EMIGRATION QUESTION

"The time has come perhaps," said Dr. Carey, "when this country should really go into the matter of emigration. Whether we ought to encourage the residents of other parts of the globe to make their home here is a matter for wise investigation and sound conclusion. But meanwhile the Japanese ought not to be discriminated against in the interests of the selfish aims of individual politicians who think more of their seats in legislatures, congress, and the senate, any more than the Italian, or the Pole, or the Englishman, or the Canadian, who are settling in this land, desiring to become citizens of this republic ought to receive the protection of the law of the land and be saved from the contempt which low minded and selfish persons seek to heap upon them."

WHITE PEOPLE ONLY

"This means that we believe in a government of white people for white people only. The Japanese have a right to complain. They are, in every argument being discriminated against. This country has received emigrants from every quarter of the globe, asking only that they strive to become industrious, law abiding and faithful citizens of this democracy. The Japanese have shown themselves amenable to our form of government, able to assimilate western ideas, and in addition, have poured into the wealth of this country enormous treasures by reason of their industry, ability and intelligence. They should not be discriminated against."

Radical Farmer Organization Strongly Participating in State's Affairs

CHICAGO, Ill., Oct. 16.—When I was in Colorado a week ago the debris of the September primaries had not cleared up sufficiently to make possible an intelligent surmise of the situation of the state. During the week it has cleared up to some extent. But it is still full of complexities. These complexities do not so greatly affect the race as between Harding and Cox, Colorado, of course, ought to be expected to go Democratic. In 1916, it gave a majority of 76,000.

CHURCHES PASSED BY

Some so-called Christian leaders talk a great deal about the way in which the world is "challenging the churches."

"The world is not challenging the churches," the world of common men and women is passing the churches by. Why? Because the churches have forgotten to denounce inequity and make a pathway through human wickedness to higher levels of pure living. The conscience of the common man outside the churches is working a great deal more effectively and intelligently than the conscience of many men who call themselves "Christian" leaders.
