Mrs. Madelyn Meyers from Cut Bank will soon take up her residence here for an indefinite time at least. She was a sister to Mrs. Bessie Arms and has been here on several occasions. Mrs. Meyers spent many years in California nursing in Los Angeles hospitals.

Mrs. Eva Jones and Medric and Barbara have been visiting Ilene Cheney, who before her marriage in July was Ilene Jones. The newlyweds reside in Billings and best wishes are extended to the couple.

Friends extend sympathy to the family of Dave Doney, who passed away early in August due to a heart ailment. We also sympathize with Mr. and Mrs. Lyle Cochran, whose two day old baby passed away at the Agency hospital three hours after the death of the grandfather, Dave Doney, who was Mrs. Cochran's father.

## Growers Urged to Consider '64 Feed Grain Program

Time is short for winter wheat producers to consider how their wheat plantings may affect their participation in the 1964 feed grain program.

Many wheat farmers in the county are also feed grain producers and as a result are eligible to participate in the 1964 feed grain program by diverting feed grain acreage out of production.

A drop in 1964 wheat prices is reflected by the present wheat futures market. Currently, the judgment of the market is a July 1964 Kansas City wheat futures price of around \$1.55 per bushel. This price, adjusted to a farm level, reflects a wheat price of about \$1.25 to \$1.30 per bushel.

A 1964 crop in excess of current disappearance of about 1.3 billion bushels for domestic and export use will undoubtedly put heavy downward pressure on wheat prices, probably forcing prices down to a feed price level as the supply seeks a consumption outlet.

The 1964 feed grain program has been designed to reduce possible expansion of overall grain acreage. The program provides an effective guide for farmers to follow in keeping their overall crop acreages in 1964 reasonably in line with expected needs.

While the program provides flexibility in enabling farmers to shift acreages among crops not directly under the feed grain program, it also provides for maintaining soil-conserving acreage, including summer fallow and idle land on participating farms at 1959-60 levels. This will tend to limit overall acreage expansion, particularly if substantial numbers of wheat-feed grain producers participate in the program.

## Korean Bonus Deadline Extended

Montana veterans of the Korean War who have not previously applied for their bonus,

1964 feed grain program before they complete their seeding plans. Even though the feed grain sign-up will not be until early next spring, farmers who plan to participate will need to keep their fall-seeded acreage in line with total crop acreage permitted on their farms under the feed grain program.
