

MASSED GUNS OF BRITISH SURPRISE OBSERVERS FROM AMERICAN ARMY

Realize Great Efforts United States Will Have to Make to Equal Entente in Artillery Power.

BIG GUNS SOLVE MOST MODERN WAR PROBLEMS

Germans' Need for Material to Replace Short-lived Heavy-caliber Weapons Is Growing Desperate.

British Headquarters in France, July 1.—American officers, who have been studying conditions on this front for some time past, say they are wonderfully impressed with the British artillery, which has made them more than ever conscious of the immense efforts the United States will have to make in that direction.

The limited depth of the battles today is due to the fact that the infantry must not get by the protecting cover of their artillery. It was with their enormous guns, which no other nation possessed, that the Germans expected to blast their way to quick victory in 1914.

SCHOOL PROGRAM IS PLANNED FOR WAR TIME NEEDS

Commissioner P. P. Claxton Urges That Special Attention Be Given Manual Training and Laboratory Work.

Washington, July 1.—Suggestions for a program of school activity for different types of educational institutions during the war have just been issued by Dr. P. P. Claxton, United States commissioner of education.

Parents should be encouraged to make all possible efforts to keep their children in school and should have public or private help when they cannot do so without it.

Larger High School Attendance.—The attendance in the high schools should be increased, and more boys and girls should be induced to remain until their course is completed.

Wisconsin Teacher and Wife She Killed

MISS GRACE LUSK MRS. DAVID ROBERTS

Miss Grace Lusk, a normal school teacher at Waukesha, Wis., shot to death Mrs. David Roberts, wife of a well-known veterinarian with whom she was in love.

"You must have known for a long time that your husband's affections had passed from you; that he cared for someone else."

"That is the way you respectable folk—good, moral women—do things in order to keep your reputation and live lives of ease."

"In the eternal triangle our souls require the elimination of one character. The two who should remain are the two whose affection is mutual. Will you some time read Ellen Key on Love and Marriage?"

run at their full capacity. In many of the shops work should be done which will have immediate value for the national defense.

"In all high schools in which domestic science (sewing, cooking, sanitation, etc.) is taught, large units of time should be given in the summer and fall to sewing for the Red Cross and for local charities."

"Classes for grown-up women should be formed in which practical instruction can be given largely by lecture and demonstration in the conservation and economic use of food."

Continuation Schools Demanded.—"For all boys and girls who cannot attend the day sessions of the high schools, continuation classes should be formed, to meet at such times as may be arranged during working hours or in the evening."

should be largely increased, as should also the attendance of men and women preparing for service as teachers. More Work for the Colleges.

"The number of students in colleges, universities and technical schools should increase rather than diminish. Many of the older and upper class men will volunteer for some branch of the military service, but all young men below the age of liability to selective draft and those not recommended for special service should be urged to remain and take full advantage of the opportunities offered by the colleges, universities and technical schools, to the end that they may be able to render the most effective service in the later years of the war and the times of need that will follow."

Practically all women students should remain, and all boys and girls graduating from high school should be urged to enter college, technical school or normal school.

Courses for Teachers Needed.—"In agricultural colleges special intensive courses should be given to prepare teachers, directors and supervisors of agriculture and practical farm superintendents."

"No college, university, or technical school that can avoid it should permit its faculty or student body to be scattered or its energies to be dissipated. All should redouble their energies and concentrate them on those things that will be of most service during the progress of the war and which will prepare their students for the most effective service of the country and of the world when the war is over."

LETTERS TO SOLDIERS TELL NEWS OF GERMANY

British Army Headquarters in France, June 29 (By the Associated Press).—Some interesting items of German news have been gleaned within the past few days from letters found in raided dumps. One of them, written from Bielefeld, Prussia, June 6, tells of an explosion in a munitions factory at Detmold, and continues:

"It was terribly sad. On Sunday ninety victims already had been buried. One woman who has lost four sons in the field, has now lost her three daughters in the explosion. It is strange that the Westphalian newspapers give no report of the accident."

