

TRANSFER

Of Property to the N. O. T. Company Being Completed. Mr. Thomas F. Walsh, late president of the A. & C. F. R. T. company, is at New York assisting in the transfer of the Rapid Transit property to the N. O. T. company.

TO CURE THE GRIP IN TWO DAYS

Laexative Bromo-Quinine removes the cause The little folks can make money by watching next Saturday's Democrat.

RAILROAD TIES

Fifty Thousand Have Been Ordered by N. O. T. Company. The N. O. T. company has ordered 50,000 railroad ties, to be used in extending and repairing the company's lines.

Photographs That Please

Wade's little 10 centers, 207 E. Market st., near Public Library.

Will be Retained.

An official of the N. O. T. company informed a reporter for the Daily Democrat, Monday morning, that all conductors and motormen of the Rapid Transit company will be retained by the N. O. T. company when it acquires the ownership of the Rapid Transit lines.

TO CURE A COLD IN ONE DAY

Take Laexative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

In Need of Aid.

The Home of the Good Shepherd in Cleveland, to which many a wayward Akron girl has been sent, is in financial straits. Business men and others will help raise money to meet immediate needs.

PLANS

Being Prepared For Chapel—An Akron Architect. Architect W. P. Ginter is preparing plans for a chapel for the Sisters of St. Mary of the Springs, Ladies' Literary Academy, Shepard, O. The structure will cost \$10,000.

Watch the Democrat next Saturday—there's money in it for you.

Western Rates Reduced.

Greatly reduced one-way rates will be in effect from Chicago via the Wisconsin Central Railway to points in Minnesota, North Dakota, Montana, Idaho, Oregon, Washington and British Columbia each Tuesday, commencing February 27th and continuing until April 30th.

For detailed information inquire of nearest ticket agent, or address: T. D. Campbell, D. P. A., 42 Carey building, Cincinnati, O. C. E. Johnson, D. P. A., 621 Park building, Pittsburgh, Pa., or Jas. C. Pond, general passenger agent, Milwaukee, Wis.

Not Strong Enough.

At one of the clubs the other day two members were arguing about will power. The conceited man, who was in the habit of boring all present with his pointless tales, said that his will was stronger than his friend's.

"You are wrong there," said the quiet man, "and I will prove it in this way: You go and stand in that corner, and I will wait you to come out of it. You will against me, and I bet you that I will have you from that corner before I have commanded you a second time." The smart one took the bet and put himself in the corner. The quiet man said in a commanding voice: "Come out of that corner!"

The other grinned and shook his head. The quiet man sat down and looked at him steadily. Five minutes passed, and the man of will said, with a sneer: "Hadin't you better give it up? I don't feel any influence at all, and I can't stand here all the evening." "There is no hurry," said the quiet man, "and I have a very comfortable seat. There is no time limit except that you are to come out before I ask you twice, and as I don't intend to ask you again until this day week I think you will feel the influence before then."

The smart one came out looking very foolish.—London King.

Daughters of the American Revolution

When the Daughters of the American Revolution, the patriotic descendants of hard fighting Revolutionary sires, meet at their annual continental congress in Washington during the middle of February, they will probably prove their ancestry by indulging in war. It will be a bloodless struggle and conducted according to the rules of conduct.

Photo by MacDonald, Albany. MRS. DANIEL MANNING.

At the highest society, but the battle will nevertheless be bitterly waged. No less exalted a position than the presidency of the august body is at stake, and it is a prize worth striving for.

The membership of the Daughters has increased wonderfully since the inception of the organization on Oct. 11, 1890. Its present membership is about 33,000. Each division of the society is called a "chapter" and the head of each chapter is known as the "regent." There are more than 500 chapters in the United States, and chapter regents have been appointed for England and Canada.

Any woman may be eligible to membership in the Daughters of the American Revolution who is of the age of 18 years and who is descended from an ancestor who, "with unflinching loyalty,"

LEADING CANDIDATES FOR THE PRESIDENCY OF THE SOCIETY

en, who are proud of their membership. The present contest in the Daughters of the American Revolution is caused by the question of the advisability of centralizing more strongly the organization or leaving to the individual chapters great freedom of action. Naturally, the two policies have brought into the field candidates favoring either side.

Photo by Alme Dupont, New York. MRS. DANIEL A. ROEBELING.

ling is a member of the famous family of engineers and bridge builders. She is the vice president of Sorosis, the "mother of women's clubs."

The chief opponent to Mrs. Roebeling is Mrs. Donald McLean, the regent of the New York City chapter. She is probably the most popular woman in the D. A. R. and has an immense following. She is, however, an impulsive southern woman and has gained heavy enemies as well as devoted friends.

Another invention of Professor Gates, made some years ago, is a remarkably ingenious and incredibly powerful microscope possessing the power of magnifying some millions of times. It is, however, very expensive, costing, according to its inventor, about \$1,500 to construct it.

rendered material aid to the cause of Independence as a recognized patriot, as soldier or sailor or as a civil officer in one of the several colonies or states of the United colonies or states," provided that the applicant shall be acceptable to the society.

It has hitherto been the custom of the D. A. R. to honor with the presidency members whose husbands have been famous or prominent Americans. The first president was the first wife of ex-President Benjamin Harrison.

