

Inspiration Pushes Underground

Miami Mine Makes An Advance of 3,300 Feet

Crushing Plant at Scorpion Shaft Is Again in Operation.

M IAMI, Ariz., Dec. 17.—During the month the Inspiration Consolidated has made a total advance in its underground workings of 3,300 feet...

Connection was made with the main east shaft on the sixth level and connection on the same level with the main west shaft should be made soon.

Crushing Plant Operated. The crushing plant at the Scorpion shaft is again in operation crushing the waste from that section of the mine.

Steel Has Arrived. The steel for the coarse crushing plant and main east and west shafts double head frame has arrived and has been unloaded...

Three No. 8 gyratory Allis-Chalmers crushers have arrived and are being unloaded in Webster gulch.

Crosscut Is Driven. At the Superior & Boston the crosscut on the 800 level is being driven to intersect the vein out off by a fault...

At the Arizona Commercial the shaft has reached a depth of 1,250 feet. Work on the 1,200 is still suspended pending installation of pumping equipment...

At the Iron Ore shaft the ventilation at the mine is virtually perfect since connection with the Burela shaft of the Arizona Commercial was established.

New Source of Radium Is Discovered

By Garrett P. Serviss

IN view of the growing belief that radium holds out the promise of victory over some of the most terrible and intractable diseases that afflict humanity...

The first radium ever known was discovered in the mineral pitchblende, a blue-black heavy substance, found in considerable abundance at the mines of Joachimsthal in Austria...

Now, however, this monopoly has been broken, for it has been found that a new mineral (carnotite, named in honor of a former president of France...

CRNAUER IS IN GOOD COURT

Stories of Disorders Are Declared Exaggerated; Coal Vein Struck.

DOUGLAS, Ariz., Dec. 17.—Cannanea conditions are better at this time than at any period during the last year...

Two feet of solid shipping ore, carrying copper and silver values, has been struck in the Chief mine at Patagonia...

The Cohre Verde property, eight miles northwest of Cadillona, Sonora, has opened up a good body of ore according to recent arrivals.

John West, a homesteader and goat raiser whose place is located about 20 miles north of Douglas, has brought in samples of soft coal which he said he had discovered by his son-in-law...

WILL BUILD ELECTRIC ROAD TO NELSON MINE. Prescott, Ariz., Dec. 17.—Within the next six months a narrow gauge railroad will be built from Crown King...

PLACER COMPANY HAS ELECTION OF OFFICERS. Santa Fe, N. M., Dec. 17.—The Round Hill Gold Placer Mining Company has held its annual meeting and elected the following officers...

At the Arizona Commercial the shaft has reached a depth of 1,250 feet. Work on the 1,200 is still suspended pending installation of pumping equipment...

RESCUE WORKERS BRING TO RESPOND

Director of Mines Bureau Pays Tribute to Safety First Men.

Washington, D. C., Dec. 17.—From the increasing number of reports being received by the United States bureau of mines, of miners rescued from death in accidents, it is becoming apparent to the officials that the general "Safety First" movement, inaugurated by the bureau, has already reached a stage of great effectiveness.

"Since the bureau of mines was created," said Dr. Joseph A. Holmes, director of the bureau of mines today, "in speaking of this part of the work, our rescue men have trained 5,000 miners in the use of the modern rescue apparatus and the principles of first aid to the injured."

"All through the year these men have been answering the emergency call of the miner in many instances rushing into death, in the faint hope of bringing back a father to his family and a soldier to his comrades."

"The bravery of the miners has never been questioned. There has never been a time when a miner who has been rescued has not responded to the call of duty that he is performing the highest duty that is possible for a fellow man."

Two shafts will be sunk on property Calumet & Copper Queen Mine. Ray, Ariz., Dec. 17.—A. W. Scott a mining engineer of New York city, has just closed a deal for the purchase of the Arizona King mine situated a few miles from Ray in the Box canyon.

At the Arizona Commercial the shaft has reached a depth of 1,250 feet. Work on the 1,200 is still suspended pending installation of pumping equipment...

A Little Detective on a Great Machine

Accuracy is the basic principle of the Remington Adding and Subtracting Typewriter

(Wahl Adding Mechanism).

The machine is accurate. But this is not all. It enforces accuracy on those who use it. Likewise it admonishes to accuracy all those on whose work it affords a check.

It detects errors. It likewise prevents errors. Fewer errors are made in every office where the

Remington Adding and Subtracting Typewriter

is used. Why? Because every clerk knows that this machine will infallibly detect his errors and this knowledge makes him more careful in everything that he does.

Thus the machine adds accuracy to mechanical labor saving in every kind of work where writing and adding are done on the same page.