Another letter written at Erfurt, Prussian Saxony, May 28, says:

"The church bells have pealed a farewell. This week all of them will be taken away to be melted down and turned into shells. No eye remained dry when the pastor mentioned that instead of ringing out tidings of an early peace they must now cause death and destruction."

FLIPS FROM THE FILLUMS

Madge Kennedy Goldwyn Pictures Star

AT THE THEATERS TODAY. "B" Theatre—"The Voice on the Wire," a two-part extra with regular program; "The Secret Cellar," and a comedy, "Right Car, Wrong Berth."

Crystal Opera House—Dark. Lyric Theatre—Ella Hall starring in "Polly Red Head," a five-part feature, and a two-reel comedy, "Her Daring Caring Ways."

Pastime Theatre—Repeating "The Silent Lie," with an all-star cast, and a two-reel Keystone comedy, "Pinched to the Finish."

AT THE LYRIC. Going to popular fiction for the subject of photoplaying, Bluebird brings to the Lyric theater today only a screen version of Edgar Jepson's clever "Pollywooly" stories, with Ella Hall playing the role of two little girls so much alike that they are substituted one for the other when the domestic affairs of an unhappy couple are to be straightened out.

"Polly Redhead" is the apt title that has been applied for screen purposes to Mr. Jepson's entertaining story, and Miss Hall has been provided with the best opportunities she has ever had to justify the convictions of her admirers that she is among the cleverest of screen stars.

Trickery of the camera will provide an unusual interesting scene when Miss Hall will appear, simultaneously, in the two characters she interprets throughout the play. "Double exposure," the picture makers call it, but the illusion would be just as complete and enjoyable even if the public were not informed on the technicalities.

In connection with the above there will be shown a two-reel comedy, "Her Daring Caring Ways."

"SLIM" SUMMERVILLE. Slim Summerville, who is the dog catcher in the new Mack Sennett-Keystone of that name, just released, is the original skinny man of pictures and still stands supreme in the slat brigade.

In the new Keystone Slim is the goat all the way through. Teddy puts him hors du combat, or whatever the French say, and releases all the dogs he has in his fifty pound wagon, and later on even his side partner, lured by the promise of reward, pursues the long boy.

Here it is that Slim almost gets revenge, turning the great battleship guns on Glen, but he hits an ocean liner instead and his troubles increase accordingly.

BEAUTY BRIGADE SWIMMERS. Almost every one of the famous Keystone Beauty Brigade can swim, ride, play tennis, etc., but in the making of "Whose Baby," the Mack Sennett-Keystone for early release, one thing was discovered in which they were not so proficient—swimming on the hanging rings.

Some of the funniest scenes in the picture show the pretty girls frantically endeavoring to catch the swinging circles and deftly fill from one to the other. In many cases the fill turned out to be a flop.

SETS PACE IN STYLES. The most stylish as well as the blondest blonde at the Mack Sennett-Keystone studios plays the feminine lead in "A Royal Rogue," the new comedy which was released the last of May.

She is Juanita Hansen, and in this picture aside from the engrossing role in which she appears, she introduces some nifty attire which is more 1920 than it is 1917, although "A Royal Rogue" isn't in the least intended as a fashion show.

Miss Hansen is famous from coast to coast as the designer of novel, fetching costumes and quite recently made one of the most famous California beach resorts sit up and take notice through the introduction of a striped bathing suit unlike anything seen before. The model has already gone east and will doubtless become familiar wherever there is bathing, before the season is over.

SURE NEAR-DROWNING. The first near-drowning of the season is reported from Santa Barbara. William Russell, the American film star, and George Fisher, his support, were the principals. Russell was to rescue Fisher from a heavy sea for the camera. Fisher got beyond his depth; Russell was delayed in starting. When the rescue was finally effected, George had but a fighting chance to live. Pulmotors and first-aid exercises won the life-fight. After a while George sat up and remarked: "Gee! I'll bet that'll be the real stuff on the screen. You'll see it in a future feature, as yet untitled."

