CHURCH SERVICES.

St Theresa's Church—Morning mass and evening vespers at the usual hours
 Presbyterian Church—Services both morning and evening. Sunday School at 12:15.
 Episcopal Church—Full morning service at 11 A. M.; praise service at 6 P. M. Sunday School at 12:30. Prof. Owens will preside at the organ.
 Methodist Church—Preaching by the Rev. Mr. Anderson, of the A. M. E. Church, Red Bluff, Cal., at 11 A. M. Sunday School at 2 P. M. Praise and preaching service at 7:30 P. M. All are invited.

Mackay for Governor.

The Silver State believes that John Mackay is making a trip around the world so as to be elected the next Governor of Nevada. Grant went around the world to go in training for his third term nomination. Fair did the same when he had his eye on the Senatorship. It is now urged that Mackay is on the same lay. The Democrats won by such a majority last year that John Mackay would have to make a sack fight for the persimmons.

Day before yesterday Mr. Hersee, of the Soldene troupe committed suicide at Clear Creek, on the C. P. R. R. He was the husband of Duggan, the kicker and he doubtless wanted to let her see how he could kick—the bucket.

Graham, the levitating Comstock attorney, has the cheek to write to Joe Beggs, one of his victims who chased him over the grade, that he (Beggs) was trying to extort money from him.

Seventeen carloads of people will arrive here to-day from the Comstock to attend the picnic.

Attention is called to the large assortment of selected reading matter on the first page.

The Ornithological Researches of W. E. Bryant.

A Magnificent Collection of Sagebrush Songsters.

For a couple of months past W. E. Bryant, a professional taxidermist, has been making a collection of the birds of the State for a gentleman in Oakland. His headquarters during his stay in Carson were at Hub Parker's, and his operating room over the fish-hatchery. Here he stuffed his birds and prepared them for shipment, and having finished his labors, left for San Francisco a few days ago.

THE BIRD MORGUE.

Last week an APPEAL reporter visited the room where the birds were being stuffed. Mr. Bryant was seated at a table with a dozen birds lying before him which he had slaughtered a few hours before with No. 9 shot. They lay in a row with their toes turned up in air. The table looked like a morgue after a steamboat explosion. A sombre crow headed the lot, then came a number of gaudy-plumed singing birds, and a little brown wren lay at the end of the line. It was sad to think of how much beauty and music had been knocked into a cocked hat by this slaughter of feathered innocence. About a dozen boxes of stuffed birds lay about the room. The corpses were laid out on pieces of cotton batting. The operation of stuffing the birds was quite interesting. The operator began by slitting the skin down the breast. He severed the neck under the skin with a pair of scissors, and then stripped the skin, retaining the legs from the knee joint with the claws. During the skinning process he showered the birds with corn meal to absorb the blood and moisture and prevent the skin from adhering again to the carcass. After the skin was taken off, the inside was sprinkled with arsenic to preserve it. After the arsenic was absorbed the next step was to stuff it with hair, such as is used in mattresses. The stuffed skin is then laid away in a box with the name of the bird printed on its breast. The birds are packed in cotton, about twenty-five in a box, and shipped by express. Mr. Bryant was able to prepare about five birds an hour. A tough owl requires a longer time.

AN EGG COLLECTION.

He also made a collection of eggs, varying in size from a pea to those of wild fowls as large as a hen's egg. They were as varied and beautiful in color as the birds themselves, being brown, purple, pink and golden. Some were a delicate slate color, flecked with red, which looked like drops of blood, and some were mottled with gold, blue and green. Many of the eggs were in the nests, which in turn were fastened to the branches just as the had been built. The eggs are preserved by making a small hole in each end and blowing out the contents. The collection had twenty varieties of nests, all having a distinctive feature in the building and made of different materials. Some are but a few loose twigs, some hang like a pocket like long-necked vases. One had two long entrances, one on each side, running under the limb. In all Mr. Bryant had 300 eggs and 250 birds.

VARIETIES.