Photo by Clinesmith, Washington. MRS. C. W. FAIRBANKS.

TO BUILD BRAINS.

AIMS AND INVENTIONS OF PROFESSOR GATES OF WASHINGTON.

He is a Scientist of Acknowledged Standing and Predicts Great Things—Newspapers Electrically Printed Without Ink.

To take an ordinary person and by development of certain parts of the brain make of him or her a splendid genius in any desired line, such as the expressed aim and intention of Professor Elmer Gates. This is only one of the many magnificent plans of Professor Gates, who is one of the leading American scientists. He calls this theory "the theory of brain development" and believes that by means of it he will be able to regenerate the human race. He claims that he can build up and add to the brain, since it has been determined accurately by physiologists that certain portions of that organ govern corresponding functions of thought, action, etc.

Professor Gates is no mere dreamer of visions, and his standing in the scientific world entitles his theories and opinions to respect. He lives at Chevy Chase, a suburb of Washington, where he has a residence opposite that of Secretary Gage. There he has a big laboratory and intends to establish a college in which he will teach the science of electricity. The professor has made a number of valuable discoveries and inventions in that field of both scientific and commercial importance.

Amid the breathless silence of the spectators the ringmaster explains the ferocious nature of the lions as the terrible risk of the woman, an she was thrust in at the cage door in the excitement of the occasion the door was not securely shut after her.

It was a week before the "ferocious man eaters" were sufficiently recovered from their terrors to reappear in public.—McClure's Magazine.

From a recent photo. PROFESSOR ELMER GATES.

bearing sand or crushed quartz the magnetic or iron ore, whose separation has been one of the most vexed problems to the seekers for gold. Professor Gates' separator accomplishes this result in a simple, expeditious manner and will greatly increase the output of the precious metal.

Another invention of Professor Gates, made some years ago, is a remarkably ingenious and incredibly powerful microscope possessing the power of magnifying some millions of times. It is, however, very expensive, costing, according to its inventor, about \$1,500 to construct it.

Professor Gates believes that within ten years we shall see an enormous advance in electrical science. The inventions already produced, according to him, merely touch the great possibilities of the magic fluid. He believes that wireless telegraphy, telephony and telephony will be so perfected that we shall not only be able to speak to persons in distant lands, but that we shall see them at the same time. "The professor holds that the X rays are capable of indefinite improvement, and we shall soon be able to arrange a device enabling one to see through an entire house and observe the inmates as skeletons, walking or sitting or lying around.

The newspaper of the future, according to Professor Gates, will be printed without ink. With electric pens we will write on chemically prepared paper without ink or leads. The future editor of the daily paper will be able to write an editorial or an item of news as if writing on an ordinary typewriter, and when his article is finished it will have made a million or more copies precisely like the original. Other equally startling advances in every branch of human endeavor will be made. To those who venture to doubt the possibility of the realization of some of Professor Gates' sanguine dreams of the future he replies that our present inventions and advances were undreamed of and would have been ridiculed half a century ago.

Professor Gates' favorite idea is that of mind training. He holds that the brain of the average person is developed to only about 2 per cent of its possible capacity and that the future will see a tremendous increase in the thinking power of the human race.

An incident at the Porte St. Martin theater in Paris has become part of the annals of the show business. The chief feature of the exhibition was a "turn" consisting of the casting of a young woman securely bound into a cage of lions headed as being the fiercest and most bloodthirsty of man eaters.

The woman who had the part of the victim was taken ill, and a substitute was found in the wife of one of the British fishermen.

Receiver's Sale

By virtue of an order of sale, to me, directed by the Court of Common Pleas of Summit County, Ohio, in case No. 6557, I will sell at

Public Auction on Saturday, the 9th Day of February, 1901, at 9 o'clock, a. m., at 137 South Main Street, Akron, Ohio,

All the goods remaining in my hands, as receiver, of Theodore Peterson, heretofore doing business as The Textile Manufacturing Company, to-wit: 2855 climax awnings, about 5000 yards of blue stripe awning cloth, 358 yards of blue stripe awning cloth, 358 4000 block shells, 1000 climax slides, 2000 slide rods, and other small articles used in the manufacture of awnings.

Terms of sale cash. Inventory and appraisal can be seen by applying to the undersigned, at the office of Otis & Otis, Akron, Ohio.

D. W. PATTON, Receiver.

trainers, herself a learner of some experience, but without any acquaintance with these particular six lions. As she was somewhat nervous she carried small club ready for use should occasion arise.

Among Englishmen in America. Among Englishmen who come to America a British author, Mr. Vachell enumerates "the parson's son, the fortune hunter, the moral idiot, the reluctance man and the sportsman."

It is a clever and comprehensive catalogue, but it omits one of the types most interesting to Americans—the irresponsible "youngester" sent to "the States" to seek a fortune he has never been able to find at home or to avoid a maturing crop of wild oats.—New York Herald.

Harry—Uncle George, at the end of this marriage notice of Cousin Tom's it says, "No cards." What does that mean?

Uncle George—It doesn't mean anything, Harry. That is to say, it is only a blind. It is a promise that Tom will give up cards, but, bless you, he won't be a month married before he'll be back to the poker table again.—Exchange.
