JAP MAKING FIGHT TO BECOME CITIZEN

An Array of Attorneys Appearing for Claimant—May Settle Long Dispute

San Francisco, May 24.—On a case which will be heard next Thursday in the United States circuit court of appeals here rests the citizenship status of 75,900 Japanese residents of the United States, a Japanese merchant of Honolulu is making the fight, having appealed his case to the higher court when denied citizenship in the lower courts. Ozawa is backed by a big battery of American attorneys who based their appeal on the act of June 22, 1906. They assert that this act, in describing eligibility for naturalization, does not refer to race or color. They assert this act repeals the previous naturalization statutes. Assistant United States District Attorney Jared will direct the government's case. The government declares that the 1906 act does not repeal the old statute, which specifies that only free white persons or those of African descent are eligible to naturalization. Jared will contend that congress intended to bar Mongolians from citizenship rights. On the other hand Ozawa's attorneys will assert in their brief that their client is a Japanese and not a Mongolian; that the Japanese are free and are white, having "European and Aryan root stock in their family tree". Volumes of arguments will be submitted, from the records of anthropologists and ethnologists. Ozawa first began his fight for citizenship in the Alameda county courts in 1906 when he was denied naturalization papers on the ground that he is a Japanese born in Japan of Japanese parents. Ozawa has lived in this country almost continuously since 1884 and was educated in American schools.

TO AUTHORIZE CONTROL OF BIG MONOPOLIES

Congress Will Permit This To Be Done But Does Not Command It

Washington, May 24.—Government control of all great monopolies in the United States will be authorized—but not directed—by the present congress. This legislation is expected to "keep in line" combinations which will be permitted to form during the present emergency, despite the Sherman anti-trust law. A bill will be reported out of the senate interstate commerce committee within a few days authorizing President Wilson to direct the operation or all the railroads. Provision will be made for him to commandeer all shipbuilding plants and factories engaged in production of material necessary in the construction of vessels. The president will be given virtual powers of dictator in directing distribution of supplies of all kinds.

United States Steel Makes New Record

Denies Being Spy Is Just German Observer

New York, May 24.—The New York Evening Sun financial review today says: Today's stock market, as rarely before, was completely under the domination of United States Steel. Whither steel led, the rest of the market followed. Transactions in that issue comprised approximately a third of the total sales. The price moved in waves and each wave carried it forward to a new high level for all time, finally crossing 131, a gain of nearly four points from yesterday's closing and nearly two points above the best previous price at which those shares ever sold. Short covering, outside buying from open sources, from the west and elsewhere carried the entire list forward briskly at regular intervals, while selling by the shorts to try out the market position and realizing as regularly draw prices away from the top. Copper shares were relatively narrow, as were the shipping issues, but specialties, with few exceptions, went strong, and the equipment and munition shares also. The railroad list was scarcely less aggressive, buying being largely based on the expectation that freight rate increases would be effective not later than July 1. There were two strikingly weak spots in New Haven and Denver and Rio Grande preferred, bonds were in moderate demand and firm.

BRAZIL CONSIDERS HERSELF IN THE WAR

By H. B. Robertson (United Press staff correspondent) Rio De Janeiro, May 24.—Brazil regards herself as a belligerent in the world's war, though there has been no formal declaration of war between the republic and Germany. "A declaration of war is not necessary," explained Foreign Minister Picanha today. "We need merely accept the state of war imposed upon us by Germany. When Brazil formally revoked its declaration of neutrality between the United States and Germany, we virtually make such an acceptance. Picanha spoke as if he was leaving a cabinet meeting. As if to lend emphasis to his words he exhibited documents exchanged between Rio and Washington, planning complete cooperation between the two republics of the North and South. These outlined not only moral and economic unity of effort but likewise utilization of Brazil's navy. "Eucematomia If you are troubled with chronic or muscular rheumatism give Chamberlain's Liniment a trial. The relief from pain which it affords is alone worth many times its cost. Obtainable everywhere. the Fleischmann Yeast company, the National Binding Machine company, the Muenzen Specialty company and the Standard Car Equipment company. Whooping Cough One of the most successful preparations in use for this disease is Chamberlain's Cough Remedy. S. W. McClin, Blanton Springs, Ala., writes: "Our baby had whooping cough as bad as most any baby could have it. I gave him Chamberlain's Cough Remedy and it soon got him well." Obtainable everywhere.

Senate Puts Censorship Bill Up to the House

Washington, May 24.—Whether there will be a censorship provision in the Gregory espionage bill is up to the house. After a long deadlock, the house and senate conferees virtually agreed to report out a bill containing a compromise provision which is merely naval and military news. If the house adopts it, the senate may follow suit. If the senate tarts it down, however, the senate won't even vote on it. There is much speculation as to whether house republicans and about 27 house democrats will stick together, as they have threatened, and vote the proposed section out.

Found Long Lost Hoard

When John Caplinger was five years old, which was sixty five years ago, he had \$1.85. His parents borrowed one dollar, leaving to borrow the remainder. He buried it in a field on the farm. Then he forgot where he buried it and in spite of his boyish attempts to find it, he failed. The other day, while plowing, Mr. Caplinger turned over the half dollar, and a little search revealed the other two coins. Today he was in Salem displaying the long buried treasure. One of the pieces buried was coined in 1774, and another in 1830. The third is so badly worn, the date is obliterated.

Pay No Attention to "Star Spangled Banner"

That Salem people are careless in observing respect toward the "Star Spangled Banner" when it is played was evidenced this week in the theaters when on two different occasions in two different theaters the national anthem was played and not one person in the audience paid the slightest attention to it. On one occasion the national anthem was played as an exit march, which should never be done by any orchestra with proper patriotic taste, and the audience went scurrying out of the theater as if any old rag time air was being played. No one paid any attention to the fact that it was the national anthem. That fact alone is deemed enough to call patriotic people to their feet to stand at attention until it is completed. The other occasion was last night when the anthem was played in a theater and not one person arose to honor it. The "Star Spangled Banner" should not be played as an exit march, nor should it be played at every instance should it be played at every instance of patriotic enthusiasm, but on important and ceremonial occasions. And then every citizen should stand at attention.
