Farmers, Look Here!

He manufactures Ball & Post's CULTIVATOR, a new article patented April 6th, 1852, to which he would call the attention of agriculturists. An labor saving machine, it is capable of doing double the amount of work of any ordinary cultivator.

The three small plows attached to the shares answer the same purpose of the common tooth cultivator, and in addition to the shares and plows, is a metallic blade rake attached to the rear of the Cultivator, which serves to cut and break up the soil and hard lumps, leaving the earth in a fine and pulverized condition.

Mr. Perrin also manufactures a larger sized machine, constructed upon the same principle as the above, but with larger shares, and containing two small plows in addition to the corn cultivator, which is designed to put in grain, and working upon summer fallows. They are light, and of durable construction, readily handled, and of easy draught.

This CULTIVATOR obtained the first premium at the Ohio State Fair, held at Cleveland in Sept., 1852. Shop on Front-st., Perrysburg, Ohio.—11tf
