Founded 1859

"A Tower of Strength"

been a matter of comment that no one could gain information about the Ohio with a dictagraph—not to mention the less efficient ways of getting the dope. If it was the same with the Stewart it begins to look as if an investment in a Helze stock were equivalent to the commencement of a course in metaphysics at a German university. These inferences, not formulated so distinctly, perhaps, are enough to account for the slump in Ohio which followed the announcement of the Stewart litigation.

## At The Resorts

Saltair.

That Saltair will be more than ever a credit to Salt Lake this year is apparent from the many improvements and new features now in progress. Messrs. Langford and Nelson have gone the limit in preparing the famous resort for opening day, and thousands of dollars have been and are being spent to make it easier to get to Saltair and more attractive and pleasant after one has arrived.

To begin with the railroad has been given special attention, although the plan for double tracking and electrifying the road has been halted because of the refusal of a franchise by the city commission. The roadbed and equipment have been put into splendid condition, and no difficulty is anticipated in handling the largest crowds ever.

To make it possible for motorists to reach Saltair easily, a fine auto roadway is being built from the salt works right up to the Saltair platform. This road joins the regular road at the salt works leading to the county road near the new town of Garfield. This makes a splendid auto-way from the city to the lake.

At the resort a general "brightening up" is apparent. The immense dome with its roof of sea green reflecting the clean, attractive appearance that pervades the entire resort. Two new features, both innovations, will greet pleasure seekers this year. The most important is the building of the large bathing pool which will contain heated water. Work is progressing very rapidly for opening, and every effort is being made to have it ready. The pool occupies the entire building 80x100 feet, formerly used as a skating rink. The floor and sides are of smooth cement, and windows open on three sides of the building. An immense heating plant is being installed and the water for the pool, which will be pumped from the lake each day, will be heated to a comfortable temperature. Bathing in the pool will be open until ten o'clock each evening. The bath rooms for the pool have been built in the building formerly used as the Pilgrim's Progress. There will be no extra charge for bathing here.

The second new feature is the "going-to-sea-by-rail." This is a miniature railway that runs far into the lake to the southeast. A special pier has been built for it of heavy timbers, strongly braced. The station is

near the entrance of the Hippodrome.

Bathing and dancing, always the attractions at Saltair, promise to draw the crowds. The waters of the lake are at an ideal depth for bathing and no changes of the bath houses will be necessary.

A full military band will furnish the music for dancing every evening, except Sunday, and special band concerts will be given Sundays and holidays. H. A. Montgomery, who conducted the music at the beach last year, will be here from San Francisco, and is negotiating with the management. His band will furnish music for the U. of U. dance tonight.

The ship cafe, scenic railway, old mill and other concessions have been put into condition and will add to the amusement of patrons of the resort. For the opening on Decoration day special decorations are being placed. No program has been announced for the opening, but during the season a number of amusement features out of the ordinary are contemplated. The summer schedule on the railroad to the beach goes into effect on Thursday, and trains will run every forty-five minutes during the afternoon and evening.

Salt Palace.

With assurance of Messrs. Langford and Nelson the new lessees of the Salt Palace, that this resort will be conducted in a well-regulated and orderly manner, the public is taking new interest in the pleasure park that has been in the past a source of much pleasure to Salt Lakers and the means of much favorable advertising to Salt Lake. The announcement that there will be no bar on the grounds, but that wholesome amusement features will take its place, has been received with pleasure by the better class to whom the new management will appeal.

The saucer track will, of course, continue to be the big feature, and in the light of recent announcements, there is every reason to believe that this season will prove to be the most important and successful in the history of the world-famous track. Races will be given Tuesday and Friday nights of each week with special meets on holidays. With the large number of fast riders now here, the "fans" are looking forward to a season full of thrills.

In the Salt Palace park the old Salt Palace building has been replaced with a large open air theatre, and dressing rooms being built in the rear with open air seats in the front. As the opening attraction, Sirigno's famous Banda Roma, which played fourteen weeks last year at Atlantic City, has been engaged. Possibly no band that has ever played at a Utah resort comes so highly recommended and with so many flattering press notices. The band is well known at all the large eastern resorts, and pleasure parks, but this is the first time it has ever been brought west. The band will open at the Salt Palace with a grand open air concert Thursday night.

Stick to Stickney's.
