china has been demonstrated. It stands not regardless of the record.

**SUGAR BEETS AND POLITICS.**

**T**HE following is reproduced from the current issue of a pamphlet entitled "Facts About Sugar," which is issued by the sugar trust with the main idea of convincing the people of this country that they are not being cheated by the present high price they are forced to pay for sugar.

"A total of 2,999,999 acres planted to beets would free us from dependence upon foreign grown sugar," says Bulletin No. 259 of the United States department of agriculture in calling attention to the ease with which the United States could make itself independent of the rest of the world for its sugar supply. The bulletin prints a list of nineteen states which have been demonstrated to be well adapted to the growing of sugar beets. These states are California, Colorado, Idaho, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, North Dakota, Ohio, South Dakota, Utah, Wisconsin, Wyoming. These states contain more than 2,999,999 farms and over 275,000,000 acres of improved lands. The bulletin continues:

"If one farmer in four in these states were to plant a three-acre patch and give it the care that could readily be bestowed upon so small a plot it would be unnecessary for us to pay foreign sugar. Two-thirds of 1 per cent of the improved land in this area is all that would be required to accomplish this result. More than that average lies idle, absolutely unused, every year. Any one of the states of Illinois, Iowa, Kansas, Missouri, Minnesota, Nebraska or Ohio could produce all this sugar and then have the beets occur only once in a ten-year rotation; several of the others could do it alone on a five-year rotation.

"From this table it can be seen that devoting the proposed 2,999,999 acres to sugar beet production would have an utterly magnificent effect in reducing the acreage of other crops. If they were grown in properly considered rotations with any of these crops except cotton and rice the effect of the beets in increasing the yield of the others would much more than counterbalance the acreage taken from the latter. All that is necessary, so far as acreage is concerned, in order to make us independent sugar producers is to bring the crop to a parity with flax or rye."

Here we have a plea from the highest authority for a greater acreage demand for more sugar beets; proof of the need for them; and that if we had them we would be freed from the "foreign domination" of the sugar market.

"We do not know much about the 'foreign domination' although we doubt whether the dominant influence in the present price will be found anywhere outside of New York City. But we do know the influence responsible for the tremendous reduction in the acreage of sugar beets in this country this year. That influence was and is the campaign made by the standard Republican party. As was the case with wool the people were told that the Democratic tariff policy would wreck the sugar beet industry; that the mills would all close and that the best growers would become poor.

"A lot of credulous farmers believed that wild talk; just as a lot of sheep growers believed the wool talk.

"A lot of farmers cut sugar beets out of their farms this year because they were scared by the Republican campaign done, just as a lot of sheep owners were scared into selling their sheep in an off market by the same wool dope.

"Result: These farmers who have sugar beets this fall are getting rich out of the said beets. Just as those sheep owners who had sense enough to hold on to their sheep or to buy more have grown rich in the most prosperous wool season on record.

"In our own Republican state platform of this year we are gravely assured that the Democratic tariff policy has 'ruined the sugar beet industry' in New Mexico and stopped 'development of a great area of our lands.'"

In the light of this authoritative statement, given out by the source of all reliable information on the sugar business, it does look as if the standard Republicans of New Mexico had gone out of their way to make fools of themselves and had then made a desperate effort to prove their foolishness.

Is it likely that any of the beet growers who quit growing beets and that any sheep owners who sold their sheep because of the Republican campaign done will appreciate more of that dope under present conditions?

**IN THE PROFESSION.**

**A**LBUQUERQUE. In moving for a handsome Y. M. C. A. building, is simply keeping its place in the procession of southern progress over in Oklahoma Y. M. C. A. building campaign are epidemic just now and it is interesting to note the results being obtained in cities in Albuquerque class.

Muskegon a few days ago started out with a mark of \$25,000 for its Y. M. C. A. home. In a campaign of five days the magnificent sum of \$25,000 was realized and the building will be under way within another month.

In ten days quite recently, Toledo one of the best of five to ten established a total of \$125,000, every dollar of which is to go into the Y. M. C. A. building.

Oklahoma City is just now perfecting the same kind of an organization that is being made here. For a whirlwind Y. M. C. A. campaign. The Oklahoma City branch propose to build a \$160,000 building and to raise the money therefor in ten days or less. It is a certainty safe for that Oklahoma City will be successful, and with the spirit now evident in this city it is an equally safe prophecy that Albuquerque will be fully as successful in its campaign in November as the Oklahoma cities have been.

**Corn Still King and a Sugar Prince.**

(From Leslie's.)

