MANY CHANGES AT THE WEBER ACADEMY

Several new faces will be found among the staff of teachers of the Weber academy when the students report for school work next Monday. Some of the new members of the faculty are graduates of the school who have returned to teach after continuing their studies in higher schools.

George M. Sister of the Agricultural college at Logan will be head of the department of mathematics. He takes the position of C. E. Barrett, who has accepted the principalship of the Scofield high school.

Miss Jeannette Downs, the new secretary, is a member of the Weber Academy Alumni association, having completed a four-years' commercial course. She succeeds Miss Lottie Kunz who will study at the Utah Agricultural college.

Malcom Watson, another graduate, will have charge of the physical training, succeeding William McKay, who has resigned to take up insurance. Mr. Watson was a basketball star and, in addition to his experience at the academy, studied physical training at the Deseret gymnasium.

William J. Terry, a former instructor at the academy, will teach general history and German. Mr. McKay taught German and L. E. Cowles taught some of the history classes. Mr. Cowles who went east to secure a degree at the University of Chicago last spring, has resigned to become principal of the Carbon county high school.

Miss Rosala Ferrin, a graduate of the school in 1905, will become assistant in domestic arts. Miss Gladys Egnis will be assistant in domestic science. Miss Ensign is another graduate.

The drawing department will be in charge of Miss Olive Belpap, who has continued her studies since graduating from the academy.

CIRCUS LIFE IS NOT ONE OF GREAT JOY

When the police this morning arrested Violet Livingston, alias Mrs. George Wilson, and S. Rogers, an old man, after the former had tried to escape paying a hotel bill by a roundabout method, a sordid story of circus life was related that was much different from the romantic side which is seen by the public.

When Ogden was reached the two registered as Mr. and Mrs. George Brown and yesterday Brown joined the circus. Apparently tiring of the woman, he told her the show was to remain over in Ogden another day. He departed last night, leaving an unpaid hotel bill for the woman to settle. She had but \$2.

When she found she had been deceived, the woman left the hotel leaving her suitcase as security. On the streets she met S. Rogers, a laborer, 57 years old. She unfolded her tale to him and he schemed to get her grip.

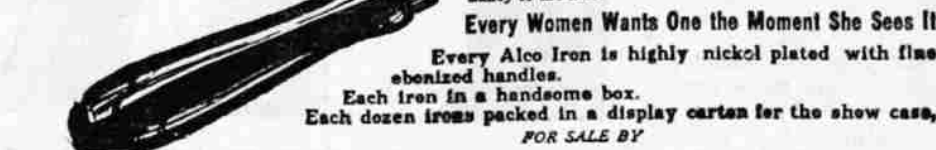

The old man accompanied her to the hotel and she directed him to the rear. She dropped the suitcase from the window and the old fellow took it to a fruitstand on Twenty-fifth street. No sooner did the woman leave, however, than the proprietor learned of the trick and summoned the police.

Detective George Wardlaw and Patrolman Kellher and Martin located Rogers, the woman and the suitcase, and the details of the whole affair were related at the police station.

Alco Self-Heating Curling Iron

Self-Heating—Self-Regulating—Impossible to Burn the Hair IT'S NEW—IT'S CLEVER—IT'S USEFUL

The Self-Heating Curling Iron is so simple and so effective that everyone who sees it exclaims, "Why wasn't it thought of before?" The bar is hollow, with perforations on the outer side, and contains a packing of asbestos wicking. This absorbs and holds the alcohol into which it is dipped and only a match is needed to start a hot blue flame burning at every perforation. The iron heats in a few seconds—it absorbs just enough alcohol to bring it to the right heat—the tiny flames burn out—and the iron is ready for use.

W. H. WRIGHT & SONS

Note the perforations! They regulate the temperature and the iron never gets hot enough to burn the hair.

No Lamp is Necessary—No Expensive Electric Connections—Only the Self-Heating Outfit and a Match.

Indispensable either at home or when traveling. Produces an even heat superior to any other method. Cost of operation is practically nothing. Heats in 20 to 30 seconds. Iron always clean, produces a beautiful moist curl, Hygienic, Sanitary. Adds new life and brilliancy to the hair.

Every Women Wants One the Moment She Sees It

Every Alco Iron is highly nickel plated with flame etched handles.

Each iron in a handsome box. Each dozen irons packed in a display carton for the show case, FOR SALE BY

GAYNOR A CANDIDATE

New York, Sept. 3.—Voters from all sections of New York City crowded City Hall park this afternoon and asked Mayor Gaynor to become an independent candidate for re-election. The mayor gave his consent. The gathering was more like a New England town meeting than a formal political assemblage and was probably the first event of its kind in the history of the city.

The voters paraded from their homes in the various boroughs, armed with banners, flags and shovels—the battery signifying their approval of Mayor Gaynor's plans in subway construction. The shovel has been chosen as the official party emblem for the Gaynor campaign.

