ADA COUNTY, IDAHO, RETAINS SALOONS

"Dry" Majority in the County Precincts Overcome in City of Boise.

Special to The Tribune.
BOISE, Idaho, June 19.—Ada county today voted to retain the licensed saloon by a majority of 1700. The fight waged in this city and the county precincts was one of the most bitter in the history of the state. Boise rolled up a majority for the "wets" that the "dry" country precincts could not overcome. Returns tonight give the licensed saloon a larger majority by 1000 than they received two years ago, when an attempt was made to place this county under operation of the local option law.

The fact that many of the "dry" voters had made the fight for commission government for this city, ousting the old charter administration, with the understanding that no attempt would be made to call a local option election, caused the defeat of the "dry" issue. For it was felt that the election today should have been held off until later, giving the commission men an opportunity to adopt a strict regulation plan. The prohibitionists became impatient and insisted on calling the election, claiming that they had to be vindicated of the charge that the saloon men had offered them \$5000 to hold it off.

The "drys" carried but one precinct in the city of Boise, but swept most of the county precincts. Their majorities were cut down in the latter, however. The victory of the "wets," although decisive, is being quietly celebrated tonight.

Provo Company's Shipments Demonstrate Fertility of Tributary Region.
Special to The Tribune.
PROVO, June 19.—Besides the berries shipped out by express and by wagon, the Roylance company of this city is sending out one carload of strawberries every day. The first carload to leave Provo was sent out Monday afternoon. Another car was billed Tuesday; the third went out this evening. Aside from the carload shipments, large quantities of the crop is sent to the Shoshone market and mining camps of the state by express and teams. It is estimated that at least 20 carloads are being marketed each day, and this rate will be kept up until the end of the strawberry season, ten days to two weeks.
