Crude Oil Products

Refiners report following prices:

46-48 Gasoline	23½c
52-60 Gasoline	24½c
60-62 Naphtha	26c
Kerosene	13c
Gas Oil	13c
Fuel Oil	7½c

Templeman Oil Corporation's Operations

The Templeman Oil corporation is drilling at 2,300 feet near the top of the Bartlesville sand, in its No. 1 Kruse, in 12-21-7, Cleveland district. The same company's No. 1 Ambrister in 15-4s-2w, is drilling at 1,730 feet, while its No. 1 test on the Troope acreage in 28-4s-2w, is cleaning out a bad cave at 850 feet. Both of these latter tests are in the Hewitt district.

In the Gunsight district, Texas, the Templeman Oil corporation and the Producers & Refiners corporation are running the 16-inch casing at 1,730 feet on their No. 1 Thorpe-A. In the Breckenridge district the Templeman Oil corporation and the Humble Oil & Refining Co., are down 2,796 feet on their No. 2 Guffee and are drilling at 427 feet on No. 3 Guffee tract.

Different Next Time

When the railroads grant the oil refiners a hearing on the question of re-instating a flat rate to take the place of the percentage rate; things will be decidedly different, and there will be several faces missing at the conference, which were much in evidence at the hearing before the Interstate Commerce commission.

It will be a good time to invite a member of the Federal State commission, as it will give him an opportunity to see with his own eyes, and hear with his own ears, just how far men will go to injure their competitors, and to put an end to the refining industry, which has grown by leaps and bounds in this vicinity.

At a recent conference on trade practices, a member of the Federal Trades commission presided. At that meeting he got more inside dope than he could have acquired in a life time, and especially when some of the brethern came right out and mentioned names, and related facts, although this sort of thing was supposed to be taboo.

It was no doubt interesting, but it will remain in his memory as a real nice pink tea, as compared to the hearing which is bound to be granted by the railroads. There is only one way to fight, and that is with brick-bats or bowie knives or anything else that comes handy, when it comes to a question of life and death. There are too many living with glass houses to want to take a chance on a show down, where there is involved so great and so righteous a cause.

And so, far particular and personal reasons, there will be some absentees at the next hearing, or if not, there will be some people wishing they were busy with their own affairs and blessing their own little old pipe line

The Financial Situation

New York banks are proud of the statement sent out via the Associated Press and published in this paper yesterday, and at the local offices of brokers with New York connections and through wires, it is learned that the situation has loosened up mightily. No one has asked for a loan in so long that there is but little inquiries for funds and everybody is living off the proceeds of Liberty bonds sold at a discount, undreamed of a year ago.

The administration in Washington and the Federal Reserve banks have certainly been doing a good job of it, and deflation has hit the automobile industry, which is Tulsa's sidekick, a mighty severe jolt.

Oil Men Interested

The oil men are looking to the new Petroleum Exchange in New York as a life saver, and are more and more interested, according to Gordon J. Langford, who is here in the interest of that Exchange.

Mr. Langford is going to visit other towns in the oil belt, including Bartlesville and Okmulgee, and towns farther west, and should certainly find a very interested lot of oil men waiting for him.

Chicken Creek vs. Turkey Creek

Perhaps the most interesting development in the new pool south of Kelleyville, is the prospect for big production now in sight, on account of the big well recently completed by the Iron Mountain Oil company in 28-16-19, which is located so near the limpid waters of Chicken creek, as to excite the anxious inquiry as to whether that quiet little stream winding its way southward where it empties into Deep Fork, and bordered by the festive Black Jacks, will ever take the laurels,—so long held by Turkey creek which parrallels it to the east—and will produce more oil than is now being brought to the surface along the banks of the stream named for Thanksgiving's sacred bird.

Turkey Creek has been pretty well developed. It is along this stream that the Selby Oil & Gas Co., has its wonderful production, and has with other concerns made the country blossom with shacks and little villages, and happy contented people who draw their sustanance and earn their daily bread from the nearby leases. Turkey creek has had a big start, and now Chicken creek is due for a lot of development, and in spite of the high-priced pipe and everything else that goes with an oil well, there is enough development to suit the most optomistic.

