

THE NORTHERN LIGHT

But Few Shares Were Sold As Delinquent.

BUYERS WERE PLENTIFUL

HIGH ESTEEM WITH WHICH THIS PROPERTY IS HELD.

The Mining Congress—An Awakening to the Importance of the Enterprise—Leading Citizens Contributing Liberally—Sacramento Buoyant—Geyser-Marion, Four Aces and Galena Steadily Pushing Upward—Prospects at Dugway—Good Ore From the Gold and Silver Carbonate Mine—A Voice From Klondike—A Former Park City Miner Is Meeting With Success—Copper River No Good—Klondike Reports Are Exaggerated and Often Untrue—The Morgan of Hardscrabble—At the Homestake—Silver and Lead—Mining Notes and Personal.

The sale of delinquent Northern Light stock, an account of the recent assessment of 10 cents a share, which was held at the office of the company yesterday afternoon, was well attended, and the 2,500 shares that were delinquent were purchased by Messrs. E. L. Steets, E. H. Airie and C. E. Hudson, the price paid being 21 cents a share, which was the top price bid on the floor of the exchange in the morning for this security.

This sale of delinquent stock has been looked forward to by many who were of the opinion that when it took place they would have an opportunity of picking the shares up cheap, and that any amount of it would be offered. It caused considerable surprise, therefore, when it was learned that the assessment had been so closely paid in, and that the insignificant amount of only a little over 100 shares remained to be disposed of to the highest bidder and of this only enough was sold to pay the assessment and costs.

As a matter of fact, the way that has been paid in, speaks volumes for the stock, more than columns of newspaper talk, and shows only too plainly how highly the stockholders of the company esteem the property, and the confidence they have in its ultimate outcome.

It was owing to unforeseen circumstances that the company was obliged to levy the assessment, the payment of which has just been completed, but taking the history of the property since its incorporation, the fact that so much of the stockholders of the company had faith in the mine at the start are still loyal to their first statements, and are just as confident as ever that it will live up in time as one of the great dividend payers in mining circles, and of the original incorporators and heavy stockholders are just as positive today that the mine is all right as they were two years ago, when they were expected that in the course of the next six months it will begin the distribution of "silver."

Bad management has been alleged against the company, and it is doubtless true that it has been remiss in some instances, but the fact remains that the first prospecting material brought about through the instrumentality of scappers, and the circulation of detrimental reports against the property, some of which were decidedly false, and then the collapse was a natural consequence, but there is reason to believe that in time to come the Northern Light will strike a mint of money for its shareholders.

In the history of mining it would be a "seven days' wonder" if everything connected with the mine, as planned, would be a surprise in mining circles. If a ledge was cut exactly according to calculations, if a mill was ready to start according to contract time and successfully the first, and yet there are those who

for unlooked-for contingencies, for accidents, for breakdowns and for a hundred other hindrances and delays which are nearly always the accompaniment of mining enterprises, and which are put through on a large scale, and it is this class of people who are largely responsible for the continued decline in the price of the stock, and who have used his powerful lever in giving it its downward impetus.

As it is, there are mining men of means who will stake their money on their lives, and that the Northern Light is one of the biggest mines in the west, and the fact that it has produced its mine in the past, and will give some weight to their statements and assertions.

At the present time everything is in readiness at the mine and mill for what is believed to be the start of the mining, as soon as the pipe line is thrown out, and it is thought that it will be but a few days before this is accomplished. The mill is in shape so that it can handle over 100 tons of ore daily. The mine shows a tremendous amount of ore in sight, and the work of reduction has been brought to such a state of perfection that there is scarcely a doubt but that as soon as the water is released and the plant started up, a clean-up will be made within 20 days that will be a surprise to even the most sanguine stockholder or operator.

Until then, and until the company has had a chance to show what it can do under favorable circumstances, and with the mine in its working order, the public at large should withhold judgment and give this enterprise a fair showing, remembering that it took several years before the Mercury proved itself to be a mine, and that nearly every successful mining enterprise in the west has had an experience similar to that which the Northern Light has just come through, only possibly worse.

SACRAMENTO BUOYANT

Geyser-Marion, Four Aces and Galena Steadily Pushing Forward. The volume of business transacted in the pit of the stock exchange yesterday was not large, but there was an excellent tone to the market, and the sales that were registered were made at higher quotations than the closing figures of the previous call.

