The Sketch of Simpson Bobo Concluded

By Major William Hoy. MR. EDITOR—In my recollections of Mr. Bobo I stated that one of the men that Ford attempted to implicate in the counterfeit business was in college with Gov. Noble and two others had been in the Legislature with him. The way the sentence stood in print, it might have been inferred that Ford had been in the Legislature with Gov. Noble, which would have been incorrect. Ford was never a member of the Legislature.

attracted the attention of all good citizens and he was urged for that office. Dr. Bivings was strongly in his favor. He said he had proven himself one of the strangest men in the State.

Major C. Q. Petty.

The Gastonia Gazette, of Thursday, has the following sketch of Major C. Q. Petty, whose death occurred at his home near Bowling Green on Thursday of last week, and whose remains were interred in Bethel cemetery on Friday, with religious services conducted by Rev. G. A. Sparrow, assisted by Rev. D. S. McAllister:

When the war broke out he was just passed 80 years of age. At the call for volunteers, he dedicated his life to the cause of the Confederacy. On the 22nd day of March, 1862, Company H. of the 49th N. C. regiment was organized in Dallas with Charles Q. Petty as captain. On the first day of April he and his company left for Raleigh, and from that day to the end of the war he showed himself a good soldier.

Major Petty for many years held membership in the Providence Baptist church in Spartanburg county, S. C.; but at the time of his death was a member of the church at Clover. He expressed his entire trust in God, and calmly and deliberately made his preparations for eternity.

As long as he lived Major Petty took an unusual interest in the affairs of the county veterans' association. He never forgot that he had been a soldier. In August, 1893, he published in The Gazette a carefully compiled roster of his company, and in July, 1894, he followed this with a diary kept by J. E. Rhyme supplemented by notes of his own.

Major Petty for many years held membership in the Providence Baptist church in Spartanburg county, S. C.; but at the time of his death was a member of the church at Clover. He expressed his entire trust in God, and calmly and deliberately made his preparations for eternity.

HOUSEHOLD GODS. The ancient Greeks believed that the Penates were the gods who attended to the welfare and prosperity of the family. They were worshipped as household gods in every home.

W. H. Tanner, cashier of the American National Bank of Nashville and Treasurer of the Centennial exposition, committed suicide last week in the house of Birdie Simmons.

The Encore Nuisance.

"One feature of the season's concerts in New York is the encore nuisance. The encore is an unmitigated bore, but never grows to such proportions as the disagreeable plant springs to full maturity in the 'popular' concert; and abnormal proportions stay away from the popular concert, no matter how attractive the program may be.

Net Bad Bill. Columbus, O., February 7.—Representative Parkers of Cleveland has introduced a bill which entirely changes the manner of regulating marriages. It provides for the appointment by the probate court of each county of a board of marriage commissioners.

AGRICULTURE. From the Circuit. February 1896.

William Maxwell Everts has just passed his eightieth birthday. The venerable lawyer and statesman is one of America's most distinguished octogenarians. He has been one of the most talked of men in the country, the only lawyer who ever got a single fee of \$500,000, the man who helped to make Rufus B. Hayes president of the United States, who defended President Johnson on impeachment charges, who defended Henry Ward Beecher in the Tilton scandal, who represented the United States in arranging the \$15,000,000 Alabama claims, who delivered the wonderful oration at the Centennial in Philadelphia in 1876, who was secretary of state under Hayes and United States senator from New York.

From all the cotton states comes the cry that the cotton acreage must be reduced. The way to do that is for each farmer to reduce somewhat. If each one is selfish enough to believe that all others will reduce and that he can make a good thing by doubling his crop, eleven million bales of 4-cent cotton will be made.

From everywhere comes word of praise for Chamberlain's Cough Remedy. "Allow me to congratulate you on the merits of your Remedy. It cured me of chronic bronchitis when the doctor could do nothing for me." —CHARLES F. HEMEL, Toledo, O. For sale by H. A. Ligon, Druggist.

Chicago has a vegetarian restaurant where no meats are served. It is said to be popular and quite successful financially. Some Boston people are talking about establishing one in that city of beans and brains.

The February Outlook.

The February Magazine Number of The Outlook contains an unusually large number of stories, sketches, poems and light articles. Among the illustrated articles will be found a paper on "Lincoln as a Literary Man," by Hamilton W. Mable, with a portrait and a facsimile of the Gettysburg address; the second installment of Dr. Edward Everett Ha's "James Russell Lowell and His Friends," which deals chiefly with Lowell's life in college and at Concord during the period of his rustication; an article on "Municipal Toronto," by Mr. W. D. Gregory, a well-known Toronto journalist, who here makes a special study of some peculiar features of the municipal administration of Toronto; and an extremely readable paper on "The Highlands of Kentucky," by Grace F. Ryan, accompanied by several picturesque illustrations.