The following is a list of the birds of Nevada, as known by their common names:

Burrowing owl, Harris woodpecker, Lewis woodpecker, red-shafted flicker, belted kingfisher, short-legged pewee, audubon's warbler, Maryland yellow throat, green black-cap flycatcher, Louisiana tanager, bank swallow, loggerhead shrike, mountain mocking bird, rock wren, long-billed marsh wren, slender-billed nuthatch, pygmy nuthatch, skylark, Gambel's finch, Bell's finch, Oregon snowbird, black-headed grosbeak, green-tailed finch, red-shouldered blackbird, yellow-headed blackbird, Bullock's oriole, Clark's crow, magpie, Steller's jay, common dove, night heron, American avocet, Western grabe, Western warbling vireo.

A Chinawoman dressed in pants and carrying a sunshade was quite conspicuous on Carson street last evening.

The Heated Belt Being Passed Through and Cooler Levels Encountered.

There are many practical mining experts who firmly believe that the barren belt of the Comstock has been passed through, and that another bonanza-bearing belt is about to be encountered. When John Mackay was asked if he expected to find ore in the 2600 level of the Sierra Nevada, he replied:

"If we don't find it there, we will on the three thousand."

"If that fails, what then?"

"The four thousand," was the quick response.

Two barren belts of the ledge were passed through, and between these belts was found—the big paying ore bodies.

There is every reason to believe that a productive belt is about to be encountered. On this subject the Eureka Leader has the following:

Almost from the surface to the 1000 foot level there was a heavy influx of water. Below the 1000 foot level for about another thousand feet the lode is as dry as a powder house. In this portion of the ledge between the 1000 and 2000 levels have been found the immensely rich bonanzas in the Crown Point, Belcher, Con. Virginia and California. In the neighborhood of the 2000 level another water belt began to be encountered, and both the water and the temperature of the levels commenced increasing in heat. This increase in heat grew as greater depth was attained, until it was almost impossible to do any effective work in the lower levels. It took four men to do one man's work, and it is becoming evident that if with depth the heat increases, it is only a question of a very short time before the Comstock will have to be abandoned. There is a ray of hope, however, in this particular at least, breaking on the Comstock horizon. In the Ophir they have attained a depth of 2,800, and on this level the temperature is cooling decidedly, the flow of water is diminishing, and what there is, instead of being of scalding heat, is about luke warm. In other words, while the water encountered from the 2300 to the 2500 levels of the Ophir stands at from 130 to 140 degrees Fahrenheit, on the 2800 level it stands at but 90 degrees. So far this change in the temperature of the levels and the flow and heat of the water has only been encountered at the one point in the Ophir mine. Should it be found to obtain in the other mines when the same depth is attained, it would prove conclusively that the second water belt of the Comstock had been passed through. Not only that, it would show that the formation, where by the chemical action of the rock the metal was held in solution, so to speak, and the temperature and water was brought to an intense heat, had been passed through, and that there is a reasonable show of encountering paying deposits of ore in the next 1,000 feet in depth. The reason for this belief is because in the heated levels, from the 2000 down, the metal appears to be distributed for the whole width of the vein, from 300 to 500 feet. The porphyry, the clay casings, in fact, the gangue of the vein give about the same assays as any portion of the vein itself. In the dry levels above, where the bonanzas were found, the gangue of the vein was entirely barren, and the metal was concentrated in the ledge matter to a width of from 25 to 100 feet, instead of permeating the whole width of the vein.

Healthiest in the World.

A few days ago Mr. Sam Wright received a lot of mortality statistics which had been very carefully prepared so as to cover nearly all the ground occupied by the United States. Out of 23,000 incorporated cities it estimated that the lowest death rate was 70 to each 1,000 inhabitants. Mr. Wright, who has kept a careful record of the Carson death rate for over ten years, immediately went to his books, compared them with the Coroner's record and estimates that the Carson death rate averaged but 12 to each 1,000. This makes Carson the healthiest city in the world by a big percentage.

Grand Jury.

Following are the names of the gentlemen drawn as Grand Jurors to meet on Monday next at 10 o'clock in the District Court-room: C. C. Atherton, J. R. Bigler, H. L. Tiekner, Peter Cavanaugh, Jr., J. M. Benton, G. T. Davis, Jacob Klein, William Vance, Robert Logan, T. J. Edwards, J. L. Beam, D. H. Brown, A. J. Lockwood, Thomas Beer, I. Lebo, E. Circe, A. D. Treadway, G. W. Kitzmeyer, W. D. Torreyson, J. G. Fox, D. A. Bender, J. Q. A. Moore.

The Race Track.

