

WHAT EVERY WOMAN WANTS TO KNOW—THINGS THAT INTEREST MAID AND MATRON

ELLEN ADAIR SEES BOTH SIDES OF LIFE ON LONDON NIGHT

She Gets Glimpse of Derelicts by Thames Embankment and Witnesses a Romance in Restaurant.

A certain tender radiance clings about London summer evening when the roar of the traffic is hushed, and the sky is slowly changing in a long and pleasant twilight.

That July evening, the night before I sailed for America, is still so fresh with me.

Miss Adair said my companion suddenly "you're a fine little girl, and I hate to think of you clearing off like this, with no one to help you."

"See those poor souls sitting yonder?" said the little lawyer, huskily.

"I don't believe it's true," cried I, valiantly. "For life is surely what we make it."

"You have the courage of truth," said the little lawyer, smilingly.

"And the people?" I said, looking at the beauty of the women.

"And then the self-centered leader of the orchestra stepped forward and the music changed."

"Beside us at the nearest table sat a slender lovely girl in a rose-pink gown, and by her side an eager boy, a typical London youth, with a keen, pink face and fine dark eyes."

"I turned my head away for I felt I was rudely trespassing on holy ground," Miss Adair said.

REV. DR. ANNA SHAW AGAIN CAMPAIGNS FOR SUFFRAGE

REV. DR. ANNA SHAW

Is Now Traveling in Northwest States, Where Question of Votes for Women Will be Fought Out at the Next Election.

That valiant-hearted, indefatigable worker in the woman's cause, the Rev. Dr. Anna Shaw, is once more out upon her travels, and undergoing as arduous a campaign as any soldier in the time of war.

Every night, from September 1 till November 1, she has addressed, and will continue to address, large meetings, and here comes the salient point—in a different town every night.

On her arrival at one town, the following arduous program awaited her. She had arrived in South Dakota at 10 o'clock in the morning, somewhat exhausted after her four and a half days' train journey.

After a four and a half days' journey such a program might well fatigue many a woman.

Miss Shaw would have made a splendid lawyer, she possesses great powers of oratory, a strong sense of justice and a real gift in debate.

THE WORLD FROM THE HILL

HIGH on the hill we had our tea; And then I saw what I could see; I never saw so deep a hole; The world seemed like a great big bowl.

And then I had this funny wish, That I had such a breakfast dish, And yet, perhaps, if I had such, I could never eat so deep.

FRESH MEATS KEEP THEIR HIGH PLACE IN HOUSEHOLD LIST

Dealers Anticipate Rise in Prices Next Week—Market Basket Quotations Show Little Change.

The prices of meats, poultry, fish, butter, eggs, vegetables and seafoods at the closing of the week remain unchanged and no advance in prices is anticipated by the retail dealers except in the case of fresh meat.

Mutton and lamb chops are retailing at 25 to 30 cents a pound. Legs of mutton 15 cents and lamb 23 cents. Shoulders of mutton are 12 cents. Sirloin steak is bringing 35 cents a pound and round steak 28 cents.

White potatoes are retailing at 60 cents a basket and sweet potatoes 30 cents a half peck. String beans cost 25 cents a half peck and green peas 40 cents.

The best eggs are 40 cents a dozen. Tub butter 38 cents a pound and print butter 46 cents a pound.

Fish and seafoods are comparatively cheap. Steak cod can be had for 15 cents a pound. Halibut is 20 cents. Brook trout is 25 cents and sea bass is selling as low as 12 cents a pound.

THIS IS THE TIME TO PLACE ALL BULB PLANTS Better Results Can Be Had If Soil Is Prepared.

Tulip and hyacinth, narcissus and daffodil, the little crocus that has such an audacious air as it pops up through the snow to greet the spring, now is the time to plant them all.

They are all bulb plants that repay one generously for the little trouble in preparing the soil.

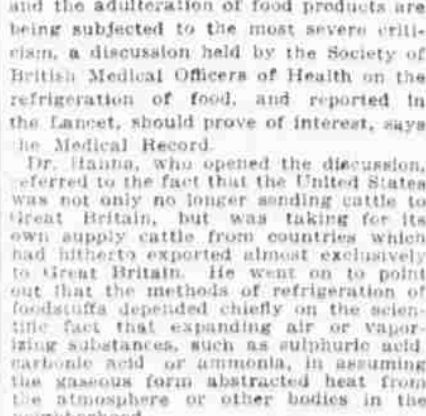

They will grow almost everywhere, but it goes without saying that the flowers will be large and fine if the ground in which they are planted has had some special preparation.