Four Aces was the first security to find a buyer and a block of 500 shares was snapped up at 7 3/4 cents, the stock in board lots being bid at 3. Geyser-Marion also disclosed strong upward tendencies, and was in demand, the sales being recorded at this figure, more being wanted at the close at this price without drawing out any more of the stockists. Galena, which was bought over night, and sold at an advance over previous quotations. Horn Silver touched 1/2 in the bidding with no sellers in the pit. The amount was inactive and not overly strong, which is no change in Mercury was observable. Northern Light showed considerable fluctuation, and set the stock was strong as recorded during the meeting of the bidding, one bid of 21 cents being posted, but this was later on withdrawn to 20 1/2. As predicted in yesterday's issue of The Herald, Sacramento experienced a reaction, and checking its downward tendency, advanced to 4 1/2 cents in the

building, and at the close the stock was very strong. The United stocks were neglected to a certain extent and did not figure in the dealings of the hour. Swansea and South Swansea were quiet, while Dexter touched the dollar mark again in the bidding. Chloride Point was firm in the holdings and was practically unchanged in its quotations. The transaction of the day were as follows:

SALES OF STOCKS. 200 Four Aces at 7 3/4 cents. Geyser-Marion at \$1.95. 100 Galena at 8 1/2 cents. 100 Sacramento at 4 1/2 cents. 200 Swansea at 4 1/2 cents. The closing quotations were as follows:

PROSPECTS AT DUGWAY.

Good Ore From the Gold and Silver Carbonate Mine.

Mercur, March 22.—J. A. Ferbrache returned from Dugway a few days ago bringing with him a hundred pounds of ore as a sample from the Gold and Silver Carbonate mine. The shaft on the property is about 25 feet deep, and at some distance the ground has been highly mineralized. The vein has been followed from the surface and the rich streak has been growing larger, until it is now about two feet thick, and carries rich carbonates. Should the samples prove to be as rich as it is believed to be, shipments will commence in a few days, and the mine will be of the same class of ore on the dump, and 500 pounds can be taken out daily.

On the 21st, which is the day that the first prospecting material has been found, and the owners are prepared to do some extensive development this summer.

The prospecting work is being done on the Buckhorn and the Diederich claims.

Everyone in the district is feeling hopeful about the future of the camp, and there are good reasons to believe that the railroad will reach there this season. As depth is being reached rich veins are being exposed, and it will eventually place the Deep Creek country in the front ranks of mineral producers.

THE MINING CONGRESS.

An Awakening to the Importance of the Enterprise. The appeal of the finance committee of the International Mining congress in meeting with a response from mining and business men that is most gratifying, and the larger the subscriptions the greater will be the success of the convention and its results, and all indications there will be a hearty cooperation on the part of Salt Lake citizens and Utah people, financially and otherwise, that the congress will be an affair such as will attract widespread attention, and like a magnet, will be the means of drawing to this international thousands of investors, capitalists and homeseekers.

Already the funds have touched the thousand dollar mark and over, and the following letters show the split and feeling of the leading business men of Salt Lake in regard to the movement. "THESE MEN ARE ALL RIGHT," McCormick & Co., bankers.

Salt Lake City, Utah, March 21, 1898. R. Mackintosh, Esq., Chairman Finance Committee, International Mining Congress. Dear Sir:—I am in receipt of your circular under date of 18th inst, in reply I beg to state that I am in full sympathy with the movement and realize the importance of this mining congress held here, and to that end I very cheerfully hand you my check for \$100, being the amount suggested in your communication.

A collection in our midst of several thousand delegates selected from the different states of the Union cannot fail to insure to our benefit directly or indirectly. I trust that our citizens will realize the significance of the proposed convention and unite in making it a credit and honor to our state. Yours respectfully, W. S. MCCORMICK. Salt Lake City, March 21, 1898. R. Mackintosh, Chairman, City. Dear Sir:—Your letter of March 18 at hand. We are very much pleased to learn that the international mining congress is to meet here in July. We also appreciate the efforts of the delegates representing Utah in getting this congress to meet in this city. The Nelson-Judson drug company is already ready to do their share toward furthering the interests of the state of Utah, or of the city of Salt Lake. We enclose you our check for \$50, which you ask us to send, and we hope you that we give it willingly. We hope that your highest expectations will be realized during the meeting of the mining congress, and that much good may result from it. Again wishing you every success in your movement. We remain, yours truly, NELDEN-JUDSON DRUG CO. (Signed) W. A. NELDEN, President.

