HORSE THIEVES ARE CAPTURED

OFFICERS GET BUSY ON MEN WHO HAVE BEEN OPERATING IN CROOK AND LAKE COUNTIES ARE HELD FOR TRIAL

For a number of years past an organized gang of horse thieves have been operating in Northern Lake and Southern Crook counties. Many efforts have been made to collect sufficient evidence to warrant bringing charges against the leaders of the gang, but they have been too shrewd to allow themselves to be captured. They have constantly evaded arrest and continued to ply their trade unmolested. These fellows were "rustlers." They were well acquainted with that immense unsettled country, knew where to catch the stolen property, and would gather in a car load at a time, drive them to Bend, and then ship them to some point in Washington and sell them. They became rich at the business, one of the leaders is reported to be worth \$15,000—a fortune made in horse stealing. They became bolder and bolder, defying officers in both counties, declaring they would not be taken without trouble, and making threats against anyone attempting their arrest.

One day last week Sheriff W. B. Sailer, accompanied by Assessor A. J. Foster, under telegraphic instructions from Crook county, went to Northern Lake county to arrest two of the worst members of the gang, "Fank" Robinson and "Shorty" Allen. On reaching Silver Lake it was learned that "Fank" and his brother, Bill Robinson, who was arrested later, were at the Harris ranch. Sheriff Sailer and Mr. Foster drove to the Harris ranch and arrested "Fank" Friday afternoon.

In the meantime Allen was located in the vicinity of Walker's cabin, fifty-five miles north of Silver Lake, where he was taken into custody by Deputy P. D. Reader, Gus Schroeder and W. H. Hayes, about 2 o'clock Saturday morning.

THE FIRST GRAY HAIR SIGN OF AGE

EASY WAY TO PRESERVE NATURAL COLOR OF THE HAIR AND MAKE IT GROW

A harmless remedy, made from common sage, quickly restores gray hair to natural color. The care of the hair, to prevent it from losing its color and lustre, is just as important as to care for the teeth to keep them from discoloring. Why spend money for cosmetics and creams to improve the complexion, and yet neglect your hair, when gray hair is even more conspicuous and suggestive of age than wrinkles of a poor complexion? Of the two, it is easier to preserve the natural color and beauty of the hair than it is to have a good complexion.

All that is necessary is the occasional use of Wyeth's Sage and Sulphur, combined with other valuable remedies for dry, harsh, faded hair, dandruff, itching scalp and falling hair. After a few applications of this simple, harmless remedy, your hair will gradually be restored to its natural color, in a short time the dandruff will be removed, and your hair will no longer come out, but will start to grow as nature intended it should.

Don't neglect your hair, for it goes further than anything else to make or mar your good looks. You can buy this remedy at any drug store for fifty cents a bottle, and your druggist will give your money back if you are not satisfied after using. Purchase a bottle today. You will never regret it when you realize the difference it will make in your appearance.

SCIENCE BRINGS GREAT REWARDS

Immense Increase in Crops is Noted on the Farms Where O. A. C. Methods Have Been Put in Practical Use

CORVALLIS, Oct. 21.—An average yield of 20 per cent to 30 per cent more in crops raised on farms of the O. A. C. experiment station than on other farms in the locality is reported by Prof. H. D. Scudder of the agronomy department, who has just returned from an inspection tour of the Sherman, Crook and Harney county experiment farms. He attributes these results to the scientific methods in conjunction with unusually favorable weather conditions.

Corn, field peas, alfalfa and Turkey Red wheat have succeeded on the land of a number of Eastern Oregon farmers, indicating a promising future for them in the dry farming areas. Five years ago it was claimed that these crops could not grow there with any profit to the farmer, but the college insisted then, as now, on their future importance in the development of dry farming. That the farmers, notably in Sherman and Crook counties, have a growing reliance upon the wisdom of the college experts is shown by the fact that more than half the wheat acreage is now in Turkey Red. On the Moro Branch experiment farm this variety has consistently proven its superiority in yield over other varieties.

At Metolius and Redmond, as well as at Moro, the value of corn to the dry farmer has been proven by its success, both as a grain and as forage. The variety which made the best showing in a college bred corn which Prof. Scudder has been introducing to hundreds of farmers, not in Eastern Oregon alone, but throughout the western part of the state also.