With sugar in the neighborhood of ten cents a pound, the United States is fortunate in having a substitute made from our greatest staple—corn. Over 50,000,000 bushels of corn were used last year in producing over 300,000,000 pounds of sugar, syrups and starch. Corn sugar is not so sweet as cane sugar but is equally nutritious, less disturbing to the digestive organs, and very much cheaper than cane or beet sugar. The protoplasm of the sugar industry of Europe by the great war will produce a world-wide scarcity of sugar, but with our enormous yield of corn to fall upon upon the United States can afford to export large quantities of cane sugar, and still have in corn sugar and corn syrup or glucose, as chemists call it, a reserve to help satisfy the native demand.

**Hernandez Proves Convincing Speaker.**

(From the Farmington Times-Herald.)

We are very glad that H. C. Hernandez visited this county. We are extremely sorry that he was not greeted with better audiences. Mr. Hernandez is a pleasant gentleman, who can convince the majority of an audience in a ten minute talk that he ought not to displace Ferguson as a representative of this state in congress.

**THE BIVOUC OF THE DEAD.**

The muffled drum's sad roll has beat  
 The soldier's last tattoo;  
 No more, no more, Life's parade shall meet  
 That brave and fallen foe,  
 On Paine's eternal ramping-ground  
 Their silent tents are spread,  
 And Glory guards, with solemn sound,  
 The bivouac of the dead.

**To Save Eyes.**

**N**OW IS THE TIME TO BUY A NORTH POLE ALL-METAL FREEZER, COLD, REFRESHING AND HEALTHFUL. DESSERTS FROZEN IN ONLY FOUR MINUTES.

Thousands of people suffer from eye troubles because they do not know what to do. They know some good home remedy for every other minor ailment, but none for their eye troubles. They neglect their eyes, because the trouble is not sufficient to drive them to an eye specialist, who would, anyway, charge them a heavy fee. As a last resort they go to an optician or to the five and ten-cent store, and often-times get glasses that they do not need, or which, after being used two or three months, do their eyes more injury than good. Here is a simple prescription that every one should use:

**5 grains Opton (1 tablet), 2 ounces Water.**

Use three or four times a day to bathe the eyes. This prescription and the simple Opton system keeps the eyes clean, sharpens the vision and quickly overcomes inflammation and irritation; weak, watery, overworked, tired eyes and other similar troubles are greatly benefited and oftentimes cured by its use. Many reports show that wearers of glasses have discarded them after a few weeks' use. It is good for the eyes and contains no ingredients which would injure the most sensitive eye of an infant or any drugless can fill this prescription promptly. Try it and know for once what real eye comfort is.

**THE TROUBLE** has been to find a member of the caste who cares enough for a drink like coffee to put the proper sentiment into it.

**COUNT SWEARINGEN**, says an authority, probably in Amsterdam, Dutch.

**NOTICE.**

Bids will be received until September 24th for the stock of merchandise located corner Fourth and Central, known as the Model Company. Address all bids to the First Savings Bank & Trust Co., Albuquerque, N. M., Trustee. Trustee reserves right to reject any or all bids.

**SOLOS**  
 by the Second Fiddle.

**I**T LOOKS as if Mr. B. Hernandez didn't intend to resign.

**C**HAIRMAN RALPH C. ELY says it gives him pleasure not to resign.

**D**ON'T ANYBODY in the Grand Old Party going to resign?

**O**H, VERY WELL!

**O**NE MORE effort to reform the old gang stated, what?

**W**ELL, WELL, reforming that crowd is a hard job. Reform, you might say, is long and time is fleeting.

**I**T MAY BE up to the Democrats and the voters to do the main part of the job after all.

**L**OOKS LIKE Ely had finally adopted that baby, the cruel baby farmers left on his door step.

**A**T THAT UP is just as easy to beat Ely and his infant as any other combination the stand patters can put up.

**A**ND AFTER ALL, Ely and his unfortunate, if innocent infant deserve a certain measure of sympathy.

**T**HEY'RE up against it plenty hard enough without parading the infant's disagreeable pedicure before the populace.

**T**HE SAID infant made a huller like a hired suit.

**A**ND UNDER our Russian law nobody can be blamed for handling an infant wrapped up in a libel suit with extreme care.

**E**LO BATTLE rages from OIRE to Meuse—headline. Or as a New Mexico newspaper would put it, from hell to breakfast.

**A**NY TIME New Mexico girls are put up to date; Hub! Hillsboro Advocate says Miss Pearl Latham made a flying trip to Silver City and back again this week.

**I**F COUNT VON BERNSTORFF keeps on talking his unofficial title will become Barnstorm.

**W**ITH THE OBVIOUS result that it eventually will become barnstorm.

**B**ERNSTORFF, Carden and Rusten Bey all show a disposition to get too easy. They're due to learn that it doesn't pay to have to all fired much to say.

**W**ELL, CHILDREN, who among us today can spell Przemysl?

The New York World spells it Przemysl.

The Kansas City Journal spells it Przemysl.