Home Fire Insurance Company of Utah.

Salt Lake City, March 21, 1898. Hon. R. Mackintosh, Chairman Finance Committee, City. Dear Sir:—Accepting yours of the 18th inst, in relation to the Home Fire Insurance Company of Utah, I take pleasure in enclosing herewith check for \$25, in wishing you and your associates abundant success in your enterprise. I remain, Yours sincerely, H. J. GRANT, President.

Salt Lake City, March 21, 1898. Richard Mackintosh, Esq., Chairman Finance Committee, International Mining Congress, Salt Lake City, Utah. Dear Sir:—Your letter of the 18th inst, requesting a subscription from me for the benefit of the international mining congress, which is to be held in our city next July, has been duly received. In reply to same would say that it affords me pleasure to enclose you herewith my check for the sum of \$100 for the purpose named, and I trust that the convention will prove to be the greatest success in our history to anticipate.

Respectfully, A. W. MCUNE, (Signed)

Salt Lake City, March 21, 1898. Hon. R. Mackintosh, Chairman Finance Committee, International Mining Congress, Salt Lake City, Utah. Dear Sir:—Replying to your circular letter of the 18th, beg to enclose my check for \$25 toward the expense account of the proposed mining congress. If I can be of service to any of your committees, please call upon me; such time as I can find I will gladly devote to the furthering of their interests. Yours very truly, JAMES W. NEILL, (Signed)

THOSE WHO CONTRIBUTED. The receipts so far are: Charles Read \$25.00. White Mercantile company 25.00. Colonel E. A. Chance mill, at Bingham, is putting in two Wilbey concentrating tables. Prof. W. H. Tibbals, one of the active members of the stock exchange, has been called to Ohio to attend the sick bed of his mother. Sacramento and Four Aces were favored on the curb yesterday afternoon, the former being wanted at 4 1/2 cents and the latter at 4 1/4 cents. The Uncle Sam of Eureka marketed nine carloads of ore yesterday that averaged 35 per cent lead and 35 ounces in silver to the ton. Broker E. G. Woolley had the misfortune to lose his key yesterday by having it caught in the vault door at his office. The Niagara Mining company, operating on the East Fork of the Snake, yesterday for a consignment of nine cars of ore that carried the usual high grade in lead.

COPPER RIVER NO GOOD.

Klondike Reports Are Exaggerated and Often Untrue.

Ogden, March 22.—J. E. Tatman of Cripple Creek stopped over in Ogden yesterday, making a return trip from the Klondike country, but asserts that Cripple Creek is his home, and hereafter he will stay in Colorado. The gentleman left Seattle, having given him some decided views on the Klondike country, but his observations and his talks with men from that country have given him some decided views on the Klondike country. He finds that in that country, he says, are exaggerated reports, and he considers the transportation companies responsible for most of the exaggeration. Copper river, which he prospected, and also a number of other prospects, he pronounces a failure. No fortunes have ever been taken from Copper river. He did not go to Dawson City, but says the reports of that city are exaggerated. The paying claims are all located in that vicinity, but the gold lies in streaks. As an instance of how reports are being exposed, there was a prospect on the boat which he returned from Skaguay to Seattle, there were about 60 prospectors, discouraged and broke. The reports in the Marston, and cover and proceeded to take a dozen or so. Usually the man owing the most would tell the biggest story. Men who did not have \$5 to their names would claim to have \$25,000, and consequently when the boat reached Seattle the papers had already related that there was \$250,000 aboard, when, as a matter of fact, there was only Klondike treasure aboard. This boat was the Nayan.

The sickness and suffering at Skaguay and along the trail, is a fearful, awful. The outfitters and hotel men at Seattle are the ones who are making the money. Mr. Tatman's advice to parties contemplating a trip to Klondike is "Don't!" A VOICE FROM KLONDIKE.

Former Park City Miner Is Meeting With Success.

Park City, March 22.—Thomas Nestor, formerly an Ontario drain tunnel man, but now in the Klondike country, has been heard from, his letter having been written to the Marston. He has a claim on Sulphur creek, and has built a cabin. He is sinking a shaft in the cabin, but has not yet reached bed-rock. The shaft is now 25 feet deep, and he claims to have \$25,000 for his claim, but determines to keep it on himself and take the risk of realizing a bigger thing than the sum offered.

