The district is in American territory. Circle City has been depopulated and a wild stampede of prospectors from all the surrounding country is in progress. As yet few have reached this discovery.

GALVESTON-NEW ORLEANS LINE.

Proposed to Keep the Fast Boat Anthon in the Service. Galveston, Texas, January 18.—A. S. Newman of this city informed The Post correspondent this afternoon that the steamer Anthon would be a regular steamer service established between Galveston and New Orleans in the near future. The steamer Anthon, one of the fastest ships that ever came to Galveston, is the vessel that will be placed in the proposed service if the plans materialize. She was built by the Gulf Fisheries company and brought here several months ago, since which time she has been lying in the yard of the Cameron Shipyard, where this company has a few of fishing schooners. It seems that the ship was not exactly what is desired for this purpose and that the company thinks she can be used to a better advantage.

METEOR FOUND NEAR HITCHCOCK.

Was Still Burning When It Was Observed Shortly After Falling. Galveston, Texas, January 18.—Mr. L. Palmer brought the remains of a meteor here this afternoon, which he states fell in his yard near Hitchcock a few nights ago. It is a piece of rock weighing about twelve ounces. It is triangular shaped and of a dark brown color. Mr. Palmer says that it was burning when it struck his yard and continued to burn for one hour and twenty-seven minutes after it fell. Several of his neighbors gathered and gathered in time to see it burning. It fell on top of the house and it would either have broken through the roof or have set fire to it. A few smaller pieces were scattered about the main piece after it had burned. Mr. Palmer states the rock sent forth a sulphurous odor when it had cooled off there it resembled many rocks which are seen at various places.

NECHES IS ON A TEAR.

Six-inch Rise During the Past Twenty-four Hours. Beaumont, Texas, January 18.—The Neches river is again on a tear and is rising rapidly at the rate of six inches in twenty-four hours, which is an amount of the fact that it is so near the levee, is regarded as a pretty big rise. It has been up at least four feet higher than the low water mark for at least three months, and has been practically stationary since that time, though it took a sudden upward turn during the period immediately following the big flood. The river is thought to be helping Kalamine pass material by the rate of falling, on account of the sweeping out of the channel that must be going on.

EXPERIMENTS CONFIRMATORY.

Dog Restored to Life After Being Dead Fifteen Minutes. Cleveland, Ohio, January 18.—Many doctors of Cleveland are inclined to consider the experiments which have been carried on by Dr. F. C. Cline during the past week as successful. After anesthetics had been administered to a dog, the suspension of respiration was effected by clamping the windpipe. After the dog had been apparently dead for fifteen minutes a few drops of adrenalin were administered and artificial respiration resorted to. This treatment restored the dog to a comparatively conscious condition. It is said that adrenalin has not been tried on human beings, and that its effect on man is not known.