It is said that these two creeks, and they are virtually joined for miles by production, have a larger area than the Glenn pool. Best of all, Creek county has shown her appreciation by building wonderful roads leading into both of the valleys now being developed. It is a day well spent when visiting this neighborhood, and of course the most interesting feature is, how far north and how far south along the creeks oil will be found in large quantities?

One thing is certain, and that is a 40 acres along Chicken creek adjoining some of the leases now being developed, is easily sold for $100,000, which is pretty good evidence that the practical oil man knows which way the trend is going. It is a big game down there, and no chance for pikers.

Ouachita County, Arkansas

The big Hunter well in the southeast of the northeast of 13-15-19w, which created such excitement about two weeks ago is now at a total depth of 2,135 feet, the 6 5-8 inch casing is set at 2,128 feet, and there are seven feet of open hole and no liner. The well has been put to pumping but no estimate can be placed on its production until it has settled down to a steadier rate.

Hunter and others No. 2 in the northwest of the northwest of 20-15s-18w, is drilling at 600 feet. Hunter No. 3 in the southeast of the northwest of 18-15-18w, is down 200 feet, and Hunter No. 4 in the southwest of the northeast of 24-15-18w, is a rig up.

The Transcontinental people have a rig up for No. 1 in the southwest of the southwest of 13-15s-19w, while No. 2 in the southwest of the southwest of 11-15-19 is a location.

The Louisiana Oil & Refining Co., is drilling at 220 feet on its test in the northwest of the southeast of 13-15-19w, No. 2 in the southeast of the southwest of 12-15-18w, is a location.

The Standard of Louisiana has a location for a test in the southwest of the northwest of 7-15s-17w.

House and others are drilling at 2,600 feet on their test in the northwest of 3-15-17w.

The Humphries Petroleum company is fishing at 3,400 feet on its No. 1 in the southeast of the southeast of 23-12-19w, and is shut down for material on No. 2 on this tract in the southwest of the southwest of 19-12-18w. It also has a rig up for No. 3 in the southeast of the northeast of 15-12-18w.

Walters Active

WALTERS, Okla., Aug. 15.—Three new oil wells, increasing the total daily production of the field by approximately 500 barrels, were completed this week. In each of these wells production is found in what is known as the 2,100-foot sand and each well represents further extension of the rich pool opened by Keys No. 1 Kincade in the northwest quarter of 33-1s-10w.

The best wells completed this week are Keys No. 2 Kincade in the northwest quarter of 33-1s-10w, and Keys No. 11 Bills in the southwest quarter of the same section. No. 2 Kincade has been flowing steadily since completion and, though no gauge of the production has yet been made, it is estimate at from 200 to 250 barrels. No. 11 Bills flowed 225 barrels during the first 24 hours and is still flowing at the rate of 215 barrels a day.

The Kincade pool seems to extend in a northeasterly-southwesterly direction. Keys No. 11 Bills in the southwest quarter of 33-1s-10w, is almost on a line connecting Keys No. 1 Kincade with the Empire well in the northwest quarter of 4-2s-10w, which came in last winter at the rate of 1,200 barrels a day. Following this line to the northeast we find two 100-barrel wells recently completed by the Invincible Oil company in the southwest southeast 28-1s-10w.

Further proof of the northeasterly trend of the Kincade pool is found in the fact that wells drilled into the same sand, east and west of this line, show a noticeable decrease in production varying directly with the increased distance from the northeast-southwest line.

John C. Keys brought in No. 2 Kincade in the southwest of the northwest 33-1s-10w, estimated flow 200 to 250 barrels from sand at 2,120 to 2,152 feet.

John C. Keys completed No. 11 Bills in the northeast quarter of the southeast quarter of the southwest quarter of 33-1s-10w, which flowed 225 barrels during he first 24 hours from a sand at 2,140 to 2,155 feet.