There is a promise that some of the enterprising people in the up-country will settle the "adulterated flour" question for this State in the best possible way—by making pure flour, and a plenty of it, for home consumption. Our Yorkville correspondent reports that an unusually large area has been planted in wheat in York County, and that there are three new patent process roller flour mills in the county, and there is good reason to believe there will be another. There are several such mills in Spartanburg County, also, and our correspondent at Spartanburg reports that one, which will make sixty barrels of flour a day, will be ready for work by June 1.

SOMETHING TO KNOW. It may be worth something to know that the very best medicine for restoring the tired out nervous system to a healthy vigor is Electric Bitters. This medicine is purely vegetable, acts by giving tone to the nerve centres in the stomach, gently stimulates the Liver and Kidneys, and aids these organs in throwing off impurities in the blood.

After the freezes last week the plows started again in this county. Farming in the right way is a very exacting business. No one can fool around the stores and railway stations the first three months of the year and make a crop. The fact is such men make nothing but poor husbands and a character for idleness.

A few months ago, Mr. Bryan Every of Woodstock, Mich., was badly afflicted with rheumatism. His right leg was swollen the full length, causing him great suffering. He was advised to try Chamberlain's Pain Balm. The first bottle of it helped him considerably and the second effected a cure. The 25 and 50 cent sizes are for sale by H. A. Ligon.

Let the farmers finish sowing oats as soon as possible. Then prepare the upland corn at once by bedding out the rows five to six feet apart. Bear in mind that a well filled corn crib is a great comfort the first day of March. It heats hungry horses and lien corn and lay.

Has your preacher called on you this year? Another question is this: Have you called on your preacher? That business of pastoral visiting works both ways. Many of the laymen are two lily, or indifferent or worldly even to call on their pastor.

MURDEROUS MICROBES

Breeding and Feeding in Human Intestines.

There are seventy-five different kinds of microbes in your mouth alone. Any one of them under proper conditions can develop into the cause of serious illness. Millions of microbes, bacteria, ptomaines, disease germs of every kind, live and feed and breed in the stomach and bowels. For their propagation it is only necessary for the liver and intestines to become lazy and operate irregularly. The undigested food then remains in the stomach and bowels and rots, forming a perfect hot-bed for the cultivation of disease breeders. They get into the blood, poison the brain, the heart, the whole system, disease eruptions, liver spots, green complexion, fever, bad breath, belching, sick headache, general lassitude, loss of energy and a thousand other serious symptoms are a consequence.

Harris Lithia Water

Why Buy a water whose analysis shows that it is worthless after being shipped? There are a great many waters of this kind on the market. Harris Lithia Water analysis shows that it retains its virtues after being shipped. Does the analysis of the water you are drinking prove the same? If the Harris Lithia Water is not superior to any other water on the market, do you think such eminent physicians as Dr. A. N. Talley, Dr. S. M. Davaga, Dr. Howe, Dr. O. B. Mayer, Dr. Thomas McLevy and hundreds of other noted physicians in South Carolina besides such physicians as Dr. Thos. E. Powell, president of Southern Medical College, of Atlanta, Ga.; Prof. Joseph Jones, of Tulane Medical College, of New Orleans; Prof. Theo. Lam, of Augusta, Ga., and many other just as noted would certify to it if it was not so? They have no interest in the Harris Lithia Water. It seems that with the analysis and these testimonials you ought to be convinced of its superiority.

Testimony of Dr. A. N. Talley, Columbia, S. C.

After a long and varied experience in the use of Mineral Waters from many sources, both foreign and domestic, I am fully persuaded that the Harris Lithia Water possesses efficacy in the treatment of affections of the kidney and the bladder unequalled by any other water of which I have made trial. My opinion is based upon observation and is based upon my patients for the past three years, during which time I have prescribed it freely and almost uniformly with benefit in the medical maladies above mentioned. A. N. Talley, M. D., Columbia, S. C., October 8, 1892.

Testimonial of Dr. S. M. Davaga, Chester, S. C.

Dear Sir: For the past eight months I have been using Harris Lithia Water with the most excellent results where I have been able to get my patients to drink a sufficient quantity daily. The carbonated is as no equal in gastric disturbances. It is a pleasant laxative, and is a sure cure for Flatulent Dyspepsia. S. M. DAVAGA, M. D., Chester, S. C.