The late Bishop Morris was engaged at different times in the construction of furnaces in the mills here, having built five Stetefeldt furnaces in the Ontario mill, and three in the Marston. He also put in the masonry work for the big Cornish pump at Ontario No. 2.

Snow has been falling almost continuously for the last few days, and from three to five feet deep around the mining properties up in the hills. It will swell the supply of water from snow-fall beyond what most people anticipated.

The Morgan of Hardscrabble.

Although meeting with innumerable discouragements and set-backs, the Morgan of Hardscrabble is always scrabble, has never lost hope, and with a determination and exhibition of clear grit that is commendable, the officers of the company have continued on in the even tenor of their way, and The Herald is informed that today the company is out of debt and that it is the intention to have the machinery operated, the property owned by the association until the same is on a paying basis, one of the latest movements in his direction being the letting of a contract for 50 feet of tunnel work on a new ledge on the back end of the group, the contract being let to John Sterling and to associate.

The mentioned ledge is strong and well defined and carries free milling quartz that assays 27 ounces silver and 18 in gold to the ton, and it is believed that with due care the contents of the ore will materially increase and that before the summer is over this portion of the property will be on a paying basis, and that the machinery on the ground, intended originally for the leaching of copper ores, but which was never utilized, can be remodeled and used in the reduction of the ore from the new discovery.

The office of the company are located in Morgan county, just over the divide, at the head of the creek, and the mineralization of that locality is such as to justify the expenditure of considerable time and money in prospecting and the performance of development work.

At the Homestake.

On Monday of this week the new Knowles double-action station pump for the Homestake, at Silver City, was installed at the 350-foot station in the mine, and the works were started. This pump has a minimum lifting capacity of 150 gallons per minute, and although the water in the mine is only about 50 gallons per minute. Work is progressing steadily in the

development of the property, and a cross-cut is being run from the 400 level to the west for the main vein. This cross-cut is being run in a distance of 50 feet, the indications being that it will in 100 feet more a fine body of ore will be encountered, and so interesting is the showing at the present time that Manager J. P. Harris is putting in his whole time at the mine, and he is confident that within a short time it will join the ranks of steady producers.

A Big Suit.

Flagstaff, Ariz., March 22.—The attorney general of the United States has commissioned E. E. Ellsworth as special assistant United States district attorney to assist in the trial of the case of the United States vs. the Copper Queen Consolidated Mining Company. This is a suit by the government to recover \$185,000 from the Copper Queen Mining company for alleged timber trespass, and is probably the most important case of this nature in the west. The government claims that the result of a disagreement of the jury at each trial.

Silver and Lead.

The silver and lead quotations yesterday were as follows: Bar silver, 55 1/2 cents; exchange, 54 7/8 cents. Copper, lake, \$11.87 1/2; casting, \$11.90.

Ore and Bullion.

The ore and bullion receipts yesterday were as follows: McCormick & Co., ores, \$3,550. T. R. Jones & Co., ores, \$12,900; bullion, \$10,200. Hamberger & McMillan, ores, \$3,215.

Mining Notes and Personal.

W. B. Andrew of the Young America Electric Light and Power Co., at Bingham, is putting in two Wilbey concentrating tables. Prof. W. H. Tibbals, one of the active members of the stock exchange, has been called to Ohio to attend the sick bed of his mother. Sacramento and Four Aces were favored on the curb yesterday afternoon, the former being wanted at 4 1/2 cents and the latter at 4 1/4 cents. The Uncle Sam of Eureka marketed nine carloads of ore yesterday that averaged 35 per cent lead and 35 ounces in silver to the ton. Broker E. G. Woolley had the misfortune to lose his key yesterday by having it caught in the vault door at his office. The Niagara Mining company, operating on the East Fork of the Snake, yesterday for a consignment of nine cars of ore that carried the usual high grade in lead.

The Lenora of Bingham was in the market yesterday with a 14-ton lot of lead worth \$25 per ton, and 10 ounces in silver.

Hon. A. C. Washington, Hon. P. T. Freworth, John Sharp and Frank W. Johnson of the Horn Silver district are at Flagstaff making an inspection of the mine.

