### Hold Meeting and Vote Almost Unanimously to Refuse Acceptance of Clearing House Certificates.

(Special to the Bonanza.)  
GOLDFIELD, Nov. 16.—There was a meeting of the miners' union here this afternoon to consider the payment of the miners' wages in clearing house certificates, as it has been decided to do by the Consolidated Mines company. There was an almost unanimous sentiment against anything of the kind, the men declaring that they would accept nothing but cash.  
A committee, consisting of Messrs. Gallagher, Moore and Gilbert was appointed to confer with the mine owners and bankers. The proposition that the miners wish to submit is that the checks issued from the mines be promptly paid in cash and not in certificates of the clearing house or any other kind. It was the sentiment of the meeting that the smelters should pay cash for the ore that is shipped to them, instead of holding it back for two or three months. The committee was empowered to take up this matter with the mine owners. Their plan is that the smelters shall return to the mine the receipts in cash for the shipments, and that the miners shall receive the first money from these returns. The committee will report at the meeting of the miners' union on next Tuesday night. The conference will take place tomorrow afternoon or on Monday.

CLARINDA, Iowa, Nov. 16.—William P. Hepburn, chairman of the house committee on inter-state and foreign commerce, left for Washington today. He stated before leaving that he considered it extremely probable that there would be legislation enacted this winter to secure the regulation of issues of stocks and bonds of corporations doing inter-state business; he also regards it as desirable that the taxing power of the government be used to prevent gambling in railroad stocks by taxing all sales of which delivery is not made within a reasonable time.

### PHELAN BORROWS FROM EQUITABLE

SAN FRANCISCO, Nov. 16.—That eastern capital is satisfied with San Francisco for a field of investment is evidenced by a deed of trust for \$2,000,000, given by the Phelan Improvement company to the Mercantile Trust company of San Francisco as trustee for the Equitable Assurance Society of the United States.  
The money is advanced for the construction of the eleven-story class "A" office building now being erected on the Phelan lot at the corner of O'Farrell and Market streets, which is pledged as security for the loan. The money is to be advanced as the work progresses. Interest at the rate of 6 per cent is to be paid on all money advanced during construction and 5 1/2 per cent on money advanced after completion of the building, the borrower to pay the taxes. The mortgage is due January 1, 1911.

### THE MARKET WAS VERY DULL

NEW YORK, Nov. 16.—The general tone in today's stock market was inclined to hopefulness, but the effect on prices was marred by the resumption of some forced liquidation in a limited group of stocks which had a sympathetic effect on the whole list. The Hill stocks and Atchison were notably affected by this selling and made wide declines on comparatively light transactions. When this was completed there was a vigorous recovery. The market was dull.

## MESSAGE IS ABOUT FINISHED

### PRESIDENT, AMONG OTHER MEASURES, ADVOCATES POSTAL SAVINGS BANKS.

WASHINGTON, Nov. 16.—A special to the San Francisco Chronicle says: President Roosevelt has about got his message to congress ready, and persons who have had friendly chats with him recently say that he has very freely discussed with them topics which he will, without doubt, treat of in that important state document.  
The recent financial disturbances were given attention and will be used to point his belief that an emergency taxable currency should be authorized, based on assets. The president will advocate federal license for all inter-state corporations with aggregate business exceeding certain limits. It will be urged that the powers of the inter-state commerce commission be extended to supervision of stock and bond issues.  
Amendment of the Sherman anti-trust law is favored, so as to forbid such combinations in restraint of trade only as shall be pronounced unreasonable by the courts. A graduate inheritance tax will be advocated and the postal savings bank will get a good word, also the establishment of a more effective public health service, if not a new department of public health. An income tax will be urged. The revision of the Philippine tariff bill is considered essential for the prosperity of the islands, the president believing that a better market should be created for their products.  
The passage of a modified shipping bill is another thing that is pretty sure to be urged in the message. The extension of the parcels post will be given friendly attention, and there are other things scheduled for review, but the pressing topics in the president's mind are currency reforms, modification of the Sherman law, shipping bill and Philippine tariff legislation.

### WILL PROCEED AGAINST HARRIMAN

(By Associated Press.)  
WASHINGTON, Nov. 16.—In spite of the insistence in certain quarters that it is responsible for the flurry in Wall street, with echoes in other parts of the country, the administration is proceeding with its plans, according to high authorities here, for prosecution of the Harriman roads for alleged infringements of the law. But before this course is taken it is desired to conclude the hearing now under way in New York, and make Harriman answer certain questions.  
It is understood that Commissioner Lane has not yet made any report on the rebating recently indulged in by the Southern Pacific. The first attack in the west will probably be against the "community of interest" between the Harriman roads and the Santa Fe, which, if proved, would constitute a violation of the Sherman anti-trust law.
