

# WEEK CLOSING AT HIGHEST POINT

### Buyers Returned to Market After the Holidays In a Hungry Way--The Sheep Market Closing Firm For the Week.

Correspondence The Advocate.

KANSAS CITY Mo., Nov. 20.—Cattle received here this week 42,800, last week 57,500 same week last year 30,500 head. Buyers returned to the market after the holidays in a hungry way and sales today were steady to strong, and active. The week is closing at the highest point of the season on range cattle of all kinds, except veal calves, which are steady for the week, but half a dollar below the best time this fall. Short fed cattle are coming in freely, but prices on them have held about steady this week. Feeders all over the corn belt exhibit a disposition to sell early while there is a visible profit, and while they still have a substantial pile of corn left. Corn is down to thirty-five cents in some places, and reports indicate that a good many owners of cattle which are being roughed along stand ready to put them on full feed whenever the sign looks right. The same disposition impels other cattle men to buy fleshy feeders on the market, which helps middle grade cattle. Nothing prime has been here this week tops under \$10.00, bulk of

#### ENDS HUNT FOR RICH GIRL.

Often the hunt for a rich wife ends when the man meets a woman that uses Electric Bitters. Her strong nerves tell in a bright brain and even temper. Her peach bloom complexion and ruby lips result from pure blood, her bright eyes from restful sleep, her elastic step from firm, free muscles, all telling of the health and strength Electric Bitters give a woman, and the freedom from indigestion, headache, headache, fainting and dizzy spells they promote. Everywhere they are woman's favorite remedy. If weak or ailing try them. Fifty cents at all dealers.—Adv.

the short fed steers selling at \$7.00 to \$9.50. Colorado beef steers have sold freely at \$6.50 to \$7.35, Colorado heifers at \$4.00 to \$4.50, odd head \$7.00. Panhandle cows and summer \$4.00 to \$4.50, bulls \$4.35 to \$5.15, fed bulls up to \$4.25, real calves up to \$9.50, stock calves \$5.00 to \$7.00, quarantine fed steers \$5.25 to \$7.25, light quarantine steers \$5.00 to \$6.00, low grade Southern stuff \$3.50 to \$5.25.

Sheep received here this week 25,500, last week 26,500, same week last year 19,000 head. The market is closing the week firm to day, top lambs \$7.55, only ten cents under the best price of the week, sold Monday. Ewes are selling at \$3.75 to \$4.50, wethers \$4.00 to \$4.50, yearlings up to \$6.00, feeding lambs around \$6.00. Dealers see no reason to change their prediction that winter markets are going to be strong.

Beginning the first of December the Duchesne Stage and Transportation company will carry the mails from Colton to Vernal and points between, the route from Price out having been ordered discontinued on the 30th of this month. Offices are to be opened for the company at Colton, Duchesne, Myton and Vernal under the management of C. H. Stephens, who informs "The great moral and religious" that five and seven passenger automobiles will be put in service all along the route, excepting the first ten miles out of Colton, which will be covered with stages until such time as the roads are made good enough for the machines. From Colton to Vernal is a hundred and eighteen miles, ten miles shorter than the line from Price out. There will be dinner stations between Colton and Duchesne, while all over night stops are to be at hotels in the towns along the route.

## PROF. HOLDEN LEAVES THE IOWA COLLEGE

### THE "CORN MAN" JOINS I. H. C. SERVICE BUREAU.

#### Co-Operative Movement For Larger Crops, Better Roads, More Prosperous People and a Better Nation—Will Aid In Pushing the Work Forward.

This marks the beginning of a new and greater business service. It is a co-operative movement for larger crops, better roads, happier homes, more prosperous people, and a richer and better nation. That is to say, the I. H. C. Service Bureau proposes to help do for all the states and for Canada what Holden has done for Iowa.

After considering many offers, and after an investigation of the company and its work, Professor Perry G. Holden has entered the service of the I. H. C. Service Bureau at Chicago.

Professor Holden is known wherever real agriculture is known. His whole life is one of service. He originated the idea of carrying information direct to farmers. He is the father of the demonstration train, short school courses, the corn show, county

PROF. PERRY G. HOLDEN.

demonstration farms, and the National Corn Exposition. As head of the extension department of Iowa State College of Agriculture he did a work which, Senator Cummins says, up to the present time has increased the wealth of Iowa \$30,000,000.

