New Pipe Line to Be Built.

The War Pipe Line company has been organized and announces that it will build an 8-inch line from Drumright to Humbolt and will continue it with a 6-inch pipe from Humboldt to Freeman, Okla., where it will join the Cushing Whiting line of the Sinclair Oil & Refining Co. to Whiting, Ind. The new line will parallel the Sinclair line all the way from Cushing to Freeman.

The War pipe line will be controlled and operated by the Sinclair Oil & Refining Co. and is a war organization pure and simple. The organization is the direct result of the oil administration asking for more oil to be delivered to the Atlantic seaboard, and when completed will enable the Sinclair people to deliver between 18,000 and 19,000 barrels daily, in excess of present deliveries. The Sinclair people turn the oil over to the standard at Whiting and delivery from that point to the coast is handled by the big people.

It may be surprising, but nevertheless the right of way for the new line has been taken, some of the pipe is on the ground and gangs of workmen have been working on the line for a week. It is hoped that the line will be completed in 75 days. A little extra equipment added to each pump station along the line will be all that is necessary to handle the extra oil and consequently about the only work to be accomplished is the laying of the pipe.

The present Sinclair line from Drumright to Humboldt is of 6-inch diameter and from Humboldt to Freeman it is 4 inch. It will be observed that the War pipe line will step up the capacity of the line all the way from Cushing to Freeman as it will be of 8-inch diameter from Cushing to Humboldt and 6-inch from Humboldt to Freeman. Humboldt is the junction where the 6-inch line from Eldorado joins the main line.

Not long ago, Oil Administrator Requa called attention to the fact that he wished an increase of at least 25,000 barrels daily in shipments to the Atlantic seaboard, and as the Sinclair line will take care of almost half of this, that concern is to be congratulated on its co-operation with the government.

Big News for Greenwood County.

Perhaps the most optimistic news for Greenwood county since the original well was completed in the Hull pool is contained in the following:

The Foster Oil company pumped its No. 7 on the Johnson farm in 22-24-12 and it is a 130-barrel producer.

Cosden's No. 1, Rush farm in 24-23-12, offsetting the above well to the west, is pumping 100 barrels.

The Kinney Refining company well on the Hull farm in 16-24-8 has finally been put on the pump and is making 75 barrels.

The above wells in the Foster pool are the best yet completed in that pool and the Kinney well is better than was expected.

The Eureka Petroleum company well in the southwest corner of the northwest of the northwest of 3-26-12 is west of Eureka and more than a half mile from production, is pumping 15 barrels of oil and 75 barrels of water.

Suit Involves Duncan Acreage.

WALTER, Okla., Aug. 13.—Suit for cancellation of a lease and a transfer affecting the northwest quarter of 27-1-16 has been filed in the district court by J. D. and Laura I. Lindsay against I. E. Turben, T. H. Murphy, A. E. Senter, C. H. Travis, and J. L. Travis. It is charged that when the plaintiffs sold an oil and gas lease to the tract to Turben on December 8, 1915, he was to drill a well to 2,600 feet if necessary before June 18, 1916, but on June 8, 1916, he transferred the lease to the other defendants, that the latter were given extensions of contract to June 8, 1918, that they have failed to perform the contract. Annulment of the lease and transfer is asked. The tract is well situated with reference to oil and gas development in the Walter field and by some is said to have a value of $500 an acre.

Ranger Tankage Situation Serious.

The Ranger tankage situation is getting more serious each day and it is said that there is room for only three days production in the field at the present time. There are 18 wells shut down on top of the sand waiting for tankage before drilling in and when these wells are drilled in the rush production will take a climb that will make all take notice. Production of Eastland county which has been reported at 17,950 barrels is apparently a little high. The actual production is not quite that much because some of the wells are pinched in and are not allowed to flow their full capacity.

Elmer Frasher Wounded.

