

are mostly small with narrow brims, but the wider ones are to come later. Leghorns will be one of the demands of the season.

Some Popular Hats.

One local shop is carrying exclusively Consello and Andrea models. The former are the very popular hats from \$5 to \$7.50 mostly and represent the latest developments in the New York styles. The Andrea hats are the more exclusive styles of the higher grades and they interpret the latest French importations. The showing now is very liberal and includes all of the new styles and colors.

Have you ever worn a Trotteur? Bet you don't know what it is and sure you have worn it, only under another name, which of course made it look slightly different. It is just a sport hat, that's all but now to be up-to-date it must be designated by this name or called a walking hat. And one of the shops has Knox models, which name speaks for itself with those who know. One model comes in black Milan braid trimmed in the tiniest little bands of black patent leather and buckles. It is an imported design, another from Washuer is a stunning grey sailor trimmed in narrow bands of Chartruse and American beauty roses. It is of hair braid. Lemonade braids and the satin cire' polished ribbons are ever so new this year and the chrysanthemum straw is back.

It is hard to stop when there are so many more interesting things about which to tell. It is hoped that every

woman reader of Goodwin's will find something to interest and please her, perhaps some particular thing which she herself wants in these stories of the shops. To paraphrase a popular advertisement, if you like them tell us, if you don't like them, also tell us and we will guarantee to take steps to make you like them. Any suggestions for the stories will be welcomed by Amy Armstrong and any information desired relative to the subject will gladly be furnished.

OUR STOCKS OF SPRING MERCHANDISE ARE THE CLEANEST BRIGHTEST EVER SHOWN IN SEASON IN THIS CITY

Keith-O'Brien Company

The latest American church device for "raising the wind" is what a religious paper describes as "some collection box." The inventor hails from Oklahoma. If a member of the congre-

gation drops in a twenty-five cent piece or a coin of a larger value, there is silence. If it is a ten-cent piece a bell rings, a five-cent piece sounds a whistle, and a cent fires a blank cartridge.