Mr. Noah Webster said it was to be spelled as in our original question. We're not disputing his authority or the war bulwaring either, which make a habit of spelling it seven different ways in the same dispatch.

The favorite usage of the linotype operator in spelling the name is: Przemyslaffix.

The favorite pronunciation given it in America is by sneezing it. Mr. Webster says it should be pronounced "Prze-mishl" with the accent upon the "Psh." At least he is so quoted. Since he is not here to defend himself, we will not make the statement definite. This discussion, while entirely academic, has a pertinent interest in connection with the events of the day as any well informed Austrian will tell you.

**T**he Piper's Son Up to Date.

Here, Home, the Kaiser's son  
 He learned to obey when he was young,  
 And all the orders that he got  
 Were to march bravely and get shot.

**O**ver the hills and a great way off  
 The Allies bless Hans' head piece off.

**T**HE EFFECT of the war on Grand Opera is serious, but for the grand opera demands of most of us it will prove beneficial. It will allow Caruso much more time to slug into the sopranos.

**M**OST OF US take our grand opera canned, whether we like it best that way or not.

**M**OST OF US do.

**A** MAN IN MONETT, Missouri has just been informed that he is heir to an estate of 150,000 in Germany. But he doesn't know whether the property is at present negotiable.

**H**ED probably have trouble getting far with it at the Missouri bank.

**A**T THE RATE of a thousand killed per day, there will be quite a lot of inheritance law business in Germany soon.

**T**O SAY nothing of England.

**O**NE OF THE most popular of recent sentimental ballads will be sung in the Elys show tonight. It is entitled: "Mother the Sugar Bock is empty and Dad must take his coffee straight."

**T**HE TROUBLE has been to find a member of the caste who cares enough for a drink like coffee to put the proper sentiment into it.

**C**OUNT SWEARINGEN, says an authority, probably in Amsterdam, Dutch.

**N**OTICE.

**Great Trials of History**  
**THE TRIAL OF COURVOISIER**

**A** TRIAL that created an unusual amount of excitement in England in 1840, was that of Francois Benjamin Courvoisier for the murder of Lord William Russell, a son of the Marquis of Tavistock and Lady Elizabeth Koppel, daughter of the second Earl of Albemarle. The family seems to have been unfortunately for Lord William's father was killed by a fall from his horse, and his mother died of grief soon after, a martyr to her affection for her deceased lord.

Courvoisier was a native of Switzerland, the son of a farmer. At the age of 20 he went to England, where for several years he acted as footman, and finally entered the service of Lord Russell, where he was then, on the morning of May 6, 1840, his lordship was found murdered in his bed, under circumstances that led to the formal trial of Courvoisier on trial for the crime.

The trial was commenced at the central criminal court, Old Bailey, on the morning of Thursday, June 17, 1840, and terminated on Saturday evening. The counsel for the prosecution, Mr. Adolphus, stated to the jury that the deceased nobleman was 22 years of age, and that his household consisted of two female servants and a valet, who lived in the house, and a coachman and groom, who lived on the outside. He said that the day preceding the murder the victim rose at his usual hour of 9, went out, and spent his morning as usual, leaving several messages with the prisoner. His lordship returned to his usual and shortly afterwards retired to bed. The next morning he was found dead.

The learned counsel then detailed the circumstances of the prisoner having forgotten to send his lordship's carriage to Brooke's club house, as he had been told to do. He next called the attention of the jury to how things were distributed about the place to indicate that robbers had committed the crime. The next suspicious circumstance was the broken state of the lock door, to which the prisoner had pointed as the place where the thief entered.

Other damning evidence was the absence of the lord's watch, which was several days afterwards found under suspicious circumstances, as was a 16-pound note which belonged to the murdered man, and which was found mysteriously concealed. It was brought at the trial that the prisoner had complained of his place and said that he was sorry that he had accepted the position, although he had been an employe of Lord Russell for only five weeks.

For a considerable time of the trial it looked as if the prisoner was to be acquitted, but a new and important piece of testimony was forthcoming, that of Mrs. Polaine, the wife of a Frenchman, who kept a place of entertainment in Leicester place, London, who stated that Courvoisier brought to her house for safe keeping a quantity of plate, which was proved to be the property of Lord William Russell.

Upon hearing of this testimony the prisoner confessed his guilt. Mr. Phillips, the counsel for the prisoner, in spite of the fact that he knew of the confession, which was not known by the jury and only to a very few persons, delivered a most brilliant and convincing speech in defense of the accused in which he pointed out clearly that they had no proof of the prisoner's guilt, and that it was a case of circumstances alone on which the witnesses against the accused had given testimony.

The effect of this speech upon the jury—who had practically been convinced of the guilt of the prisoner—was to make them hesitate on their verdict for a full hour and a half. The influence of the learned gentleman's address was very visible on almost every person in the court.