A lot of ore from the Joe Bowers, 18 tons in all, from near Diamond, was sold yesterday for 35 per cent lead and 45 ounces in silver to the ton, besides 30 cents in gold.

The Extra Session company has let another contract for 30 feet of sinking in the body of the mine shaft, the contract being for 30 feet of sinking in the body of the mine shaft, the contract being for 30 feet of sinking in the body of the mine shaft.

H. M. Ryan and W. G. Nebeker have returned from Chicago, where they have been on a business trip. Nebeker has been hindered by the fact of Sam Melville having filed an application for the patent on the Melville process in the Mining company. They are prepared to make a red-hot fight against the granting of the patent.

The last lot of ore from the Golden Eagle mine, in Central district, Humboldt county, Nevada, was sold yesterday for 35 per cent lead and 45 ounces in silver to the ton, besides 30 cents in gold.

Thomas Hindman, an old-time prospector, is in the city from White Pine county, Nevada, on a business trip. He is in the city from White Pine county, Nevada, on a business trip. He is in the city from White Pine county, Nevada, on a business trip.

At the close of the call of listed stocks on March 22, the exchange was closed at 100. The exchange was closed at 100. The exchange was closed at 100.

This Tells Where Health May Be Found. And that is more important than making money. If your blood is impure, Hood's Sarsaparilla is the medicine for it. It cures scrofula, salt rheum, rheumatism, catarrh and all other diseases originating in or promoted by impure blood and low state of the system.

Hood's Pills are easy to take, easy to operate. Cure indigestion, headache.

THE APPEAL DENIED

By the Supreme Court in Howell vs. Union Pacific.

WAS NOT FILED IN TIME

NEUVENHISEN SENTENCED TO 18 MONTHS FOR BURGLARY.

Trial of Miss Edwards Proceeding Very Slowly—General John Lu Taylor Out to Make a Record in the Case—Joseph Barrows Before Judge Norrell as a Reform School Candidate—Miscellaneous Notes.

In the case of Henry J. Howell against S. H. H. Clark et al, receivers of the Union Pacific Railway company, appellants, the supreme court yesterday handed down an opinion dismissing the appeal for the reason that the appeal was not filed within the time allowed by the rules of the court in such cases. The plaintiff recovered judgment in the district court for \$1,300 damages, allegedly caused by a cross-examination by the plaintiff in consequence of his having been unlawfully ejected from a train of the defendant company.

Trial of Miss Edwards.

There was quite a large attendance in Judge Norrell's division of the district court yesterday, the people being attracted to hear General John Lu Taylor defend Miss Charlotte Edwards, who is on trial for grand larceny and receiving stolen goods. The general is leading counsel for the defendant and is assisted by Attorney Jesse Booth, while the state is represented by Assistant County Attorney Putnam. The trial was begun on Monday, and from several appearances, will consume most of the week.

Yesterday morning Mrs. Free, who claims to own the stolen property, took the stand for cross-examination by General Taylor, and she remained there nearly all the forenoon, during which counsel endeavored to break her original testimony, but with very little success.

Reform School Candidate.

Joseph Barrows, a youth who is expected to attend school, was brought up before Judge Norrell yesterday, on a charge of truancy and general incorrigibility. He had a hearing before Justice Norrell, and the judge was sent to the district court, with a view of his being committed to the reform school. Several witnesses were examined, and further hearing continued until April 18.

Miscellaneous Notes.

John Dube yesterday entered an attachment suit against J. H. Kilgore, for \$300 on a promissory note, and \$22 for a suit of clothes, and \$30 attorney fees, a total of \$352. It is alleged in the complaint that the defendant has failed to pay the amount of his creditors, and is about to dispose of his property with intent to defraud them.

Lorenz Dickert has made application to be appointed administrator of the estate of his late wife, Anna Dickert, in order that he may prosecute a suit against the Salt Lake City Street Railway company, to recover damages for personal injuries alleged to have been sustained by Mrs. Dickert on account of the negligence of the Street Railway company.

The furniture at the Young's hotel was sold at auction yesterday, by Deputy Sheriff Montgomery, and a chattel mortgage held by the Utah National bank for \$600. The property was bought in by the bank for the amount of the mortgage.

At Judge Cherry's court the case of the Utah Optical company vs. David Keith and James Ivers was still on hearing yesterday. It will probably be concluded tomorrow Friday.

