

Texas Corn

Texas is a world's force in agriculture. Withdraw our farm products from the market and the people of two hemispheres will go hungry and shiver with cold.

1910 VALUE PER ACRE

The chief products of Texas in order of their value, as estimated by the Federal agricultural department for 1910, are cotton, corn, wheat, oats, hay, rice, potatoes, etc.

Our corn acreage in 1910 was 8,500,000 and production 181,280,000 bushels and it had a farm value of \$114,206,000.

EL PASO TELLS HER TROUBLES To the "Want" Columns of The Herald. When there's an unexpected vacancy in the office or factory force, it's a Herald Want Ad that gives notice.

When there's something valuable lost or a tenant leaves, a call to Bell 116, Auto 1115, tells the news. El Paso has learned that Herald "Want" Ads are the best resort in an emergency.

Cautious. In the village of Pottou a woman fell into a trance. After the Politevin custom, she was wrapped in a sheet to be carried to the cemetery, but as the procession was passing through a narrow road a thorn of the wayside pierced the sheet, wounded her so that the blood flowed, and she awoke.

Healthy Mothers

The bearing of children is frequently followed by poor health for the mother. This supreme crisis of life finding her physical system unprepared for the demands of nature, leaves her with weakened resistive powers and sometimes chronic ailments. This can be avoided if Mother's Friend is used before the coming of baby, and the healthy woman can remain a healthy mother.

Dividing a Penny. The difficulty of obtaining a farthing as change in the province was experienced as long ago as the reign of Henry VI. In 1444 a petition was presented to parliament stating that for want of halfpence and farthings men "traveling over countries, for part of their expenses of necessities, must depart our sovereigne Lord's coigne, that is to wete, a peny in two peeces, or elles forgo all the same peny for the payment of a halfpenny."

When he has covered El Paso by means of The Herald he can only hope to reach 400 other homes if he uses all other mediums combined. How much can he afford to spend for these 400? Just figure it. A full page advertisement in The Herald costs him just three-tenths of a cent for each family. How much per family can he afford to pay for delivering his page advertisement to the other 400 families?
