GAS IN THE STOMACH IS DANGEROUS

Gas and wind in the stomach accumulate by that full bloated feeling after meals. Excessive hydrochloric acid in the stomach, creating so-called "acid indigestion," is dangerous because acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, leading to gastritis accompanied by serious stomach ulcers, food fermentations and souring, creating the distending gas which causes the stomach and hampers the normal functions of the vital internal organs, often affecting the brain.

REDS PROMISE LAND AND TROOPS TO TURK REBELS

GENEVA, Nov. 30.—The terms of the treaty Nikolai Leonie, the Russian soviet premier, has concluded his Moscow-Kemal Pasha, leader of the Turkish nationalists, striking at allied influence, has been received by the Journal de Geneve from its Constantinople correspondent. The treaty assures the integrity and restoration of Turkish authority to all pre-war territories and assures Turkey control of the new states of Syria and Arabia. Moscow is afforded facilities for propaganda throughout Turkey.
