

EVANS' Semi-Annual Clearance Sale

Begins Friday, July 1st and Continues 15 Days--- *This sale takes in our entire stock of Men's, Women's and Children's Oxfords and Slippers, Men's Furnishings and Hats. This sale is given twice a year and means a great saving on every article we offer. This year the retailers all over the country are facing new merchandise problems. They must cut their stocks to a minimum and must make their turn over more rapid. This store is no exception and this Clearance Sale is one of the means by which we hope to accomplish this end. This sale is for cash and cash only.*

W. W. EVANS & CO.

CITY'S BARGAIN FEAST WILL BEGIN ON NEXT FRIDAY

GREAT SEMI-ANNUAL EVENT IN MERCHANDISING TO CONTINUE FOR FIFTEEN DAYS.

RECORD MADE PRICE SLASHING

Full Appreciation Shown for Changed Economic Conditions in the Selling Values That Have Been Fixed by the Merchants.

(From Wednesday's Daily Herald.) Columbia's semi-annual bargain feast will begin on Friday next when the stores of Anderson Bros. & Foster, Maury Dry Goods Company, W. W. Evans & Company and the J. Rosenthal Company are opened for business. The semi-annual bargain feasts are almost an institution. They have been established customs of progressive Columbia merchants for so long that many housekeepers plan their household and wardrobe purchases with them in view.

With tumbling prices on farm products and manufactured goods general and with the Columbia bargain giving merchants determined that so far as is possible they are going to adjust selling prices of their goods to the changed conditions in the country, this year's summer bargain event is going to be the most notable one in the history of these sales.

Prices have been made that show the extent to which values have been slashed during the past year. All that is asked in order to convince one of this statement is a comparison of what is offered now with what was priced a year ago.

These sales will last for only fifteen days. They are strictly cash events. No charges will be made during the period of the sales, for the reason that one of the main objects of making the heavy sacrifices involved is to convert merchandises into money and be prepared for the coming season's trade. It is expected that not only will Maury countians be attracted to this bargain feast but that appreciative buyers from other counties will also be here.

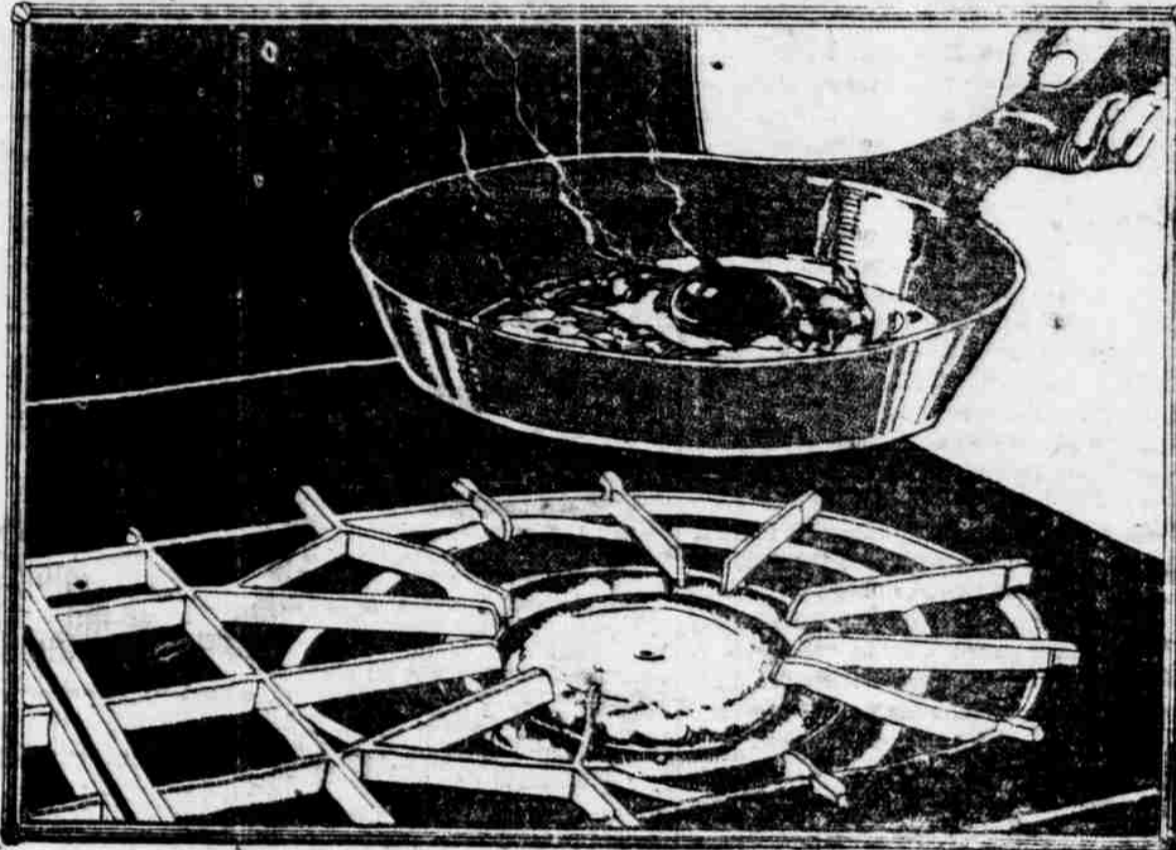

THIRTY BUSHELS OF WHEAT TO ACRE

(From Tuesday's Daily Herald.) Wheat yields of as high as thirty bushels per acre have been reported on a limited acreage. Van Tankersley on the Halliday place south of Columbia made thirty bushels on one field. It is expected that the total yield of wheat on this place will run around 32,500 bushels.

