Smoke from the Weekly Pipe

That is a pretty story regarding Mrs. Ida Paul, the wife of a farmer at Ucon, Idaho, who it is said lost the sight of an eye at Holy Cross hospital on November twenty-sixth when a nurse washed it with carbolic acid instead of olive oil.

After ether is administered, olive oil is sometimes used in the eyes of the patient and how it was possible for anyone to mistake carbolic acid for olive oil is beyond comprehension. Mr. Paul stated that he did not care to discuss the matter because a satisfactory settlement had been made so that the affair might not become public." It is nice to know that the operation the lady underwent was a complete success even if she did lose her eye while unconscious. Of course, accidents will happen, but this seems to be the most flagrant case of gross carelessness that has been heard of in a hospital for some time, in fact since one of the hospitals let a patient fall down stairs nearly killing him and settling for twelve thousand dollars so that the public might not know, and in one other instance where a near surgeon sewed a gentleman up neglecting to remove some of the instruments he used from the place in the gentleman where he was operating.

It is a gay life in the hospitals around here, and apparently none of them are any too strict in demanding high qualifications from attendants.

There ought to be a law making it compulsory for public institutions of this character to report to the proper authorities anything of the kind that might happen. Of course, the damage could not be corrected but such reports might lead to remedial legislation that would remove some of the terrors from the hearts of the afflicted who necessarily have to take a chance in going to one of those places.

Salt Lake City and the Union Association owes a larger debt of gratitude to Maury R. Evans than it can very well pay. Mr. Evans left here for Boise on Sunday night and on Tuesday wires were received to the effect that negotiations were practically completed whereby the Boise franchise in the association and the ball park at Boise will be transferred to Mr. Evans, the final details to be closed here.

Mr. Evans was accompanied by Dr. Harville, who is behind the Murray club. Mr. Evans recently agreed to put up \$2,000 in cash to assure Boise to the league. We wanted and needed Boise in the league and it is doubtful if it would have been possible to get it had not Mr. Evans been willing to come forward with the money at the same time giving his time and attention as he always has done to the furthering of the interests of the association.

The matter of the discussion of the competency or incompetency of Coach Bennion at the university which is taking so much space in Salt Lake's "only independent journal" at the present time is another laughing matter. It is easy to prove by the files of Goodwin's Weekly that it was the first paper to have the courage to call attention to the real trouble in the University football team and it was not until two or three weeks later that the story "broke" in the Telegram. The publication of it there followed a general discussion which ensued after the Weekly article was published and now as is the wont of the "independent journal" it was responsible for the whole thing. Great!

Thomas & Soule, lawyers, have removed their offices from the Judge building where they have been so long located to more spacious quarters in the Boston building, Suite 917-918-919.

The Wife's Story

"We have a little room off the hall with no radiator in it.

"In the summer time it made a fine play room for the children, but in the winter it was too cold and damp, so the children did their romping all through the house.

"One day I noticed a doll sitting in front of a little Gas Stove in the window of the Gas Company. I ordered the stove. Now the play room can be heated in a few minutes before the children come from school."

These Gas Heaters are delivered and connected for \$6.

Is the House Wired For Electric Lights?

This is the first question asked by those renting or buying homes.

A negative reply turns people away. If the house is properly wired for electric service, THAT is a big factor in renting or selling it.

Builders are invited to confer with us in making plans. Free advice by our experts is part of the service we render.
