

BROCK IS OUT OF RAILROAD

Rumor Says Also that Frank Keith Has Succeeded Him as President of the Tonopah Mining Company.

The news from the far East is that John W. Brock is out of the presidency of the Tonopah and Goldfield railroad. There have been rumors to this effect for the past several days, but nothing has been received here that would tend to confirm it. At the railroad office nothing has been received up to last night to confirm or deny the story.

There has been nothing in the dispatches touching upon the situation, although there were meetings being held of the Tonopah Mining Company, the Belmont, and of the directors of the Tonopah and Goldfield, and the Bullfrog roads up to Monday afternoon.

A copy of the Philadelphia Press was received here yesterday, in which the story was told of the deposing of Brock, and the election of C. K. Lord as president of the Tonopah and Goldfield road. Mr. Brock was not the president of the Bullfrog and Goldfield, that position being held by his son, Arthur. But according to the plans, Mr. Lord will be president of both roads for the reason that they are to be merged, with a capitalization of \$10,000,000.

The reason that there was no dividend for the stockholders of the Tonopah and Goldfield road, it was announced to the stockholders, was because there were \$555,000 paid out for new equipment. The Tonopah Mining Company owns 65 per cent of the road.

General Manager Frank A. Keith of the Tonopah Mining Company and also of the Belmont Mining Company, was present at the meeting of the directors of both companies, and it is said that there was some objection on the part of the directors of the big company to his guiding the destinies of the Belmont. The directors of the Tonopah Mining Company are said to have expressed the opinion that their interests would be better subserved if Mr. Keith were to forego the management of the Belmont. It was not learned what action, if any, was taken on this matter.

There is another rumor afloat here, which cannot be run to earth, to the effect that Mr. Keith has succeeded Mr. Brock as president of the Tonopah Mining Company. Mr. Keith stated to the directors of the Tonopah Mining Company that the big mine had never looked better in its history, and that everything was in far better shape than a year ago at this time. Oil is being used instead of coal, he said, and the power plant is producing 700 horsepower. The expense of fuel has been much reduced.

ST JOHN WILL NOT BE A MARTYR

GOLDFIELD, Nov. 6.—Vincent St John, the anarchist, who was shot by Paddy Mullany last night, is resting in the hospital as comfortably as he ever rested, and his assailant is resting just as comfortably in jail.

The friends of the would-be slayer of St John rallied to his assistance this morning, but he would not accept aid. There is no question as to his bail being furnished, no matter what the amount might be. The story now is that St John threatened the life of Mullany, and made an attempt to draw his weapon, but that Paddy was too quick for him, and started his fusillade with such suddenness that St John went flying down the street, with lead in his arm instead of his feet.

The other men who were shot by the wild bullets from Mullany's gun are said to be on a fair way to recovery.

LOCAL STOCK MARKET STRONG

The stock market in San Francisco showed a decided improvement in tone, and there was evidence of less desire to flood the market with shares. The Tonopah securities were especially strong, with the exception of Tonopah Mining Company, which showed the effect of the wrangling among the directors in Philadelphia, and hung about the old prices.

The Goldfield shares also showed signs of improvement. The upward movement was no doubt caused by the result of the election in San Francisco, and by the continued brightness in the financial world of New York. Reports of the increase of the pour of gold into the metropolis from abroad were reaching San Francisco all day and the effect on the market was immediate and solid in appearance.

Eastern Market Firm Stocks Closely Held

(By Associated Press.)
NEW YORK, Nov. 6.—The small volume of transactions in stocks today was an index of how far the financial conditions still hamper the conduct of operations in the market; but the strong upward tendency of prices was convincing evidence of returning confidence in the values of securities. Brokers on the floor of the stock exchange summed up the situation by saying that stocks were scarce. This was shown not only in the diminished pressure to sell but continued to be manifest in the execution of big orders when prices were bid up.
Copper was lower in the English market, with spot quoted at 63 1/2 s 6d, and futures at 63s. Locally the market was dull and unchanged. Lead was unchanged at 18s in London, but weak locally, quotations ranging from \$4.50 to \$4.75.

BETTER PAY FOR POSTOFFICE HELP

(By Associated Press.)
WASHINGTON, Nov. 6.—First Assistant Postmaster General Hitchcock returned today from an extended trip to the West and gave out a statement regarding his investigations of the conditions prevailing in the service. He said that considerable difficulty had been experienced for some time in retaining the services of good men in postoffices. He found that the prices of labor are high in the West and that living expenses are two-fold higher, but post-office employees get the same rate of wages as in the East.

He spoke of instances where the postmaster paid out part of his own salary to maintain the offices and cited among the instances that of Postmaster Collins of Goldfield, who has paid out more than his salary to keep the office going. There is no way to reimburse him except by a special act of Congress. He says that he will advocate to Congress an amendment to the graded salary law which will obviate the difficulty.