Jacob H. Schiff, the bankers; Herman Ridder and R. Ross Appleton, head of the Gaynor League, escorted Mayor Gaynor to the front steps of the city hall, where they stood for five minutes, bowing to the cheering crowds. The mayor, who recently suffered an attack of his old throat trouble looked pale and drawn.

"I tender you the nomination for mayor," said Mr. Appleton, announcing that all legal requirements for making a nomination by petition had been met. "Will you accept it?"

The mayor's voice has been useless for public speaking since he was shot in Hoboken three years ago. He bowed his acceptance and then motioned to his secretary to read his reply.

"I accept," he said. "What you do this day shall become memorable. You are teaching the intelligent people of this city how they may nominate their candidates for office and not submit to having candidates imposed on them by a little coterie of men who follow politics as a dishonest trade."

Mr. Chairman, in presenting me with this shovel you are indicating that the people of this city are going to shovel all of the miserable little political grafters into one common dump heap."

HOUSE COLLAPSES; SEVEN KILLED

Dublin, Ireland, Sept. 3.—Seven persons were killed and five seriously injured by the collapse of two old tenement houses in Church street last night. The remainder of the 53 tenants of the house have been accounted for.

WANT THEIR SON AMERICAN BORN

New York, Sept. 3.—Mr. and Mrs. Herman H. Harjes made a hurried trip from Paris to New York so that their son, born here last night, might be beyond any shadow of doubt, an American citizen. They arrived yesterday with just six hours to spare.

Mr. Harjes is a member of the banking firm of Morgan, Harjes & Co., the Paris associates of J. P. Morgan & Co. Although born in France, he is now an American citizen. His wife was Miss Frederica Berwind of Philadelphia. They came to New York for the same purpose when their first boy was born two years ago.

THREW BOUQUET TO THE EMPEROR

Berlin, Sept. 3.—The Berlin police today completed 24 hours of feverish investigations and examinations, all brought about because an American woman threw a bouquet of roses from a window of a hotel as Emperor William was passing yesterday on his way to the military maneuvers at Tempelhof field. The bouquet bore a ticket inscribed to "The Great German Emperor."

The police were greatly exercised because of the unusual actions of the woman, who wore a placard bearing the words, "40,000 days." They promptly arrested her and required her to go to a police station and establish her identity.

She declared that her placard indicated merely her belief that the world would be changed in 40,000 days. The police declined to make her name public.

TALKS TARIFF WITH WILSON

Washington, Sept. 3.—Representative Underwood, leader of the House, was at the White House today to talk tariff with President Wilson.

"We hope to dispose of the differences between House and Senate in conference in less than two weeks," said Mr. Underwood. "I am not disposed to fight the senate for the purpose of maintaining all the House provisions. There are no differences of principle involved. I believe the Senate has cut too much revenue from the bill and if I can convince the conferees that my estimates are correct, I think the Senate will be willing to put some of the revenue back."

PEARS SELL AT \$2 A BOX IN THE EAST

While the recent storms have somewhat retarded the ripening of fruit, it is stated by dealers and growers that the harvest time is coming on rapidly enough and that within the next few days all hands will be busy gathering and transferring the orchard products to the cars for shipment.

The rain has done but little damage to fruit except in certain districts where hail fell. Fungus in the fruit is causing some trouble but it is not extensive enough to be alarming.

J. M. White, manager of the Utah Fruit Exchange, states that he sold the first car of pears yesterday at Minneapolis, realizing \$1085, or \$2 a box. He has eleven more cars of produce sold—two cars of pears, one of potatoes, six of peaches and two of mixed products, all of which will be sent to the market in the course of the next day or two.

Twenty other cars of peaches are bargained for 50 cents a crate f. o. b., at the market place and some have been sold at 45 cents. The growers will realize from 35 to 45 cents a crate.

Mr. White has made arrangements for the sale of 600 crates of pears to be shipped in bushel boxes at 95 cents a bushel f. o. b. on the market. From this shipment the growers will get about 85 cents a bushel.

The market is steady, Mr. White says, and there is no doubt that the entire crop can be marketed this year, at prices to the grower of from 35 to 40 cents a crate. The price may be better after California and Colorado are through shipping. Mr. White says, but he considers it safer to figure on a price not to exceed the above quotation.

PROF. MOENCH AND WIFE ON A JOURNEY

Professor L. F. Moench, formerly principal of Weber academy, has returned from Delta, Millard county, and, accompanied by his wife, will leave for Buffalo, New York, this afternoon, to spend a month with relatives.

Professor Moench, after two years devoted to farming in southern Utah, has made a sale of part of his farm property at a good figure, and is now in a position to enjoy a vacation.

He says Delta has a great future. The largest dam in the state is near there and the water supply for farming purposes is almost unlimited. Settlers are coming in from Nebraska, California and other states and prosperity is everywhere in evidence.
