Yes, THE TRIBUNE is sufficiently patriotic to desire the Telegraph to publish the city ordinances, as it is a question whether it does not have a contract to do so, rather than see the taxpayers of North Platte mulct into a damage suit. The Era idea is "d"—the taxpayers so long as I am permitted to hang on to the teat. In connection with his other duties Fred Hanlon, bridge watchman now keeps a daily record of the stage of the river as shown by a river gage put upon the bridge by order of the government authorities at Washington. With the data thus secured upon which irrigation engineers may figure as to the capabilities of the Platte river. A populist's highest idea of good government is that which will furnish the most offices for perspiring statesmen, hence the Era's objection to THE TRIBUNE favoring the abolition of the unconstitutional office of state oil inspector. Had the brute the understanding of the highest order of creation, and read the article in question with proper understanding it would have discovered that it took no cognizance of whatever political party might be temporarily in power. Mayor VonGoetz occupies the same position this spring that he did last year in regard to the mayoralty. If the people wish him to serve in this capacity they must first elect him to the position. In the year past he has made so capable and acceptable an official that THE TRIBUNE would be pleased to see him re-elected to the position. He is thoroughly in favor of retrenchment of official salaries at the present time until the city is free from indebtedness, and economy in municipal affairs until that period. That there will be an active irrigation campaign inaugurated in the east can be seen by the following extract taken from a letter received by I. A. Fort from the publisher of the Irrigation Age, of Chicago: "It may interest you to know that Mr. Smythe is now in the city arranging plans for his lecture campaign with every prospect of being highly successful. His work in the east resulted as favorably as could be expected, and he succeeded in interesting many prominent people of Boston, including Dr. Edward Everett Hale, who presided at some of the meetings, and who now has charge of the arrangements for other meetings to be held in the near future. The eastern papers devoted much space to Mr. Smythe and his plans. The leading magazines have also taken up the work, and articles will begin to appear in the Century, as well as others, within a short time. All of this work on Mr. Smythe's part can but result greatly to the benefit to the entire west, and we are looking forward to the present year as one that will show a notable progress in irrigation sentiment. Hoping to hear from you again soon, we remain, Yours very truly, G. E. GIRLING, Ass't Mgr. Geo. Grady has moved out of the Dave Scott property in the Third ward, and has become a resident of the First.
