FINANCING FARMERS SUBJECT OF ADDRESS

Bankers Told to Change Attitude Toward Cooperation Marketing

WASHINGTON, Oct. 22.—Discussion by the American Bankers' association of criticisms leveled at certain New York banks by Comptroller of Currency Williams culminated today in the adoption of a report of the association's resolutions committee condemning "dangerous attacks" by unnamed individuals on the credit structure of the country.

HEATED DISCUSSION

Presentation of the report brought on a heated discussion. Several members maintained that the convention itself was just interested in the controversy which has grown out of Comptroller Williams' charge that certain banks had received "unfair rates of interest on call loans."

REPORT ON RAILROADS

The report condemned "speculative hoarding" in the agriculture and industries, renewed the recommendation for a national budget system, and expressed the association's complete disapproval of nationalization of industry, particularly as contemplated by the Plumb plan.

IMMIGRATION REPORT

While favoring immigration as a means of preventing labor shortage and enabling the development of resources, the committee report adopted recommendations for the admittance of aliens in order that the country's welfare and its ideas might be safeguarded.

MUST MEET PROBLEM

"Bankers must meet this problem. There must be a modification of the old attitude. Whether this should be done through banking machinery or through proper cooperative marketing remains to be decided. However, some method must be devised for reducing the pressure on the producer which forces him to dispose of his crop either at the moment the harvest is completed, or while its movement is under way as this has been too often used as a means for price depression. Methods also must be discovered for lowering the cost of financing him."

REASON FOR CONFIDENCE

"The present tendency is toward a lower, more reasonable and fairer relative basis. The difficulty is found in the fact that every individual is perfectly willing that all others shall make reductions—the larger, the better. Now a general public, particularly those who are neither buyers nor sellers to any large extent, will in one way or another bring about a fair and reasonable adjustment of prices. The law of supply and demand will be the principal factor."

REASON FOR CONFIDENCE

"The people of the United States have reason for confidence in the business future. They need not be discouraged nor impatient."

REASON FOR CONFIDENCE

"I think France has one of the best administrations she has ever had," Mr. Gary continued. "The president is strong, resourceful, honest and has the confidence of everyone. The cabinet is made up of good men. We shall see great progress economically, financially and commercially during the next few years."

NO CLOUDS IN BUSINESS SKY, GARY ASSERTS

Optimistic Picture of Future Painted by Head of Steel Corporation

NEW YORK, Oct. 22.—Business prospects are unusually bright, both in the United States and abroad, Elbert H. Gary, head of the United States Steel corporation, declared in an address before the American Iron and Steel Institute here today.

PERICES TOO HIGH

"If there should be a serious reaction and depression," he continued, "which seems improbable, it will be the fault of those who are connected with business operations or others who, by reason of official positions, improperly interfere, and not because of any fundamental deficiencies in our resources and opportunities."

REASON FOR CONFIDENCE

"The present tendency is toward a lower, more reasonable and fairer relative basis. The difficulty is found in the fact that every individual is perfectly willing that all others shall make reductions—the larger, the better. Now a general public, particularly those who are neither buyers nor sellers to any large extent, will in one way or another bring about a fair and reasonable adjustment of prices. The law of supply and demand will be the principal factor."
