

them freely. He loved, however, to say pleasant words and to do kindly acts. His generosity was unbounded. No one can tell, nor can I know the number or the greatness of the kind deeds he was constantly doing.

He was never too tired for the cheering word, nor too busy to do the kindly things himself. He would be written down as one who loved his fellow men. It is written, "A man that hath friends must show himself friendly."

And it is true that he was so lowly and so kind that he had a friend, it can be said of him that he did not know him in his home, for he was the best of men, the best of citizens, the best of fathers, the best of husbands, the best of brothers, the best of friends, the best of neighbors, the best of countrymen, the best of world citizens, the best of all.

"When on his nomination he received an ovation from our citizens, irrespective of party, in the words he spoke he employed the passionate words of Burns for Gloucester to express his feelings for the man who had been every heart of that vast multitude assembled responded.

"To that home, to which he came back with such satisfaction that for a time he seemed to rally from every home in this city and in the state, and from multitudes of homes in this broad land had been carried the invisible strings of love and sympathy that with faith and prayer, how deeply all this touched this large heart no words can tell.

Today we are called to learn the universal lesson associated with all human greatness, 'vanity of vanities, all is vanity,' there are other lessons also we may learn, as true and more cheering. It is to be true and perseverant in the pursuit of the good, to be true, loving, awake love; it is true, kind words are the best things to say, and kind deeds the best things to do.

"There is a sphere in every true man's life which is too sacred for even the dearest friends to enter. It is the relation of his soul to God. As his part for I may be allowed to say that in the full possession of his faculties and in recognition of the inevitable end, he expressed his faith in Jesus Christ as his savior and a firm hope of everlasting life.

"We are to lay in the grave, the house appointed for all living, these mortal remains of our citizens, respected A. Hobart lives and will live while life remains."

HOW MAINE WAS BLOWN UP

OFFICIALS AT HAVANA HAVE DISCOVERED THE SECRET.

Seven Hundred Pounds of Gun cotton Was Used—Speculation as to Implication of Commander of Port.

New York, Nov. 25.—The World tomorrow will publish a letter from Havana stating that United States officials, after months of secret investigation, have discovered that the battleship Maine was blown up by gun cotton torpedoes placed in the bay near the battleship.

On Monday, Tuesday and Wednesday she will speak at Provo. Through some mistake it has not been arranged for her to speak at Salt Lake, though it is likely that the ladies of the various women's clubs will take up the matter. Mrs. Stetson met Mrs. A. W. McCune, Mrs. Gates and Mrs. Emery line B. Wells at the Ladies' Congress of Women, and they begged her to come to Utah. She is here. But Mrs. McCune, on whom she relied to arrange for lectures, has been called to Mexico.

TO REMOVED GREATS MOS FAMOUS OF NEW WOMEN NOW VISITING SALT LAKE

Work Cut Out For the Incoming Congress.

PROTEST MAY BE ENTERED

FRANCE IS SAID TO BE NOT SATISFIED.

Her Diplomats Believe the United States is Giving Privileges to Germany, Russia and Other Countries That Will Millitate to Her Disadvantage.

Washington, Nov. 25.—Relative to the statement attributed to Count Mouraviev, the Russian minister of foreign affairs, that the propriety of remodeling the trade treaty of 1832 between the United States and Russia was now under consideration, it is learned that about two months ago this movement was initiated by the Russian ambassador here. The success of the French government in negotiating a reciprocity treaty was probably the incentive to the Russian move.

From the number and scope of reciprocity agreements recently negotiated which have been drawn up under the terms of the Dingley tariff act, besides those which are nearing the point of conclusion, it is believed that the international power of the president, it began to appear that a European nation unfortunate enough to be omitted from the list of privileged nations would be at a great disadvantage in continuing its trade with the United States.

Germany Sees the Point.

The fact first dawned upon the German government, and it has been endeavoring, thus far without success, to obtain a reciprocity treaty. The obstacle being the uncompromising attitude of the German agrarian interest against United States meat and provisions.

Russia was the next power to see the advantages of remodeling her trade arrangements with the United States and the first overtures in that direction were made about two months ago. The matter has not moved very speedily, and it is not yet possible to forecast the exact form the new arrangement will take.

Because of the necessity of protecting such products as well as the producers of raw material. In view of this, the basis of exchanges will be difficult to reach.

Indications of Opposition.

The indications of rather formidable opposition to the proposed treaty by the French reciprocity treaty have given some concern to the officials of the state department, who have had much to do with its negotiation. This treaty was perfected with the greatest difficulty, and was in itself regarded as the means of restoring the good will and cordiality between the United States and France, which had undergone a severe strain during the last two years. Its failure, it is said, would be most unfortunate, and would be a serious blow to the state department.

