"Oh Lady Lady"

SHE FORCED HER WAY INTO HIS ROOM

She had just broken up his wedding by confronting him with a packet of love letters which he had written her long ago, and now she was rushing to his rooms to explain.

The "she" of the story is mischievous Bebe Daniels, and the heartbroken bridegroom is Walter Hiers, the funniest fat man on the screen, and the picture is "Oh Lady Lady," a comedy that will bring tears of laughter to every eye in this city.

Farm Bureau Hears Report On Irrigation At Annual Meeting

Reports from committees on irrigation, sugar beets, livestock, crop pests, and various other committees were features of the morning session of the Weber County Farm Bureau meeting which took place at the Federal building this morning.

The morning session was opened by an address from President L. H. Bous of the Weber County Farm Bureau. He said there is greater reason for the existence of the farm bureau today than there ever was before in the history of the country. Mr. Bous said the farmers to be on a competitive basis with the other industries must organize, if agriculture is to progress.

MURPHY GIVES REPORT.

D. B. McKay, chairman of the committee on irrigation, who submitted the report of this committee, presented a resume of the work done by the committee. His report covered a period since June, 1919, when steps were first taken towards the creation of an irrigation district, which would embrace the entire county and would be the means of saving farmers of the community an annual loss, seven years out of ten from \$500,000 to \$1,500,000 yearly.

The report showed that water filings have been made on the Magnie reservoir on the South fork of the Ogden river, and on Marsh lake.

Additional filings, one for 350 second feet of water on Bear river, and a power filing was made for the purpose of securing power with which to pump water from other sites.

FOR PUMPING WATER.

Mention was made in the report that the state engineer has assured the county additional filings on the Weber river.

Water allotments made by Dr. Samuel Fortner were certified to the county commissioners during the early part of March. These allotments embraced 99,000 acres of land in Weber county, and were made in 5000 individual allotments. Further preliminary steps were taken, such as the readjustment of water allotments, and at an election held August 19, the district was carried throughout the county by a 99 per cent majority, he said.

MANY MEETINGS HELD.

The report showed that \$2700 was raised and expended for certain work preliminary to the election. Three hundred and fifty local meetings were held in connection with the project.

In the discussion following the reading of the report a number of matters not clear to a number of the representatives present were explained by Mr. McKay. A rumor to the effect that \$5000 had been spent for making filings on reservoir sites was refuted, the figures regarding the cost of filing on the various sites being as follows: Filing on Bear River, \$342; Magnie filing, \$419; Marsh Lake filing, \$482; power filing, \$192.

Announcements that assessment on the acre feet of water allotted each land owner would be made to defray the preliminary expenses were made. Notwithstanding the fact that the laws of the state allow \$2 as the maximum assessment, present indications are that not more than 40 cents per acre foot of water will be assessed against the property owners of the county. Mr. McKay was emphatic in bringing out the point that the property owners would be assessed upon the actual acre feet of water at their disposal, rather than the actual acreage of land in their possession.

SOCIAL ACTIVITIES.

In the report on social activities, Chairman A. W. Marriott, reported that outlined projects had been completed.

especially for the purpose of testing milk in the city, the milk market in Ogden became much better than it had been heretofore, and milk now sold on the local market can be classed as the best in the state, the report claims.

COMPARISON MADE.

A comparison of the milk offered for sale on the local market during 1919 and 1920 is as follows:

Average total butterfat	1919	1920
Total solids	2.75	4.82
Dirty milk samples	12.37	12.39
.....	3	1

The report set forth that steps were taken to eliminate the sale of milk on the old basis of quarts and gallons, and a system for selling milk with the weight of its actual amount of butterfat and solids as the basis was evolved. This system has not been put into practice, however.

Private Distillers Get Rid of Apparatus

Activities in Weber county of Federal Prohibition Agent J. E. Shields, of the Denver office and Ogden detectives are bringing unexpected results, according to Detective Ed. Hutterfield, who has been assisting Mr. Shields.

Since the officers have seized at least ten stills, private distillers are getting apprehensive, the officer said. Some of them are disposing of their stills by throwing them into the river or scattering them over the river bottoms.

Two stills, showing signs of recent use, were found on the Weber river bottoms and two others were discovered in the "jungle."

FIGURES ON RETURNS.

Average acreage of tomatoes was four acres to a farmer. The average yield was 11 tons per acre and the return on the crop amounted to \$165 per acre. Cost of the crop amounted to \$147.00 per acre, showing a profit of \$18 as the average increase.

The average field of peas was 3.2 acres. The yield amounted to about 22 tons per acre. Average returns amounted to \$132.45 per acre, while the crop cost \$110.50 per acre, leaving a profit of \$21.95 or a percentage of 19.94 on the investment.

CO-OPERATIVE ACTIVITIES.

T. E. Jones then gave a report on co-operative activities of the bureau which showed that the bureau members had found that by purchasing coal to carload lots, they would secure their coal at approximately \$1.25 lower than the price for which it is offered for sale by local dealers.

C. E. Pettigrew, chairman of the sheep and goats committee, was not present. A substitution was made, however, showing that the distribution of poison as a means of controlling rodents, had been very effective.

MILK COMMITTEE.

T. E. Jones, chairman of the livestock committee, gave a report on the efforts of the committee to negotiate the sale of market milk at Ogden and improve the quality of the milk produced.

During the season, price adjustments were made regarding the sale of milk, dealers and producers entering into an agreement.

The report sets forth that milk sold on the Ogden market during 1919 was of a very poor grade, or the lowest quality produced in the state.

A campaign against milk producers was started which resulted in a number of prosecutions. With the changing of the city health department, so that a man recommended by the County Farm Bureau was designated

TAKE LOSS NOW RETAILERS TOLD

James DeVine Give simplifications of Trip East to Rotary Club

The retail merchant might just as well take his losses now and prepare for the readjustment of affairs in the nation and take his profits in the future according to James DeVine, member of the Ogden Rotary club, who was their principal speaker at the weekly luncheon at the Weber club today.

Mr. DeVine has just returned from an extended trip to Chicago, St. Louis and other eastern points and stated that merchants in the east are preparing for the readjustments and are taking their losses in the right manner.

START TO CUT.

"Big business has provided a solution for the readjustment," said Mr. DeVine, "and the small business men of the country will have to formulate their plans accordingly. Changes in all parts of the country will be noted after the first of the new year in my opinion and some of the largest retailers in the east have already started to cut prices.

"While conditions are unsettled in all parts of the country I am confident that the conditions in Ogden are far better than in the eastern cities. All lines of business here are being carried out much better than in those sections. Business is going to build up. It will take care of itself and will be back to normal within the next two years.

"In my opinion labor conditions will probably stay as they are at present. At least the wage scale will never go as low as it was prior to the war.

"The proposed trip to the plant of the Amalgamated Sugar company following the dinner today was postponed. This trip and inspection will be taken in the near future.

TO INSPECT MILL.

Next Wednesday the members of the Rotary club and their wives will be entertained at the Sperry Flour company's plant. Luncheon will be served by the officials of the flour company to members of the club and others invited between 12:30 and 1:30 o'clock. It was stated today.

Members of the Ogden Chamber of Commerce and the Weber club have also been invited to attend the opening January 6.

Wanted in S. L. for Shooting at Officer

Pete Clayton, arrested in Ogden, charged with selling imitation jewelry, will be returned to Salt Lake today, where he is said to be wanted on a charge of firing a pistol at Deputy Sheriff W. E. Schoppe and William Hughes on November 14.

Clayton when booked at the city jail, gave his name as Walter Longmore. Arrested with him was Frank Hart.

At the request of Deputy Schoppe the Salt Lake county attorney filed a complaint charging Clayton with assault with a deadly weapon.

The sheriff's deputy charges that Clayton attempted to kill him when he ordered an automobile of which Clayton and three other men were occupants to stop. The men were accused of violation of the prohibition law. The incident occurred on Twenty-first South street near the intersection of the Denver & Rio Grande railroad tracks in Salt Lake. When the auto-lots refused to stop, the deputies opened fire on the machines. It was found deserted by the roadside on the following day, a short distance from the scene of the pistol duel.

BRINGS CAR TO STOP ON EDGE OF 400-FOOT DROP

Running into a blizzard between American Fork and Salt Lake yesterday, Dr. H. E. Robinson of Ogden, lost the road in the blinding storm.

Sensing that the car was off the road the doctor brought his machine to a stop and investigated. He discovered that another four feet ahead would have sent the car over an embankment along the Jordan river four hundred feet below to the Denver & Rio Grande tracks.

The doctor and Mrs. Robinson were returning from American Fork, where they spent Christmas with relatives.

The car had to be banded for a time and was badly damaged by freezing of the water in the radiator and water jacket. It was so cold the doctor said, that the oil also froze.

Sanitarium Co. Sues For Fire Insurance

Suit to recover \$1000 alleged to be due for fire insurance has been filed in the district court by the Ogden Canyon Sanitarium Park Hotel company against the County Fire Insurance company. It is set forth that on June 27, 1920 the Sanitarium company took out a policy for \$1000 on a soda fountain and equipment contained in the building. Fire destroyed the equipment August 2, it is alleged.

In addition to judgment for \$1000 the plaintiff company asks attorney fees of \$250.

"Our new company is capitalized at \$50,000,000."

"Great, let me see your prospectus."

"Oh, we haven't got out a prospectus yet. The counterfeited printer wants his pay in advance."

Approximately 12,000,000 persons live under the American flag outside the continental United States.

Case Against King Dismissed in Court

J. F. King, charged with passing a worthless check on a local merchant, was released from custody this morning following dismissal of the case against him by Judge L. J. Mother, on recommendation of County Attorney J. B. Bates.

NOTICE

The regular annual meeting of the shareholders of the First National bank of Ogden, Utah, will be held at their banking rooms at 2184 Washington avenue on Tuesday, January 11, 1921, at 11 o'clock a. m. for the purpose of electing directors to serve for the ensuing year, and the transacting of such other business as may properly come before the said meeting.

Dated Ogden, Utah, December 11, 1920.