Several witnesses were then called for the defense, who testified to the prisoner's good character. This having closed the evidence, the court adjourned for a quarter of an hour, and on the learned judge resuming their seats, Lord Chief Justice Tindal proceeded to sum up the evidence, which he did to great length.

The jury returned a verdict of guilty. On Sunday, July 5, 1840, Rev. Mr. Carver, the ordinary of Newgate, preached what was called the condemned sermon in the chapel of Newgate. The text was: "Job, chapter 34.

**A Quarter-Century Ago Today in New Mexico.**

(Notes about the territorial fair opening from the Daily Citizen of September 24, 1889.)

While nominally the opening day of the territorial fair, Monday is really but a day of preparatory work. Everybody has been busy at the fair grounds today receiving, unpacking and displaying exhibits.

President Gro. L. Brooks and his able corps of assistants have been busy all day receiving exhibits, arranging space and keeping exhibitors good natured.

In Floral hall the general face of Col. Donovan gives assurance that everything will move smoothly.

Mrs. H. H. Whiting is in charge of the fruit exhibit.

Tomorrow at 1:30 the formal opening will occur.

**Acute Articular Rheumatism**

The exact cause of rheumatism is unknown, though it is generally believed to be due to an excess of uric acid in the blood. It may be also said with equal truth that no remedy has been found which is a specific in all cases. In fact the literature of rheumatism shows that there are but few drugs which have not been given a trial. In the hands of one observer we find that a certain drug has been used with the most satisfactory results; others have found the same remedy to be a great disappointment. All physicians however agree that every method of treatment tended to relieve the pain and quiet the nervous system and Dr. W. S. Schutte expresses the opinion of thousands of practitioners who say that Anti-Kali Tablets should be given preference over all other remedies for the relief of the pain in all forms of rheumatism. These tablets can be procured in any quantity. They are not unobtainable in A. K. Tablets, neuritis and all pain. Ask for A. K. Tablets.

**TO Save Eyes**

Is the Object of This Free Prescription—Try It if Your Eyes Give You Trouble.

Thousands of people suffer from eye troubles because they do not know what to do. They know some good home remedy for every other minor ailment, but none for their eye troubles. They neglect their eyes, because the trouble is not sufficient to drive them to an eye specialist, who would, anyway, charge them a heavy fee. As a last resort they go to an optician or to the five and ten-cent store, and often-times get glasses that they do not need, or which, after being used two or three months, do their eyes more injury than good. Here is a simple prescription that every one should use:

**5 grains Opton (1 tablet), 2 ounces Water.**

Use three or four times a day to bathe the eyes. This prescription and the simple Opton system keeps the eyes clean, sharpens the vision and quickly overcomes inflammation and irritation; weak, watery, overworked, tired eyes and other similar troubles are greatly benefited and oftentimes cured by its use. Many reports show that wearers of glasses have discarded them after a few weeks' use. It is good for the eyes and contains no ingredients which would injure the most sensitive eye of an infant or any drugless can fill this prescription promptly. Try it and know for once what real eye comfort is.

ing will occur. Governor Ross, who is in the city, will deliver the address from the grand stand.

June Moore is the presiding genius at the ticket office.

The W. C. T. U. are furnishing free ice water at the fair grounds as usual.

Tortilla's carter photo has been arranged in its usual easy manner. Uncle Fred Helwig is an artist.

Jack Rudolph has his stand decorated in American flags and in his exuberant patriotism even has red, white and blue tennise for sale.

John S. Delano, partner of Col. J. W. Iyer of Baton is here with a cartload of fine Jersey cows which are for sale.

Albuquerque gives a welcome

To all those who come to share in the festive sports and scenes of the Territorial fair.

Herald want. 3 lines—3 times—3 dimes.

Phone 3, Red Barn, 311 W. Copper. For first-class hacks and carriages. W. L. Trimble & Co.

**Acute Articular Rheumatism**

The exact cause of rheumatism is unknown, though it is generally believed to be due to an excess of uric acid in the blood. It may be also said with equal truth that no remedy has been found which is a specific in all cases. In fact the literature of rheumatism shows that there are but few drugs which have not been given a trial. In the hands of one observer we find that a certain drug has been used with the most satisfactory results; others have found the same remedy to be a great disappointment. All physicians however agree that every method of treatment tended to relieve the pain and quiet the nervous system and Dr. W. S. Schutte expresses the opinion of thousands of practitioners who say that Anti-Kali Tablets should be given preference over all other remedies for the relief of the pain in all forms of rheumatism. These tablets can be procured in any quantity. They are not unobtainable in A. K. Tablets, neuritis and all pain. Ask for A. K. Tablets.