The earth should be spaded for eight or ten inches; it should be enriched with a fertilizer of some kind at that depth, and if a little sand is placed beneath the bulb itself, so much the better.

There are many varieties of bulbs, and some of the best kinds are especially expensive. But crocus and narcissus bulbs can be bought for 10 and 15 cents a dozen.

Method Involving Freezing Rather Than Mere Chilling Favored. In these days when cold storage, the employment of preservatives in foods, and the adulteration of food products are being subjected to the most severe criticism, a discussion held by the Society of British Medical Officers of Health on the refrigeration of food, and reported in the Lancet, should prove of interest.

For days he watched the seeds dry up—with a soft peck he would test them, but no—they were not quite right, and with a whisk and a song he flew away.

Round and round the flower he circled, singing joyously, just as a little child runs round a jaily lighted birthday cake.

Then he lighted on it to eat the first course.

But alas! The flower stem that had been so brave and strong when the

BEFORE THE SANDMAN COMES

THE CARDINAL'S BREAKFAST

AS YOU sit down to the nice breakfast of fruit and cereal, and maybe a poached egg on toast, did it ever occur to you to wonder what the birds are eating for breakfast at this very minute?

They will grow almost everywhere, but it goes without saying that the flowers will be large and fine if the ground in which they are planted has had some special preparation.

The earth should be spaded for eight or ten inches; it should be enriched with a fertilizer of some kind at that depth, and if a little sand is placed beneath the bulb itself, so much the better.

Correspondence of general interest to women readers will be printed on this page. Such correspondence should be addressed to the Woman's Editor, Evening Ledger.

BASQUE GIRDLES AND LONG SLEEVES MARK NEW MODES

Models Show Revival of Former Fashions—Gowns May Combine Several Materials—Elbow Sleeve Lingers.

Fashion may be responsible for many outre and sensational frocks, but simplicity is always attainable without departing from the dictates of the season.

For evening wear black has a charm that never wanes. Aside from its assured elegance, it has a practical value that makes it a wise choice for the woman of few evening dresses, while at least one black frock is a necessity to the woman of many.

Silks, satins, velvets, nets, chiffons and laces, the whole gamut is run for evening wear this year.

Or, one may choose one material and trifle it with another and even combine two or three in such a way that it would be hard to know the foundation from the ornamentation.

Simplicity is the keynote of the gown illustrated, while at the same time it has the high basque girdle and the full length sleeves, which, though revivals of another day, pass as novelties with a new generation.

The bodice is cut surplice fashion, the V in back as well as in front coming down to meet the girdle. It is untrimmed except for the narrow band of jet, which is repeated in greater width at the wrist and still greater on the tunic, while the high girdle is of satin and is sleeveless. But sleeves are fashioned of the net of the outer bodice, along mousquetaire lines, tapering to the wrist and ending in heavy bands of jet.

These long sleeves are graceful affairs, and are being favored, as a fashion for afternoon frocks in place of the elbow sleeve worn so persistently both winter and summer and spring and autumn for several years.

Not that the elbow sleeve will have its devotees, for it means a freedom and comfort that the full length sleeve and the revived knuckle, Sarah Bernhardt sleeve can never give.

The effect of the dress is altogether charming, and it has a value for the woman who is a devotee of the fact that it could be so easily copied.

It could be reproduced just as it stands, black satin, veiled in jet, jet-spangled basque girdle and jet trimmings, or it could serve as a model for other materials.

The distinctive fashion notes are, of course, the long sleeves and the basque girdle. These should be preserved, or the gown would lose its modish effect.

WAR DELAYS LIBRARY Wilmington Postpones Canvas to Raise \$300,000 for Building.

WILMINGTON, Del., Sept. 17.—War has made itself felt in the project to raise the necessary \$300,000 for the purpose of erecting a new library building in this city.

How Many Shots Will be Fired? The question is often asked how many shots are fired in an ordinary battle, and although it would be impossible to make a guess in regard to the small arms, the Scientific American gives the following figures relating to the artillery:

The number of rounds that will be fired during an ordinary battle can only be imagined. We have data from the Russo-Japanese war showing that at Liokas one battery fired 2600 rounds in one day, while another fired 3300 rounds, making for each gun about 415 rounds in one day.