News received by the wife of Elmer Frasher, who was formerly secretary to Dana H. Kelsey of the Texas Oil & Gas Co., is to the effect that Elmer is in a hospital in France having been gassed. He has been in the hospital for the past three months but the exact cause of his injuries were not known until the letter came. He is just beginning to recover the eyesight in one of his eyes. Elmer is a member of the ambulance corps and is well known in Tulsa.

Important Well in Osage.

The Osage-Arrow Oil company well in the center of the south line of the southeast 10 acres of the northeast of 14-22-10 has been drilled in the Burbank field and is good for 175 barrels. It is a half mile west of production and the stuff west and northwest of the well is unleased and consequently will probably be put on the market at the next Osage sale. Many dry holes are near the test. This is the well that was rumored Monday to have started off at 500 barrels.

New Hanson Superintendent.

RINGLING, Okla., Aug. 13.—Thomas Ayres of Bowie, Texas, who entered the employ of Joan L. Hanson, independent operator of Healdton field, about two years ago, has been promoted to general superintendent of the Hanson manufacturing properties in this district. He succeeds F. E. Jennings who recently resigned as manager to Mineral Wells Texas where he has returned from Dallas where he attended the funeral of his father, T. W. Hodges, a resident of Clay county.

Still Talks in Oil Terms.

Harry Norris, who here is the Blackwell district for the Texas Oil & Gas Co. is now a full fledged soldier of Uncle Sam and is stationed at Camp Funston, but still talks in oil terms. A letter received from him yesterday contained the following paragraph:

"On account of the danger of encountering salt water I expect to abandon this location soon."

Petroleum Club Day at the W. S. S. Bank.

Today is Petroleum Club day at the W. S. S. and every member of the club is urged to attend. Already a committee of one to boost the drive has pledged himself to raise a good amount and this is the day on which they will deliver.

Gypsy-Sinclair Day Produces $3,500 at the W. S. S. Bank.

Through an error it has been reported in these columns that the Gypsy, Sinclair, Gulf day at the War Savings bank netted in the sale of $1,500. The amount should have read $3,500, an amount of which the big oil companies are justly proud.

The Wilcox Well.

The Wilcox well in the northeast corner of the southeast of the northeast of 36-17-11 was not drilled deeper yesterday. The tools and wire line were recovered from the hole and it is said to be drawing stronger. Today will probably see the test deepened.

Okmulgee to Increase Stock.

The Okmulgee Producing & Refining Co., it was announced in oil circles yesterday, will increase its capital stock from $1,000,000 to $10,000,000. The report was not verified, but if true, it did not affect the quotation of the stock yesterday. It was quoted at $1.8 all during the day.

Burford & Brim Get Showing.

The Burford & Brim test in McCulloch county, Texas, was drilled through the sand yesterday, which was found at 1,216 feet. There was seven feet of it, but there was not enough oil and gas to make a well, so it is being deepened.

Abandons Location at Garber.

The Sinclair Oil & Gas Co. has abandoned the location on the Dick Mitchell farm in 26-22-4W at Garber. This was to have been one of the places where a big rotary outfit was to have been installed.

Making 50 Barrels.

There is no change in the well of the Elbing Oil & Gas Co. in the center of the northwest quarter of 13-22-4e in Butler county, Kan. It is flowing 50 barrels.

Deep Sander Due at Garber.

The Sinclair Oil & Gas Co. found the 1,800-foot sand at 1,810 feet on the Hay No. 10 in 24-22-4w, and was drilling it in yesterday afternoon.

DUNCAN—The Muscogee Tie-So-Ya Well is the northwest of the southeast of 22-1s-5w is drilling at 2,800 feet. This company, Yanny Canny well in the same section is drilling at 2,630 feet. The Kirtz well in the southeast of the southeast of the northwest of 22-1S-5W is hailing out at 2,130 feet. It is having trouble with a leaky casing.

The Ideal Oil company is drilling with a rotary at 1,525 feet in the extreme southeast of 21-1s-5w on the Harry farm.

The Big Beaver Torrance well in 19-1s-5w is drilling at 1,675 feet.