An equal success has been gained with field peas, even better results than expected being achieved at both Moro and Metolius in the matter of production for seed and hay and for fattening pigs. Returns in pork of \$12 to \$18 for each acre of peas were obtained at both stations. This makes peas a better crop for financial gain than wheat, as there is no harvesting expense, and, still more important, it increases rather than depletes the soil fertility. The brown field peas proved far the best, and will be grown for distribution as fast as possible.

Alfalfa grown in cultivated rows for seed production gave the greatest success of all, and proved most gratifying to Prof. Scudder, who has advocated this particular form of production, and now feels that the college is well justified in pushing this form of dry farming work. A variety which he introduced from the Dakotas is far superior to all others not only in drought resistance, but in seed production and resistance to frost. Former estimates of a possible profit of \$20 an acre each year from the seed crop, it is believed, will be exceeded considerably. The seed is of unusual value, both for its hardiness and vigor, and because of its environment. It has already proven its superiority to wheat as a money maker, and its value as a soil builder is unquestioned. More than a ton of hay to the acre was also obtained this year in the alfalfa fields at Moro, and improvement in methods is expected to bring the yield up to a ton and a half.

Certain varieties of potatoes introduced in Sherman and Crook counties by the college have also proven superior in yield and quality, and as potatoes are always of unusual quality on the dry farming land, the varieties now being developed on the experiment station fields will prove profit bringers.

Ample demonstration on the experiment farms has been made of the greater profits that may be obtained from more intensive methods of farming where corn, potatoes, field peas and alfalfa replace wheat, as rotation crops used with it. The improvement of the soil and the maintenance of fertility, always the ultimate object of the college in its work, is considered the greatest result of such a system.

LOCAL ATTORNEY TO BE MARRIED

Several pairs of worn-out ladies' shoes draped over the office sign of Mr. Shaw left this city Saturday night, ostensibly to attend to some business in Sacramento, Calif. It leaked out Sunday that he had gone to Stockton, Calif., where he will be married tomorrow night to Miss Josephine Donegan of this city.

Mr. Shaw is very well known in this city, where he has practiced law for several years. Miss Donegan has taught school here, but recently has been employed in the county assessor's office.

The wedding will take place at the home of Miss Donegan's sister, Mrs. Ann Campbell.

What is Desert Land?

A contest case of considerable interest was heard before the officials of the United States Land office this week, says the Lake County Examiner. John A. Morgan contested C. Fitch's desert land entry on the ground that the land was not of a desert character. The land in question is located north of Lakeview in section 28, in township 37 north of range 20 east. O. C. Gibbs and C. H. Combs represented Mr. Morgan, while L. F. Conn represented Mr. Fitch. Considerable testimony, both direct and cross-examination, was introduced, and while no decision has as yet been made by the officials, yet it is quite certain that the case will be taken up to the secretary of the interior before a final decision is reached.

Borrower Buys Sheep

Bert Barrows returned Monday evening from Lake county, where he went some time ago with Frank Bloomingscamp to purchase some sheep. He says that he and Mr. Bloomingscamp purchased 3,000 head from different owners in that part of the country, and that they will bring them here before long. Mr. Bloomingscamp will return in a few days.

THE LONG, HOT, WEARY DAY

is sure to have a pleasant and refreshing close for those who have awaiting them of some that luxury which only a properly appointed bathroom can give. And modern sanitary plumbing has placed them at the disposal of rich and poor alike, for few persons nowadays are so limited as not to be able to afford what was a few years ago an almost priceless luxury. If you desire to know all about what a moderate sum they can be installed, call up GREENGLASS.

A Clean Scalp And Healthy Hair

Many of your friends have found that a luxuriant growth of hair—soft and glossy—and a scalp free from dandruff, will result from the use of

NYAL'S HIRSHUTON

This is the procedure—Wash the hair with warm water and a pure soap—rinse thoroughly—rub the scalp with a stiff brush—apply Hirsutone—rub it in well and dry the hair before combing.

Please understand that Hirsutone is not merely a hair wash—it is a tonic—a food.

While it thoroughly cleanses, it also penetrates the hair—removes all dandruff—prevents its return—and preserves the natural beauty and color of the hair. Nyal's Hirsutone should be on your dressing table. It sells at 50 cents and \$1.00 the bottle.