AMERICAN GUNNERS FIRE AT 2 U-BOATS ON TRIP

London, July 1.—The gun crew on an American liner fired upon two German submarines during her voyage from the United States to England. Both targets were at a considerable range but the report to Washington of the commanding officer will express the belief that one periscope was shattered.

MUCH ACTIVITY IN TWELFTH FEDERAL RESERVE DISTRICT

Trade Conditions Are More Favorable and Bank Deposits Are Increased; Shipbuilding Increases.

San Francisco, Calif., July 1.—According to the monthly bulletin to be issued tomorrow by John Perrin, chairman of the federal reserve bank of San Francisco, trade conditions in the twelfth federal reserve district are active and increases are shown generally in bank deposits, clearings and building permits. The report reads as follows:

Maximum production and minimum necessary consumption of food stuffs is a sound war principle. At least, in production this district is putting forth a splendid effort. The fall and winter were unfavorable for grain, and the spring was cold and backward, but, in spite of this and because of the spurs both of patriotism and acreage of spring planting, amounting to 32 per cent more than last year in Washington, Oregon and Idaho, the government report, June 1, indicates a yield in this district of wheat, barley and oats in excess of that of last year.

Cool Weather Helps. In California the deficiency in precipitation has been offset by cool weather during early summer, which has been ideal for many crops. Hay, which was generally short last year, will show a greater tonnage this year. Alfalfa will exceed 6,000,000 tons against 5,000,000 last year.

Growers of deciduous fruits have been greatly relieved by the announcement that such fruits will be classed as necessary food and not as a luxury, assuring greater demand, better prices and more care for moving the crops. A generally larger yield is indicated.

The crop of navel oranges, during the season just closed, has been one of the best in years, aggregating 27,153 cars, as compared with 22,235 cars last year. Shipments of Valencia oranges are just beginning and likewise promise to be larger.

Shipbuilding Increases. Shipbuilding is probably the most active industry on this coast. Seattle shipyards have \$39,000,000 of contracts while those of Portland and Tacoma have as much more. The contracts of the Puget Sound district are believed to exceed those of the San Francisco district.

In California during May, petroleum production averaged 261,004 barrels per day and shipments 303,300 barrels, resulting in a reduction of stored stock of 1,225,318 barrels. The increasing shortage of crude oil is rapidly creating a critical fuel situation on this coast. It is reported that the Southern Pacific railroad, using crude oil as fuel for its locomotives, is unable to supply its requirements and that by September 20 per cent of its motive power will be out of commission unless new supplies of crude oil become available.

Not in ten years has the Pacific northwest lumber market been so active and remunerative as at the present time. Demand has been such that many large producers are now absolutely out of the market. Lumber production is near the maximum possible.

Food production in this district promises to be unexpectedly large and materially greater than seemed probable a month ago, although not of record volume.

Trade is active. Bank deposits, clearings and building permits all show increases.

NURSE HAD POOR HEALTH

Suffered Much Pain, Yet Had to Work. Finally Cured by Lydia E. Pinkham's Vegetable Compound.

Toledo, Ohio.—"I am a widow and got out nursing, and suffered from a female trouble that caused a great deal of soreness across my back, and through my abdomen. Sometimes it would be very painful after a hard day's work. I read about Lydia E. Pinkham's Vegetable Compound and tried it and it has helped me wonderfully, so the soreness is all gone now. I believe Lydia E. Pinkham's Vegetable Compound is just the remedy for female troubles."—Mrs. ELIZABETH JOHN, R. F. D. No. 4, Toledo, Ohio.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and today is regarded as the most successful remedy for female ills. There are thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., to prove this fact.