The Haas Lice company's Johnson well in 1-1s-5w is shut down and drawn the tools at 1,726 feet. The machinery has been moved to Burkburnett where the company has 10 acres 216 yards from the big well.

The Fort Ring Oil company's Brown well in 26-1s-5w is shut down for water at 396 barrels.

The E. O. Brown's Markham well in 24-1s-5w is fishing at 2,000 feet.

C. W. Taylor is drilling at 200 feet on the Taylor farm in 2-2s-5w.

The C. S. C. company's well on the Kronig farm in 27s-5w is drilling at 1,735 feet.

The Atlantic Petroleum company's Gunn well in 3-2s-5w is shut down at 405 feet.

The Grun Stake Oilcan well is drilling at 300 feet in 34-2s-5w.

Sanders and others are drilling at 1,534 feet in 3-2s-10w.

J. B. Lawton's well on the Neal farm in 24-2s-10w is shut down and abandoned at 2,534 feet.

The Riverdale well on the Wright farm in 32-4s-13w is shut down for water and casing at 1,400 feet. It is on a sand showing a little oil.

CUSHING—H. L. Harper's No. 7 Harper Jessie farm in the center of the south line of the southwest of the northwest of 25-18-7 is dry and and abandoned at 1,500 feet.

Shaffer No. 2 on the Taylor farm in the northwest corner of the northeast of the southeast of 24-18-7 is a 25-barrel well from the sand at 2,876 feet.

Shaffer is drilling at 400 feet on the E. Wallache No. 4, in the center of the east line of the northeast of the southeast of 23-18-7. No. 1 in the southwest corner of the northeast of the southeast of 23-18-7 is drilling at 1,200 feet.

Sinclair is fishing at 2,200 feet on the No. 9 Stoll farm in the center of the west line of the southwest of 23-18-7.

Shaffer's No. 1, M. Harlo farm in the northwest corner of the southwest of 24-18-7 is drilling at 1,900 feet.

The Missouri Oil & Gas Co. is drilling at 1,600 feet on the O. Bland farm in the southwest corner of the northwest of the northeast of 35-18-7.

The Cushing Development company is cleaning out at 2,715 feet on the J. Richards No. 2 in the northeast corner of the northwest of 32-18-7.

The Rapaljo Refining company on the 2 3-4-inch pipe at 1,800 feet on the Tiger No. 1 in 13-18-7.

OSAGE—The Mutch Petroleum company has a machine on the ground for No. 1 in the southeast corner of 5-21-10.

The Indian-Osage company No. 54 in the southeast corner of the northwest of the southeast of the northwest of 14-27-10 is rigging up.

The Texas company has plugged and abandoned its well in the southeast corner of the northwest of 12-

The Osage Oil company's drilling at 425 feet on the No. 1 in the northeast corner of the southwest of the northeast of the southeast of 12-

The Osage Coast No. 4 in the northeast corner of the southwest of the northwest of 1-22-10 is drilling at 2,900 feet.

The Osage Coast No. 3 in the southeast corner of the southwest of the northwest of 1-22-10 is drilling at 2,900 feet.

The Osage Oil company No. 1 on the Tom Rogers farm in the northeast corner of the northwest of the northwest of 11-27-10, the Oklahoma Producing & Refining Co. is drilling at 1,700 feet on the No. 52.

The Osage Coast No. 58 in the southeast corner of the southwest of the northeast of 1-22-10 is at 2,900 feet.

The Osage Oil company No. 1 on the Bruner farm in the northwest corner of the northeast of the northwest of the northwest of 1-22-10 is a rig.

The Osage Oil company shot No. 3 in the center of the northwest of the southwest of the southwest of 1-22-10 and has a 30-barrel well at 1,926 feet.

The Osage Oil company No. 10 in the northeast corner of the northwest of the northeast of 22-29-8 is drilling at 1,700 feet.

The Osage Oil company No. 1 on the Bruner farm in the northwest corner of the southwest of the northeast of 22-29-8 is shut down at 2,100 feet.

