"Dress Makes the Man."

Costume may be said to have a controlling influence over conduct and character. Dress a person well, and other things being equal, he will be the more inclined to act well.

Self-respect is fostered and fed by cleanliness and good clothing. Dress has undoubtedly a moral effect upon the conduct; negligence of dress begets negligence of address.

Tailors, therefore, are among those who conserve good habits and manners. We all know the importance of outward appearances; and, since so much of our success in life is often covered up in broadcloth, it is polite for us to keep on good terms with our tailor.

"A tailor make a man! Ah, sir, a tailor!" Titian on one occasion was passing through a street in Milan in his working-garb, unnoticed by the populace.

He returned home, and arrayed in his customary costume of purple velvet, reappeared in public, when everybody did him homage. On returning to his studio he took off his long velvet cloak, and, throwing it upon the ground, exclaimed: "Thou, then, art Titian—who one day dropping his brush, Charles V., who was in his studio, picked it up, and presenting it to the astonished artist said, 'It becomes Caesar to serve Titian!'"

If Titian was nothing to the common people without his robe, we see how very unwise it would be for any one else to disparage his tailor. He it is, we must remember, who helps us to cut a good figure in society; and it would be suicidal for us to cut him!