FORMER MISSIONARY PREACHES IN COUNTY

(From Tuesday's Daily Herald.) Rev. J. T. Redmon, from New Mexico, has been in the county for several days visiting old friends. He preached Sunday at Cross Bridges and Sunday night at Culleoka. He was formerly missionary from the First Methodist church here to the Isle of Pines but in recent years has been in the West for the benefit of his wife's health.

There are said to be nearly 20,000 known medical remedies.

Have you thought that to prepare a big dinner perfectly and quickly required a city gas range? Any cooking—large or small—is easily, quickly and economical done, on the Red Star Detroit Vapor Oil Stove the advanced type, all-the-year-round oil stove.

It will cook a 5-lb. beef roast to delicious tenderness in 1 1-2 hours; boil potatoes perfectly in 20 minutes; cook string beans in one hour and turn out baking powder biscuits, tender and flaky, in 12 to 15 minutes.

These remarkable results are due to the big 8 1-2-lb. gray iron Red Star burner. It converts kerosene, gasoline or distillate into gas. Gives a double ring of hot, blue, gas flame. In operation the burner becomes red hot—adds this intense heat directly beneath the cooking utensil. Gives 19 hours of wonderful cooking heat from each gallon of fuel. Saves 25 per cent of fuel and does work equal to any gas range.

Come in and see it demonstrated by Factory Expert

Thursday and Friday, June 30 and July 1

See how, with this stove, you may have the same convenience as with a city gas range. We'll be glad to show you any time.

Enough Heat From Oil For Every Kind Of Cooking

HEAVY DAMAGE FROM WIND AT FARM STATION

AUDITORIUM OF ADMINISTRATION BUILDING UNROOFED AND WALLS DEMOLISHED.

(From Wednesday's Daily Herald.) Wind on Tuesday afternoon during a hard shower did damage at the Middle Tennessee Experiment Station estimated at from \$4,000 to \$5,000. The

entire roof of the "L" or auditorium of the administration building was blown off and the walls of the main building cracked and otherwise damaged.

The wind was of terrific force for it blew the metal roof of the auditorium, a structure that would weigh many tons, not less than seventy or seventy-five feet and blew down the brick walls of this portion of the building. The walls were badly damaged and a hurried estimate of the loss of the building made by Superintendent Hume, aggregated about \$4,500 and probably more.

The loss from the wind was fully covered by insurance. Altogether the state, which owns the property

through the University of Tennessee, carried on the administration building \$10,000 of cyclone or wind storm insurance, divided between the Columbia Insurance Agency and Hendley, Thomas & Hendley.

There was little wind in the city and general surprise was expressed when news was received of the loss at the station. Between the station and the city there was a severe wind that blew down forest trees at the homes of John F. Stephenson, Ned J. Dais and others and also felled some telephone poles.

The administration building, a two story brick structure, was erected by the University of Tennessee in 1918. The "L" or auditorium, built as a

salesroom and intended for public meetings, was only one story, but it was a substantial structure.

ENORMOUS DEMAND FOR ICE AT PRESENT

BUT WEATHER WAS ANTICIPATED AND LOCAL CONCERN'S SERVICE IS UNIMPAIRED.

(From Tuesday's Daily Herald.) Local demand for ice during the past ten days has probably exceeded any previous ten days in the history of the local ice plant. It is ahead of

any similar period of last year. This has been due to the excessive heat, Monday being one of the hottest days on record. While the mercury did not go to a record mark, the average heat was probably equal to any day in recent years. A remarkable feature of the day was that it was hottest at 7 o'clock when usually it is hottest at 2 or 3 o'clock. The weather bureau at Nashville reported a temperature of 90 degrees at 11 o'clock last night.

Despite the tremendous demand for ice the Columbia Ice & Cold Storage Company has met every requirement. Its deliveries have been prompt and there has been little complaint of service. Manager Kloepfer has good reason to be proud of the success of his

efforts to give the people the best of service. Despite the fact that right at present the demand for ice is slightly in excess of plant capacity there is no danger of an ice shortage, because Mr. Kloepfer prepared for an emergency by filling his storage capacity.

Admiral Sims has left England, but that doesn't make much difference, for Ambassador Harvey is there and booked for a long stay. —Omaha World.

An omelette or a piece of fish, with fruit to follow, is said by one diet expert to be the ideal midday meal for a