Richards and others are drilling at 2,100 feet on the Harry 1 in the northeast corner of the southwest of the northeast of 9-17-11.

Richards and others No. 3 on the Jackson farm in the center of the south line of the northwest of the southwest of 16-17-11 is drilling at 625 feet.

The Homa Oil company is on top of the sand at 2,814 feet with its No. 1 on the Howard farm in the southwest of the southwest of 16-17-11. It has about 100 feet of underream-ing to do before the well is drilled in.

TURLEY—The T. H. Oil company No. 4, J. M. Culver farm in the northwest corner of the southeast of 19-21-12, is drilling at 1,625 feet.

The Canadian Oil company No. 2 L. Chisholm farm in the center of the north line of the northeast of the northwest of 13-21-12, is drilling at 1,925 feet.

Sperry Oil & Gas Co. No. 10, L. Chisholm farm in the center of the south line of the northeast of the southwest of 12-21-12, is shut down at 1,050 feet.

Creo Oil company No. 8, H. Tucker farm in the northwest corner of the northeast of 12-21-12, is drilling at 950 feet.

GREENWOOD COUNTY, KAN.—The Great Southern Oil company No. 5 on the Hull farm in the southeast corner of 2-26-8 has been abandoned at 2,462 feet. The sand found from 2,328 to 2,457 feet showed for 20 barrels, but the casing parted and they were unable to fish it out. A new hole will be drilled after the rig has been skidded.

The Flint Hills Petroleum company abandoned its No. 1 on the Susan Vose farm in the northwest corner of the northeast of the southeast of 12-26-8 as a failure at 2,570 feet.

MOUNDS—The Wiser Oil company has shot its No. 4 on the D. Pickett farm in the northwest corner of the southwest of the northwest of 10-16-11 and has a 40-barrel well at 2,295 feet. No. 6 is in the center of the west line of the northwest of the northwest of the section and came in good for 3,000,000 feet of gas from the shallow sand from 1,315 to 1,344 feet.

John G. Mitchell has reached a depth of 400 feet in his No. 5 on the Pocock farm in the center of the northeast of the southeast of 13-16-11.

ALLEN—The Homaokla Oil company is rooting in timbers for No. 2 on the Adalene Jackson farm in the northwest corner of the northeast of the northwest of the northeast of 34-2n-8e.

The Homaokla Oil company is spudding in No. 12 on the Harlo farm in the southeast corner of the southwest of the northwest of 26-18-7.

The Plains Oil & Gas Co. has completed its No. 4 on the Cymmuth farm in the northwest corner of the northeast of the northwest of 5-3n-8e and it is a 15-barrel well at a total depth of 825 feet.

STONEBLUFF—The Presto Oil & Gas Co. has plugged its No. 1 on the D. Grayson farm in the northeast corner of the southeast of 30-16-15 as a failure. Depth is 1,540 feet.

Robinson and others are down 150 feet on the Richards 1 in the center of the east line of the northeast of the northeast of 27-16-15.

SMOCK POOL—In the Smock pool in Kansas, the Haverhill Petroleum company has completed its No. 2 and it is a 125-barrel well from sand found from 2,165-10 2,215 feet. It is located in the center of the southwest of the northeast of 2-21-5.

NEWKIRK—The Carter is moving in a rig for its deep test on the Pond farm in the southeast of the northwest of 34-25-3e.

BASKELL—The Butler well in 30-15-1e is flowing 100 barrels daily. Tankage has been erected to care for the oil and Cosden is building a gath-

ering line to take the oil. It opens up new territory in the Haskell territory.

OSAGE—The Mid-co Petroleum company got a 75-100 barrel well the first of the week in the northeast of 31-27-11.

BIXBY—E. B. George has a cut up of the Hauger farm to the south east corner of the northeast of 7-17-13.

FINANCE

We can furnish funds in amounts up to $500,000 to finance going concerns engaged in the production of oil, refining or manufacture of casing-head gasoline.

All inquiries will be given prompt attention.
