SUCCESS

WAS NEVER BORN IN A MINUTE

It takes time and experience to develop a marketing organization. There will be periods of costly mistakes, wrong starts, persons not adapted to their positions. The best experts in the world can not achieve efficiency at once—they will have to be trained to team work.

The Equity Co-Operative Exchange has passed through these stages that hamper all beginnings. It has grown steadily and surely, and with increasing speed as it gained in power and influence. It is the big marketing organization of the farmers that is based on accepted business standards and is delivering the goods. It has now paid eight years' cumulative dividends in five years. Its country elevator system is the highest form of democratic participation and co-operative effectiveness. Its livestock method is simple, direct and the most economical in existence.

It is the most completely serviceable organization to the individual farmer, shipping association, and country elevator that farmers have yet devised. Look it up. Ask for information. Consign your grain and livestock to its various departments.

A Reasonable Profit —and No More

(Continued from page 5)
elevators had established themselves strongly enough to compete with the line elevators, farmers were generally given fair prices and the buyers made only reasonable profits. But where line elevators were established without competition the prices paid to farmers were far below the market and enabled the elevators to make enormous profits.

Said Dr. Ladd to himself: "Seventy per cent of the people of North Dakota are farmers. Dealing with so many people a grain elevator is as much of a public utility as a railroad. If we can regulate a railroad's profits, why not a grain elevator?"

Dr. Ladd didn't keep his good idea to himself. When the farmers were firmly established in the North Dakota legislature he asked them the same question.

"Why can't we?" said the farmers, "Why, we can. And what's more, we will. Watch us."

And they proceeded to pass a law providing for a valuation of the grain elevators, just as railroads are valued, a determination of their earnings and a determination of the margin of earnings that they might make on handling a bushel of grain, sufficient to pay their operating expenses and a fair profit.

Then they turned around to Dr. Ladd and said:

**SIX CENTS PER BUSHEL
A REASONABLE RATE**

"We know you're pretty busy, being president of the agricultural college, state grain inspector, state chemist and several other jobs, but here's another one for you."

Dr. Ladd has now finished his preliminary work of valuing the elevators, learning their earnings and the profit they have been making on a bushel of grain now. He has found that wherever farmers' co-operative elevators were working the margin of profit was low, sometimes, where large amounts of grain were handled, as low as 3 cents a bushel, but that where no competition existed margins ranging as high as 25 cents a bushel have been charged by country elevators.

After a full consideration of all elements Dr. Ladd has decided that 6 cents a bushel is a fair maximum charge for country elevators to make for the cost of operating the local elevator and profit on the investment.

This is a maximum charge. At points where large amounts of grain are handled the competition of farmers' co-operative companies will be able, in some cases, to reduce the operating margin as low as 3 cents, Dr. Ladd finds. But it was necessary to establish a state-wide rate and the 6-cent rate will save the farmer just 19 cents a bushel at the elevators where 25 cents has been charged, without occasioning any increase in the rates of elevators which now charge less than 6 cents.

RYE ACREAGE CUT

Due to the impossibility of getting credit and the poor prices for farm crops the winter rye acreage in North Dakota has been cut to 624,000. A year ago 960,000 acres were planted and the five-year average (1915-1919) was 1,351,000 acres.

PRODUCE AND GROW RICH

In 1919 North Dakota produced 55,200,000 bushels of spring wheat and it was worth \$133,032,000. In 1920 North Dakota produced 68,400,000 bushels—and it was worth only \$88,920,000.

Mrs. Margaret Sanger, the great birth control advocate, and her two sons

"WOMAN AND THE NEW RACE"

By Margaret Sanger

This book, just published, is Margaret Sanger's greatest effort for the birth control movement. It contains the very essence of her life's work. It pleads and instructs the women of the world in the greatest step of their emancipation. "WOMAN AND THE NEW RACE" contains the sum total of her experience—the knowledge she dared to utter and print. The knowledge for which she faced jail and fought through every court to establish as woman's inalienable right to know.

Happiness in Every Marriage

If you fail to read this book do not ever complain of any unhappiness that may be yours, resulting from lack of knowledge of the married state, because "Woman and the New Race" contains the knowledge every man and woman must and should have.

PART OF CONTENTS	
Woman's Error and Her Debt	Continence: Is it Practicable or Desirable?
The Struggle for Freedom	Contraception or Abortion?
Two Classes of Women	Are Prevention Means Certain?
Immortality of Unwanted Large Families	Battalion of Unwanted Women Who Plead for Abortion
Cries of Despair	Legislating Woman's Morals
When Should a Woman Avoid Having Children?	Why Not Birth Control Clinics in America?
Woman and Morality	Any one of the above chapters alone is worth the price of the book

The Knowledge Is Priceless

This book, "Woman and the New Race," by Margaret Sanger, contains so much that is vital, thorough and necessary to every married couple, that it would require a book to explain it. The knowledge between its covers is priceless.

Send \$2 today for "Woman and the New Race," and if you are not satisfied it is worth its weight in gold we will refund your money. Order before this first edition is exhausted and the price advances—and while we still have the privilege of sending it to you. Order direct and at once—don't delay.
