A Fifth Avenue Tailor's Service at a National Purveyor's Price

"THE most sensational merchandising success of the decade!" That's what observant business men are saying these days about our "Direct from the Wholesale Plant" service for New Yorkers.

Boiling it all down into one sentence, this local service of ours means the privilege of securing the finest custom-tailored clothes at less than ready-made prices.

But isn't merely because we're upstairs - and free from ground-floor overhead That helps, of course. But the greater economies come from the fact that ours is the largest wholesale tailoring house in the world - with the largest buying power, the largest sales output

In rendering a retail service here at home - in our own headquarters-city - we can easily afford to deliver Fifth Avenue quality at a National Purveyor's profit margin.

Is it any marvel, then, that regiments of smart clothes-buyers are trooping here daily to do their clothes-shopping - despite the walk up one flight of stairs?

It would be a reflection on the gumption and alertness of the community, if they didn't come!

Advertisement for The Royal Tailors, Chicago and New York, featuring a large illustration of a man in a suit and text about their services and location.
