GERMAN NOTE IS RECEIVED

(Continued from Page 1)

Germany claims the sanction of international law for carrying out its destruction of property during retreats and says her troops are under strict instructions to spare private property and care for the population to the best of their ability.

The German government suggests to the president that an opportunity should be brought about for fixing the details. It trusts that the president of the United States will approve of no demand which would be irreconcilable with the honor of the German people and with opening a way to a peace of justice.

In order to avoid anything that might hamper the work of peace, the German government has caused orders to be dispatched to all submarine commanders, precluding the torpedoing of passenger ships, without, however, for technical reasons, being able to guarantee that these orders will reach every single submarine at sea before its return.

As a fundamental condition for peace the president prescribes the destruction of every arbitrary power that can separately, secretly and of its own single choice disturb the peace of the world.

Hitherto the representation of the people in the German empire has been endowed with an influence on the formation of the government.

The leaders of the great parties of this government. In the future, no government can take or continue in office without possessing the confidence of a majority of the reichstag.

The constitution does not provide for a conference of representation of the people in decisions of peace and war.

These conditions have just now undergone a fundamental change. A new government has been formed in complete accordance with the wishes (principle?) of the representation of the people, based on equal, universal, secret, direct franchise.

The German government further denies that the German navy, in sinking ships has never purposely destroyed lifeboats with their passengers.

The German government protests against the reproach of illegal and inhumane actions made against the German land and sea forces and thereby against the German people.

Germany has agreed that conditions of an armistice should be left to the military advisers and that the actual standard of power on both sides in the field should form the basis for arrangements.

The responsibility of the chancellor of the empire to the representation of the people is being legally developed and safeguarded. The first act of the new government has been to lay before the reichstag a bill to alter the constitution of the empire so that the consent of the representation of the people is required for decisions on war and peace.

The permanence of the new system is, however, guaranteed not only by constitutional safeguards, but also by the unshakable determination of the German people, whose vast majority stands behind these reforms and demands their energetic continuance.

The question of the president—is therefore answered in a clear, unequivocal manner by the statement that the offer of peace and an armistice has come from a government which is free from any arbitrary and irresponsible influence, and is supported by the approval of an overwhelming majority of the German people.

(Signed) "SOLF." The text of the German note, as received by wireless, is as follows: "In accepting the proposal for an evacuation of occupied territories, the German government has started from the assumption that the procedure of this evacuation and of the conditions of an armistice should be left to the military advisers and that the actual standard of power on both sides in the field has to form the basis for arrangements safeguarding and guaranteeing this standard."

AWKWARD ATTEMPT WASHINGTON, Oct. 21.—Germany's reply to President Wilson as received today by wireless is regarded here as an awkward attempt to accept the conditions of peace laid down by President Wilson. It is believed to be certain that the wireless version is garbled to an extent, and officials will await the arrival of the official text before reaching conclusions.

Upon the exact language of the official text may depend whether the president will consent to propose an armistice to the Allied powers. Denial of the Germans that atrocities have been committed are immaterial. The important thing is that atrocities now apparently have been ordered stopped.

TOTAL NUMBER OF DEATHS PLACED AT FORTY-SIX MARINE, SUFFERING OF SPANISH INFLUENZA, ENTERS EMERGENCY AND IS NURSED BY TEACHERS

There is no diminution in the influenza situation in Ogden this morning. The hopes that the epidemic was on the decrease have not been sustained by the facts of the last twenty-four hours. Since noon yesterday, eleven sufferers have passed away of complications due in the first place to the ravage of this terrible disease, but doctors, nurses and citizens are working with might and main to overcome the increase of the epidemic.

In the opinion of one prominent Ogden physician, more cases are being successfully cared for and saved by the enterprising and enlightened care given by mothers and the folks at home than by anything else whatsoever, while the magnificent way in which many have gone to the help of sufferers is a fact the city may well be proud of.

At present nine beds are occupied by patients and four more are ready. The community of Ogden has come to the aid of the hospital in splendid spirit, but there is still room for gifts of bed screens; fresh vegetables, fruits and jams and jellies.