Margay Oil company brought in No. 4 Fink in the southeast quarter of the northeast quarter of 33-1s-10w, estimated 50 barrels from sand at 2,106 to 2,121 feet.

Mc-Man No. 18 B. F. Priddy in the southeast quarter of the southeast quarter of section 4-2s-10w, setting casing at 2,174 feet.

John C. Keys No. 2 Lawler in the northwest quarter of the northeast quarter of 33-1s-10w, setting casing at 2,089 feet.

John C. Keys No. 4 J. M. Boldman in the southeast of section 28-1s-10w setting casing at 2,097 feet.

John C. Keys No. 2 A Lawler in the southwest of the southeast of 33-1s-10w setting casing at 2,098 feet.

John C. Keys No. 1 W. D. Smith 3-1s-10w, setting casing at 2,074 feet.

John C. Keys No. 3 Kincade in the northwest of the southwest of the northwest of 33-1s-10w, standardizing at 2,046 feet.

John C. Keys No. 4 Kincade in the southwest of the northeast of the northwest of section 33-1s-10w, standardizing at 2,050 feet.

John C. Keys No. 5 Kincade in the northeast of the northwest of 33-1s-10w, drilling at 1,300 feet.

Hamon No. 5 Fink in the northeast of 32-1s-10w, drilling at 1,200 feet.

Hamon No. 4 Fink in the northeast of 32-1s-10w, drilling at 1,700 feet.

Invincible No. 17 J. O. Roberts, (4th well) in the southeast of 28-1s-10w, drilling at 1,350 feet.

Nebraska-Oklahoma in the northwest of the southeast of 10-3s-11w, drilling in hard lime formation at 1,985 feet.

John C. Keyes has derrick timbers on ground for No. 1 Shackleford in the northwest of the southwest of 34-1s-10w.

With the Oil Men

Dr. J. C. Wilholt, of the firm of Wilholt & Ward of Manhattan, Kansas, is in Tulsa and says that he is starting a test near Wetumka, in 9-9-10, north of the Producers & Refiners corporation well. He is putting down a 3,600 foot test, in search of an oil producer, because of the very wet gas he got in his fas well in that locality about a year ago. He also says that the Doctor Hope Oil company well No. 2 on the Covert farm, in 21-21-4, Marion county, Kansas, made 1,050 barrels actual guage the first 24 hours. This well is in the Covert-Sellers pool, and the Covert sand was topped at 2,368 feet. Dr. Wilholt says that this is genuine creekology, and every test on this creek has been a sure fire producer.

Harry Heasley of the Devonian Oil company, left for his home at Emlenton, Pennsylvania, for a two weeks' visit.

Horace Wilcox is in the city, having come from Colorado via Chicago.

R. B. Tansel, of the Anderson & Gustafson office here, is enjoying a much deserved vacation in Colorado. He is paying 35 cents for gasoline, and says that hundreds of tourists are traversing that section of the country. He says that he sees many Tulsa cars, and that one filling station at Manitou advertises "Oklahoma Gasoline." Everybody has heard of Wonderful Tulsa, according to Mr. Tansel.

Tom Wolfe, well known oil producer is back from his summer vacation at Lake Side, Ohio, where he has a beautiful cottage.

Tank Cars

for all purposes, including insulated cars for casinghead gasoline. Designed and built to more than meet the usual requirements.

The Secret of Success

The secret of success is hard work and clear thinking. The industrious person earns more than his necessary expenses, and the thinking person saves this surplus and deposits it in a good, strong bank. It is never too soon to begin saving. Get the habit of saving. It is a good habit to get into, and the earlier it is acquired the greater will be the success. Financial success is simply a matter of sticking to your saving habit—making your character stronger than any temptation to spend. Nobody saves much at a time. Everybody can save a little at a time. Just try the saving habit and see how fast the small change will grow into dollars, and how the dollars will grow into tens and hundreds.
