continued sorrow, or we must befriend Cuba in her heroic battle to throw off a medieval yoke. Let us not deceive ourselves! Spain cannot conquer Cuba; she proved that in ten years of miserable failure.

Last illness of George Washington. The account of the last illness of George Washington, written by his private secretary, and recently published, leaves no reason for surprise that the disease, or rather the treatment, resulted fatally in the course of a few hours.

Origin of the Names of the Continents. In the Journal des Voyages, M. Ulysse Robert gives the results of recent philological research regarding the names of the continents.

As for Africa, called 'Libya' in antiquity, its present appellation seems to be derived from that of the Berber tribe of the Atlas, the Afres, or rather the Avraghen, today limited to the Desert of Sahara, but once spread far and wide along the northern coast or in the oases of the salt-lake region that forms the boundary of Tunis.

As for America, we must destroy a legend, it is generally believed that this continent gets its name from the Florentine Americus Vesputius, who, having landed, after Christopher Columbus, at the mouth of the Orinoco, boasted in the narrative of his voyage that he had been the first to reach it.