The new race track at Treadway's Park is now nearly finished and in fine condition for speeding horses. It has been built at an expense of about \$500, while the old track, which is no better, cost in the neighborhood of \$5,000

His Industry and Good Traits Vindicated.

The press frequently makes merry over the ignorance and assurance of the "Intelligent compositor," using the word "intelligent" in a strictly sarcastic sense. The compositor aforesaid is generally a hard working, conscientious individual on whom all the typographical, grammatical and orthographical sins of the paper are visited. By general consent he has become the common scape goat and has learned to shoulder his load lightly and laugh at the abuse showered upon him. When an editor or a reporter makes a blunder, through sheer carelessness or perhaps ignorance and has been taken to task for it, he simply looks mad and remarks: "That d— blockhead printer; he ought to be slinging sand on a railroad." So the poor innocent devil toiling at the case and wearing his fingers out picking up type gets the blame and the real author of the blunder loses none of his reputation for wisdom. The writer once had occasion to take issue with a compositor on an historical question, the printer having taken the liberty of changing a date.

"Perhaps you had better quit the case and edit the paper."

"I'd like to but you see I couldn't live on your salary."

So we dropped the conversation hastily, spent a few minutes hunting up authorities and found that the compositor was correct.

The editor never loses a chance to publicly berate the compositor when he slips, adding insult to injury by compelling him to set up the abuse he is receiving. But writers never make a parade of the fact when a printer calls their attention to some nice point of grammar or obliterates a glaring case of tautology in the manuscript. If it wasn't for some good spellers at the case this paper would look like a howling wilderness at times. Many a time a writer is compelled to lean on a compositor like a cripple on a crutch, and many a man would have been a public laughing stock did not observant typo drop on some of his blunders in the nick of time and snatch his reputation for good writing from the very brink of the abyss. After all of these faithful services, let us all overlook his slouched attire, his fondles for bad whisky, dissolute company and his strange oaths, and only curse his memory when he leaves out a live advertisement or mangles our original poetry.

Glass Ball Shooting.

The Carson Glass Ball Shooting Club shot one match yesterday at Treadway's, of 30 balls each, at eighteen yards rise, using Monarch traps, with the following results:

- C. D. Meder.....26 balls
- G. W. Richards.....27 "
- J. R. King.....25 "
- T. R. Hofer.....22 "
- G. H. Davis.....20 "
- H. G. Parker.....17 "

Water for the Cemetery.

Yesterday afternoon a committee from the Mexican Veterans and Grand Army of the Republic met the State Prison Commissioners, and the latter agreed to furnish them, on June 20th, with the necessary convict labor to bring water from the mountains into the cemetery. The water will be in the cemetery inside of sixty days.

Vucanovich.

When the fruit season opens in California it also makes its appearance in Carson through the medium of the wide awake Vucanovich, who places on the Carson market every conceivable thing that the palate craves, from a strawberry to a pine apple. In the way of nuts, candies and fresh vegetables he is in the front rank as usual. His prices are low and his wares fresh. my3-1m

Auction.

The furniture in the lodging house in Rosser's stone building, opposite Arlington Hotel, will be sold on June 9th, at 10 P. M., consisting of bedroom sets, bedding, carpets, stoves, etc., to be sold without reserve. Terms cash. GEORGE B. WEBB, Auctioneer.

Tickets for the Pioneers.

Tickets for the Pioneer picnic, which comes off on Sunday next, can be had at Fox's, Cagwin & Noteware's, the Ormsby, and the Arlington houses. By purchasing at once holders can save much trouble at the gate. td.

Good Mineral Water.

The Glen Alpine Mineral Water sold by Doc Benton is now commanding a ready sale wherever it is introduced, and physicians are prescribing it for their patients in cases of irregularities of the liver, bowels and kidneys. tf

GRAND FASHIONABLE EVENT.
 Thursday Evening, June 9th,
 Appearance of the Popular Tragedian,
THOMAS W. KEENE,
 Whose success the past season has been pronounced by press and public phenomena.
 Mr. Keene will be supported by a specially selected company under the management of
MR. W. R. HAYDEN.
 Shakespeare's Grand Historical Tragedy in Six Acts,
RICHARD III,
 —OR THE—
Battle of Bosworth Field.
 Gloster (Afterwards King Richard III.)...T. W. KEENE.
