CURB ISSUES HAVE WEAK TONE STILL

Dealings Are on a Considerably Less Active Scale—Independent Oils Lively.

With dealings on a considerably less active scale prices for leading curb stocks again displayed a weak tone yesterday. The opening was steady, but when supporting orders were taken care of a weak tone was evident once more. With a few exceptions no wide fluctuations were recorded as in recent previous sessions. Heaviest activity again occurred in the independent oils.

In sympathy with weakness on the Stock Exchange in their parent company Middle States Oil, Dominion Oil and Texas Chief sold to new low records on heavy trading, but rallied substantially before the close. Simms Petroleum moved in a narrow manner, while White Oil and Gilliland lost about two points. Metex Oil, which was introduced a few days ago, however, was in good demand and sold to a new high.

General Asphalt weakened in the afternoon and fell about seven points. General Motors was weak, but little change of importance was noted in the other industrials. Initial trading started in American Foreign Trading, Western States rights and Tobacco Products rights.

Mining stocks were dull, but there was a good demand for Prince Consolidated, which changed hands at its high record price.

Bonds were more active but irregular.

Total sales and range of prices follow:
