

CONSULT MANUFACTURER OF TRUCK BEFORE CHANGING ITS EQUIPMENT

At the truck and tractor meeting of the Society of Automotive Engineers held in Chicago...

Mr. Norton said: "The question of whether heavy motor trucks should be equipped with solid or pneumatic tires is one of the most important problems confronting the motor world today."

Changes Are Constant "In the first place, it should be considered that conclusions which appear sound today may have to be modified in time by changes that are gradually but constantly taking place."

The functions of tire equipment are: (1) to secure traction; (2) to cushion the mechanism and the load; (3) to protect the road.

The Trailmobile

NEVER before have the transportation systems of this country been subject to such demands for greater efficiency than at present.

The Trailmobile is a motor truck with a trailer. The Trailmobile has this rugged construction and efficient design.

We are in a position to make immediate deliveries on general orders of Trailmobiles. In many instances you can double your loads without undue strain on the motor.

Ship by Truck. THERE are eleven motor truck freight lines operating in this territory. Every bit of freight shipped by truck relieves the railroad freight congestion just that much.

There are eleven motor truck freight lines operating in this territory. Every bit of freight shipped by truck relieves the railroad freight congestion just that much.

Pneumatic Tires For Trucks Cut Cost, Is Claim

Pneumatic tires for motor trucks cut highway transportation cost in half by permitting twice the speed, with safety, that solid tires permit.

These are a few of the arguments made for the pneumatic tire in the "Ship by Truck" movement by the most prominent engineers in the tire building industry.

So skillfully are these tires made and so rigidly have they been tested by the producers that the truck owner gets the maximum service from pneumatic tires.

CORD tires are made of thousands of cable cords floated layer on layer in new live rubber.