Two of our men were engaged in the destruction of the Maine. A steam launch of Spanish make was towed to the pier of the United States government in Havana harbor, conveyed the two torpedoes, according to the new evidence, to a point within a few feet of the berth of the Maine and anchored there. The torpedoes were kept in position by means of a lead cable fastened under water, ten feet above the anchors used to prevent them from being blown away by the knowledge of the officials in charge.

Admiral Matera's records will undoubtedly show the names of his subordinates who had direct control of the explosive and the necessity of protecting the authors and the executors of the plot to destroy the Maine may be discovered.

MRS. CHARLOTTE PERKINS STETSON, Author of "Women and Economics."

There is at the Kenyon a woman who is accounted one of the advanced thinkers among women, who is probably more representative of the present woman movement than any other in the country.

Mrs. Charlotte Perkins Stetson of New York, who is the author of "Women and Economics," that work which has aroused such a storm of criticism from New York to San Francisco, and a masculine and strong-minded as many of her critics would have their readers believe.

She may be a "new woman," but she doesn't wear bloomers—nor corsets, and she doesn't ride any hobby horses. In fact, she is a very womanly woman, with more brains than nine hundred and ninety-nine men out of a thousand, and she shines more brightly than any conversation than does the average man during his lifetime.

"Why I'm not a reformer," said she last evening. "I have no plan for the regeneration of the world. I have simply studied the development of human nature, and I consider to be the entire evolution, insofar as it refers to women and their work."

She has come here on a lecture-tour. On Monday, Tuesday and Wednesday she will speak at Provo. Through some mistake it has not been arranged for her to speak at Salt Lake, though it is likely that the ladies of the various women's clubs will take up the matter.

Mrs. Stetson met Mrs. A. W. McCune, Mrs. Gates and Mrs. Emery line B. Wells at the Ladies' Congress of Women, and they begged her to come to Utah. She is here. But Mrs. McCune, on whom she relied to arrange for lectures, has been called to Mexico.

DECISIVE BATTLES FOUGHT BY WIN-GATE'S CORPS AND JIM LANE QUIT THE GAME FOREVER.

KHALIFA DIES IN ACTION WAS ROBBED OF HIS PILE

DERVISHES DEFEATED AND ROUTED. AND QUICKLY LEARNED THE TRICK HIMSELF.

Mounted Troops Pursue and Kill or Capture All Fugitives—Among Those Killed Were the Khalifa's Two Brothers and the Madhi's Son—Osman Digna Escapes.

Got In a Game Where Another Man Was Working the Same Craft—He Lost His Nerve and the Most Flattering Inducements Could Not Make Him Try It Again.

(Chicago Inter Ocean)

"Jim Lane is in town, I hear," said the little man with the scrubby beard as he threw down a winning king, and asked in the stack of chips from the middle of the table.

"Who's he?" asked a man across the table.

"Jim Lane," answered the first speaker, "is the nerviest and best gambler in all probability, who ever stacked a deck of cards in this great and glorious poker-playing country. He knows every trick there is in the game, and he can work those same tricks better than any other man I ever saw or heard of. I don't mean slight-of-hand tricks, I mean the regular professional gambler's tricks. They are played to win money dishonestly. He must be 35 years old if he's a day, but you wouldn't think it if you put your eyes on him. He's got little, thin, Jewish face, and a light moustache that will never grow any larger than it is, and altogether he has about the most interesting look I ever saw. He came from New York to Frisco. I've crossed the continent by stage, winning my car fare at the great American game, and I've never seen him equal in the lamb-like, innocent way, but he's got that little fellow has fooled the best of them. In fact, I think he was only caught at the game once, and then the man who caught him didn't dare accuse him, because he was working the same identical game. Jack Hale, who was known all over the west as Dopey Hale, caught him once, and then he quit playing his nerve. He never got it back either."

"Lane was a natural born gambler. He couldn't keep away from the cards, and he was the same as an opium fiend hanging onto his pipe. He was a bookie, and he started in Frisco on a card table, until he struck a stiff poker game at the old Fleming house in Frisco one night. There were a lot of slick guys there, and they were all over him. He started to leave, but he was caught by a chap just enough the first night to get the fever in his blood; the next night he made his pile look sick, and he stayed over the week he kept him busy writing out checks for him. He was a good writer, and he was a good gambler. The Sunday may now be declared to be open."

Osman Digna's Escape.

The mounted troops pursued and captured most of the fugitives. The Khalifa with most of his men and the emir's body guard, made a gallant stand. Among the emirs killed were the Khalifa's two brothers and the Madhi's son—Osman Digna escapes.