This Tells Where Health May Be Found. And that is more important than making money. If your blood is impure, Hood's Sarsaparilla is the medicine for it. It cures scrofula, salt rheum, rheumatism, catarrh and all other diseases originating in or promoted by impure blood and low state of the system.

PERILS OF AFFECTION.

Few People Realize How Exhausting The Tender Sentiment Is—A Physician's Good Advice. "There is no way by which people exhaust themselves, or kill themselves, so quickly as by exercising the affections."

This striking remark was made by one of the best physicians in America. He is a man who had studied deeply, observed keenly and knew men and women thoroughly. Continuing, he said:

"Sentiment is a grand, a lovely thing, and the world cannot live without it, but the exercise of the sentiment invariably exhausts. People may be healthy and strong, but if they are so quickly as by exercising the affections."

"If the men and women of the nineteenth century do not feed the forces that produce sentiments, affections, feelings, they are certain to have to turn to become exhausted, and to die before their time. Do not tell me these things are theories, for they are solemn facts."

"You ask me what I would do," he continued: "I answer: Begin to feed these forces; feed them constantly; feed them with the best and most scientific discovery you can secure. If you ask me what is the best, I unhesitatingly say it is that grand preparation which has been so long before the public and is so promptly and so safely known to no other discovery. I know that thousands of men and women can live and enjoy life, and I know that thousands of men and women can die and suffer, and I know that you will stop and think, or ask your friends, you will see that what I say is correct, and I believe to try it at once if you have any doubts. The facts stated by the doctor and the advice he gives are sound. It is absolutely true that many men and women are enabled to live and enjoy life securely through the power which this great remedy gives them, and there are thousands of others who need to follow in the same path."

BOARDS OF HEALTH.

SECRETARY BEATTY CALLS ATTENTION TO THE LAW Relative to the Organization of District Boards—Division of the Several Counties into Districts.

The attention of the several boards of county commissioners, city councils and town trustees throughout the state is being called by letter by Dr. T. B. Beatty, secretary of the state board of health, to the requirements of the Revised statutes relative to organization of district boards of health. Secretary Beatty requests early compliance with the law, and a prompt response being made to him. The sections of the law quoted and pertaining to the subject are as follows:

"Sec. 1106. It shall be the duty of the board of trustees or city council of every incorporated town or city of the state, to establish by ordinance a board of health for such town or city, and to select one or more persons, one of whom, when practicable, shall be a physician, a graduate of a regularly chartered medical college, or shall be an executive officer of the board, and be known as the health officer."

"Sec. 1106. Each board of county commissioners shall divide the county into the limits of incorporated cities and towns, into sanitary districts, and shall appoint a health officer for each district, who shall be, when practicable, a physician, a graduate of a health officer shall, together with the board of county commissioners, constitute the county board of health."

JAPAN'S OPPORTUNITY.

Our Proposed War Would Enable Her to Grab Philippines. New York, March 22.—The Herald's correspondent in London interviewed Sir Charles Dilke as to the relations between the United States and Spain. He thought that there was no doubt that if war came the United States would more than hold their own. He did not think it possible that Japan would be able to interfere with us in case of war. Sir Charles said: "Japan is perhaps the only nation that might be able to interfere with us in case of war, but the United States and Spain might tempt her to grab the Philippines. I regard it as improbable that England would in any way take part in such a war officially, but the sympathies of England will all be with the United States."

IMPOLITIC MOVE OF TANNER.

Suspended an Irish Colonel For a St. Patrick's Day Parade. Chicago, March 22.—Colonel Marcus Kavanaugh has been relieved of command of the Seventh Illinois National Guard by Governor Tanner for parading his troops on St. Patrick's day. Lieutenant Colonel Daniel Moriarty has been placed in command, but Colonel Kavanaugh said today that he had made application in regular form for permission to parade to General Wheeler of the First brigade. "The precedent was well established, and the preliminaries were observed." The order from Springfield relieving Colonel Kavanaugh had from command of the seventh regiment also placed him under arrest.

Gladstone Pale, But Walks Firm.

Bournemouth, March 22.—Mr. Gladstone started for Hawarden today, in a royal saloon carriage. He walked firmly from his carriage to the train, but was pale. The old gentleman was greeted with frequent cries of "God bless you." Upon entering the train Gladstone said in a clear voice: "I feel better, you know