The object of the I. H. C. Service Bureau is the promotion of agricultural education, and a co-operation which will tend to raise the whole tone of commercial, industrial and farm life. Since agriculture is the basis of prosperity and progress, naturally farm problems claim first attention. The aim is higher efficiency, both on and off the farm.

To do a big work a big organization is necessary. Not only the business, but the perfection of the International organization as well appealed to Professor Holden. The big general assembly, scattered all over the United States and Canada; the salesmen, travelers and expert machine men; the 40,000 dealers—every one, so far as possible, is to be made an associate of better farming.

For years the International Harvester Company has realized the importance of service. It has spent millions of dollars in the perfection of labor-saving machines, and now the company is going in for direct service—direct to the farmers, and direct to the farmers' children, that the men and women of tomorrow may be more capable and so more prosperous than the men and women of today.

It is no longer a theory that if we are to get the most out of life we must raise more per acre. "Intensive farming" is in the air. It is the battle cry of peace and plenty. But raising more is the result of mind, not muscle. We must know. And not only that we must know we know, and know why we know. We must know good seed from bad, right cultivation from wrong, and the why and wherefore of climates, soils, fruits, cattle, horses, poultry, and so forth.

For these things the bureau was established. But the bureau and Professor Holden see more than an average increase of a few bushels. They see a time coming when farmers will raise twice as many bushels of corn, wheat and oats to the acre, and like yields of all other kinds of farm products. They see a time when farmers and farmers' wives and their children will think more and work less. Every bushel raised means just that much profit, and the profits of the farm promote commerce and industry.

After a period of good work in Michigan agricultural college, better work at Illinois, and a great work at Iowa Professor Holden now enters upon a world's work. While in future, Professor Holden will designate Chicago as home, he says he is not leaving Iowa—he is merely carrying Iowa to the rest of the world.

No need of patronizing mail order houses when Harmer can meet their prices on furniture, and can show you the goods.—Adv.

**REPUBLICAN LEADERS TO HOLD CONFERENCE**

NEW YORK, Nov. 28.—Leaders of the republican party in every state of the union are to assemble here on December 14th for a series of conferences to devise plans for a great forward movement for the party and to map out a program for the next four years. President Taft will be the principal speaker at a banquet on the evening of December 14th.

Discussing the change of mail route from Price to Vernal to the Colton way, Vernal's Express of last Friday says: "Many people have often wondered why the Price contractors have lost money, while in the old times before the reservation was thrown open, revenues were highly satisfactory. The answer is easy. The big money is not necessarily in transporting the mail, but in passenger and express service. Since the Utah railroad was built and especially since the automobiles were put on, most of the travel has been diverted in that direction and besides the Utah people have been running a since from Port Duchesne to Myton at any hour of the day to suit the convenience of the public and from Port Duchesne automobiles have been running via Handlett and Oquirrh. Most people prefer to travel that way rather than on the stage."

Under the direction of the Union Pacific railroad a spirited campaign for the upbuilding of Utah is being conducted throughout the East. "The West is Calling You" is the title under which the campaign is conducted, and special emphasis is laid on the possibilities of Utah.

**A Plain Statement of IHC Wagon Value**

SOME farmer saves money every time an IHC wagon is sold. Not because it costs less money to begin with, but because of the length of service it gives, an IHC wagon is the cheapest wagon you can buy. The longer a wagon lasts the cheaper it is. That is why it is economy to buy the best wagon—one that will outlast any ordinary wagon. When you buy an IHC wagon

**Weber New Bettendorf Steel King**

you invest in a wagon built of the highest grade material which experience and care can select or money can buy; built in the most thorough, painstaking manner, by skilled workmen, in factories which have modern appliances for doing work of the highest standard at the lowest possible cost. The conditions under which IHC wagons are built are nearly ideal.

All lumber used is air-dried in sheds with concrete floors. This insures toughness and resiliency. All metal parts are made of especially prepared steel, guaranteeing the longest service. Each wagon undergoes four inspections before being shipped so that it reaches the purchaser in first class condition, ready to be put to work at once and able to carry any reasonable load over any road where a wagon should go.

Weber wagons have wood gears, New Bettendorf and Steel King have steel gears. The IHC local dealer knows which wagon is best suited to your work, will tell you why, and will sell you that one. When you see him have him show you all the good points of IHC wagons. You can get literature from him, or write
