COAL STRIKE FELT LOCALLY.

Not until today were the people of Ogden directly reminded that a great coal strike is on in the United States.

Every lump of coal in the bins of Ogden is made more precious by reason of the forecast of a shortage which may become acute.

FROM A NICKEL TO FOUR BITS.

On Sunday the Salvation Army was out on the street in force.

The crowd that gathered was not large, but when the big drum was placed in position to receive a shower of silver, those who were near threw nickels and dimes, and then a soldier cast "four bits."

There was a time when the Salvation Army was poorly recognized; when the lassies had to search high and low for the nickel.

INDECENT DRESS AND DANCE.

Serving notice on the women of Paris that they must dress within the bounds of decency or be excluded from church, the archbishop of Paris has issued a second warning, as follows:

Our repeated warnings have fallen upon deaf ears. Mothers are now even dressing their young women in a manner contradictory to Christian decency.

Seemingly the German invasion was not less difficult to meet than the customs America inflicted on the French.

If the church succeeds in making the women of Paris forsake the prevailing fashion, then the church will prove to be a power greater than any force aimed at fashion's reform in the

United States. In America no one would undertake to issue a mandate against the things in fashion which had won woman's admiration.

APOSTLE IVINS ON MEXICO.

No man in Utah is better informed on Mexican affairs than Apostle A. W. Ivins, who has lived in that country twenty-five years.

"If by exercise of patience, the great, vast country of Mexico can be brought to friendly feeling with the United States, think how much better it will be than settling our difficulties by force of arms.

That is good advice. If there is hope of an understanding being arrived at, by which outrages shall be stopped, then patience should prevail.

When a telegram was read at the Commercial club, stating that Senator Fall of New Mexico had introduced a resolution calling for intervention in Mexico, Apostle Ivins said:

"Senator Fall has long represented, as attorney, some of the largest of Mexican landholders. General Terrazas is one of these, and this man has lived at the home of Senator Fall."

Terrazas, Apostle Ivins said, refers to the peons on his land as "my people," and exercises a mastery over them through the company stores to which they are kept in constant debt.

Our own opinion of Senator Fall is not favorable. On more than one occasion, the senator from New Mexico has been accused of gross exaggeration and his sole cry in the past eight years has been, "War."

This country will be following a mean leadership when it places Senator Fall at the head of our foreign policy and accepts his program.

"Smile when you can," says a poet. That's all right, but why didn't he confer an everlasting favor on humanity by telling us how to smile when we can't?

CITY OF PARA HAS PERENNIAL MILD WINTER

PARA, Brazil, Nov. 4.—Although only 80 miles from the equator the city of Para enjoys a perennial climate of what might be called mild summer.

The mornings and evening are always cool, and the mid-day heat never approaches that of a "regular" August day in New York or Chicago.

The clothes worn by men are also a matter of surprise to the foreigner visiting this equatorial city.

Business men, and especially foreigners, however, adhere to the cool-looking white-cotton, linen or duck.

NEW YORK, Dec. 4.—Exchange on England, France and Italy dropped yesterday to the lowest points of depreciation ever recorded in this market.

Heavy Drop in Rate of Exchange

Stedding fell to \$3.87 1-2 to the pound, against the pre-war quotation of \$4.86 5-8.

Dealers in exchange stated that a large part of yesterday's pressure to sell, especially of French and Italian bills, came from commercial interests here and abroad who offered their bills almost regardless of losses sustained.

Cables from London quoted American exchange there at \$3.88 for a pound sterling, with predictions that the huge debt of England to this country would precipitate a further slump.
