her, when the bones of her right and left arms broke in several places with the same peculiar snap heard and felt by the woman when the first fracture occurred. Mrs. Kelly was carried to her bedroom and laid on her bed, when the bones of her left leg broke in the same manner. A surgeon was immediately sent for. He set the broken limbs and bandaged them. Mrs. Kelly said that she felt no pain when any of the fractures occurred, and that the setting and bandaging of her broken limbs occasioned her not the slightest discomfort.—Baltimore American.

**Fear and Cholera.**  
A striking example of the effects of fear in times of cholera is the following authentic fact, which is recorded in the newspapers of that time: In 1853 or 1854, I now forget which, we had the cholera in Wien (Vienna). The professors at the great general hospital in the Alserstrasse had their bands full. A man of the name of Franz Holriegl was then awaiting sentence of death for murder, and the director of the hospital presented a petition to Emperor Franz Josef to grant a full pardon to this man providing the culprit in return would consent to sleep in a bed from which a corpse of a cholera victim had just been removed. The emperor granted a full pardon under the aforesaid condition, and the condemned man was only too glad to comply. He was taken into the hospital and ordered to lie down at once in the same bed from which in his presence the corpse was removed. The man undressed and went to bed. In less than half an hour he began vomiting and in six hours he died from cholera. The man died of cholera, which he took from fright. The corpse removed from the bed was not that of a cholera victim, but of a man who met his death from a gunshot wound. The experiment did not take place in the cholera wing, but in the ward for skin diseases.—Washington Star.

**Woman and the Confidence Game.**  
A promised raffle for a gold watch was to have taken place at R. H. Pettit's store Saturday evening, but it never took place. A number of the ticket holders were on hand, but the person who was to give the raffle, a young woman, failed to show up. After waiting some time it began to dawn upon the people who came that they had been well duped. A number of days ago a good looking young woman, a stranger, who said her name was Miss Clifford, called on Mr. Pettit at his store. She showed him a jeweled gold watch and obtained his consent to have the timepiece raffled at his store. Together with another woman, supposed to be her mother, Miss Clifford went all over the town and sold a large number of tickets at fifty cents each. The last heard of the two women was that they had been seen with valises in hand traveling in the direction of the depot Saturday morning. These women are evidently confidence people.—Sacramento Bee.

**Mourning Shoeblacks.**  
The shoeblacks are almost in despair. As the fall approached they have been watching and waiting for the dictators of fashion to declare against the russet leather shoes. On the contrary, the makers of fashionable footwear say that this fall the yellow shoes will be more popular than ever and that quite likely they will be worn during the winter also. While the inventive genius of some massive intellect has prepared a patent yellow polish, for which the shoeblacks charge ten cents for each application, they do not find anything so profitable as the old black calfskin shoes which had to be polished every day, and sometimes night and morning. The yellow shoes, I notice, are being worn more and more every day.—Brooklyn Eagle.

**To Much of a Risk.**  
It is not unusual for colds contracted in the fall to hang on all winter. In such cases catarrh or chronic bronchitis are almost sure to result. A fifty cent bottle of Chamberlain's Cough Remedy will cure any cold. Can you afford to risk so much for so small an amount? This remedy is intended especially for bad colds and croup and can always be depended upon. For sale by J. E. Ferte, druggist.

**The Testimonials.**  
Published on behalf of Hood's Sarsaparilla are as reliable and as worthy your confidence, as if they came from your best and most trusted neighbor. They state simple facts. Hood's Pills cure sick headache.

**A Cholera Scare.**  
A reported outbreak of cholera at Helmetta, N. J., created much excitement in that vicinity. Investigation showed that the disease was not cholera but a violent dysentery, which is almost as severe and dangerous as cholera. Mr. Walter Willard, a prominent merchant of Jamesburg, two miles from Helmetta, says Chamberlain's Colic, Cholera and Diarrhoea Remedy has given great satisfaction in the most severe cases of dysentery. It is certainly one of the best things ever made. For sale by J. E. Ferte, druggist.

**Cholera.**  
When properly treated as soon as the first symptoms appear, cholera can nearly always be cured. The patient should go immediately to bed and remain as quiet as possible. Send for a physician, but while awaiting his arrival take Chamberlain's Colic, Cholera and Diarrhoea Remedy in double doses after each operation of the bowels more than natural. If there is severe pain or cramps, take it in double doses every fifteen minutes until relieved. This Remedy has been used with great success in seven epidemics of dysentery that were almost as severe and dangerous as cholera, and if used as directed a cure is almost certain. Every family should have a 50 cent bottle at hand ready for instant use.—After the disease is under control castor oil must be taken to cleanse the system. No other physic or substitute will do in place of castor oil. For sale by J. E. Ferte, druggist.

**THE WONDERS OF A WATCH.**  
Very few who carry a watch ever think of the unceasing labor it performs under what would be considered shabby treatment for any other machinery. There are many who think a watch ought to run for years without cleaning or a drop of oil. Read this and judge for yourself: The main wheel in an ordinary American watch makes four revolutions a day in an ordinary four hours, or 1,440 in a year. Next, the center wheel, twenty-four revolutions in a day, or 8,760 in a year. The third wheel, 192 in a day, or 69,984 in a year. The fourth wheel, 2,448 in a day, or 885,000 in a year. The fifth or scape wheel, 12,960 in a day, or 4,738,800 in a year. The ticks or beats are 388,800 in a day, or 141,812,000 in a year.
