

WILL BE BUILT. IMPROVEMENTS EVIDENT

Washington County People Have Subscribed Necessary Capital. Labor Controversies Have Become Less Threatening.

WAGES ADVANCE WERE VOLUNTARY. In Some Instances—Freight Congestion Has Been Relieved and Deliveries Are Made Promptly.

New York, March 21.—B. G. Dun & Co.'s weekly review of trade movement will say: Evidence of further improvements are numerous. Labor controversies are less threatening, many settlements having been effected, while others are momentarily anticipated. Wages have been advanced only through strikes, but in some cases voluntarily; traffic congestion has subsided until it is possible to deliver goods according to specifications. Aside from some idle footwear shops, the leading lines of manufacture are very fully engaged, while the jobbing trade is of exceptional magnitude. Retail dealings are also very large, the Easter stimulus being felt in all lines of wearing apparel with demands so vigorous it is especially encouraging to notice a gain for the last week in foreign trade at the principal ports.

Pressure for iron and steel has not diminished there perceptibly, yet the improvement is growing that after July 1 the situation will become approximately normal, and it will be possible to secure deliveries with less delay than at present. For some time to come it is probable that foreign commerce exhibits as to this industry will be less satisfactory, but it is worthy of note that imports are mainly of raw materials and sheets, while the exports of many lines of expensive machinery and finished products are well maintained. Large contracts are constantly under consideration for structural material on important projects including railways, bridges, viaducts, car shops and office buildings. In this respect the domestic construction which has been going on at a steady pace all winter, weather has brought about a feeling of uneasiness.

Both at the East and West there is a little more activity in the iron and steel industry. The market has hardened. Business under the new conditions has not yet been sufficiently large to establish quotations, yet some advances of 2 to 3 cents are reported. Export sales are still checked by high prices. A heavy increase in the increased demand at southern jobbing centers.

Grain markets have begun to feel the effects of weather reports and for the past few months it would be a simple matter for speculators to secure erratic fluctuations. Wheat is now quoted on a basis of 1931-32, and last year's serious injury to corn crops was the increase in exports of wheat and flour to 4,877,000 bushels, against only 2,508,000 bushels in 1930-31. Western receipts continued to make an unfavorable comparison with the previous year, amounting to 2,550,000 bushels, against 4,175,000 and corn 1,400,000, compared with 3,021,000. Atlanta exports of corn increased largely over the low record of the preceding week to 38,884 bushels and there is still a severe loss, compared with the 2,557,272 bushels of 1930-31. The crop is expected to be a bumper one, but the response to Mr. Noyes' restoration of its early estimate placing the yield at 1,200,000,000 bushels is not a very big one. It will be a bumper crop.

Damage Near Wallis. Wallis, Texas, March 21.—A very hard rain fell for about an hour yesterday, accompanied by lightning and a strong wind. In two places the wind reached the point of a tornado, blowing down a power line for H. Haxton at Obyed and a power line for H. Haxton at Obyed and a power line for H. Haxton at Obyed.

Damage by Storm. At Winchester Confined to One Store and One Residence. Winchester, Texas, March 21.—The young cyclone that struck here yesterday evening, of which report was made in the Post yesterday, was about the worst that has visited this place. It began raining shortly about 3 o'clock with wind from the south west and at 3:30 o'clock it seemed to be taken up and carried north by a gust of wind, accompanied by hail, when all of a sudden a regular "cyclone" which lasted for about ten minutes, but far more than anything from the earth, and had a force of many miles per hour, probably from the north west, hit the town, blowing down a power line, and doing considerable damage to the business houses and badly damaged one residence. The damage to the residence of Mrs. J. D. Decker is the worst. There were several persons in the building, but they were not injured, and the cyclone was not a very big one. It will be a bumper crop.

THEY WERE BOTH PASSED. The Bills to Repeal War Revenue Taxes and to Protect the President.

THE FIRST WAS PASSED WITHOUT DIVISION. THE SECOND RECEIVED A MAJORITY OF THIRTY-SEVEN OF THE SENATORS WHO VOTED—TILLMAN WANTED THE TAX ON TEA RETAINED.

Washington, March 21.—Two important measures were passed by the senate today, the bill for the repeal of the war revenue taxes and that for the protection of the president of the United States. The revenue bill was passed without division and after only one short speech.

Mr. Tillman embraced the opportunity afforded by the bill's consideration to protest against the repeal of the duty of 10 cents a pound upon tea.

The bill for the protection of the president was under discussion the greater part of the session. Mr. Patterson (Colo.) made an extended speech in opposition to it, and Mr. Fairbanks supported it. All amendments to the measure were rejected and it was passed by a vote of 32 to 15.

The revenue bill provides that any person who shall willfully and maliciously obstruct or hinder any officer upon whom the duties of president may devolve, or any sovereign of a foreign country, or shall attempt to kill any of the persons named, shall suffer death.

Mr. Fairbanks, chairman of the committee on agriculture, also presented a bill to amend the antitrust laws. The senate will probably act upon it before the adjournment.
