

STRONG VIEWS OF A FILIPINO

He is Very Uncomplimentary to the Americans.

FILIPINOS WILL NEVER YIELD.

He Says 400,000 Men will be Required to Subdue the Archipelago. Much Blood and Treasure.

A member of the Times staff has translated a letter published in the last issue of the New York Morning Journal (German), written by "J."

So often has been exposed by all American authors, and which abuse was our first and most important motive of taking up arms against Spain. History manifestly shows a strange degree of humor in making the Americans now defend what they so earnestly blamed and upbraided the Spaniards for. These monks, who, in our country, represent the evil element, have just entered into negotiations with American syndicates for the purpose of selling these vast lands which have been confiscated, and therefore, no longer belong to them. In a similar manner and with the same result, the Spanish Government has sold for twenty millions of dollars the sovereignty over our islands, which the latter had long ago liberated themselves from.

The people of the Philippines are all fully convinced that the American flag will never be raised over the islands of the Spanish East. They desire to enter upon the inheritance of the Spaniards with the same title of autonomy and tyranny. For three hundred years we have invaded in the letters of our newspapers, and have successfully broken down, them, it is truly insignificant for us to be abused and silly enough to recognize the sovereignty of a State that first acted as our ally, but finally, after throwing off the deceitful mask, attempts to again put us in bondage as the new master.

know what is going on here, the statement of the thousands of dead, wounded, and prisoners whom General Otis, according to his daily telegrams, claims to take from us. The disgust prevailing in the Archipelago is readily general, and only one thought, the islands the perfid American, who under the mask of humanity enticed us into the fight for liberty for the sake of finally selling this country, which belongs to us exclusively, MASARA, MAY 1898.

When Otis telegraphs to the world that everything here is quiet, it shows an absurd and ridiculous manner of saying what is opposite to the truth. Neither would General Otis have the nerve to give any guarantee for the lives of the families of officers if they made their home outside of the fortress. If the stupor of question could even extend the lives of the families of its officers, it would be American officers, an officer would be a spare for the lives of our people, who in his estimation are nothing but low-life human beings, negroes and red skins. In fact, since the Americans have tried to tackle us everything here is quiet, and they have attempted to assure the world in bombastic language that they would guarantee order and quietness for this country. For humanity's sake and in the name of humanity, their bombastic defenses must be dismantled, and the west days of their terrorism the Spaniards have not perpetrated nearly as much barbarism as the Americans.
