GLIMPSES OF GOD. Discourse of Dr. Talmage on the Divine Saviour.

He Raises High Expectations of Day When That Now But Dimly Seen Will Be Fully Revealed.

[Copyright, 1901, by Louis Klopfch, N. Y.] Washington, June 16. In this discourse Dr. Talmage raises high expectations of the day when that which is now only dimly seen will be fully revealed; text, Job 26, 14: "Lo, these are parts of His ways. But how little a portion is heard of Him? But the thunder of His power who can understand?"

So all those who have put together systems of theology have discoursed also about the wisdom of God. Think of a wisdom which can know the end from the beginning, that knows the thirtieth century as well as the first.

Archbishop Tillotson and Dr. Dick and Timothy Dwight and Jonathan Edwards of the past and the mightiest theologians of this young century have discoursed upon the power of God, the attribute of omnipotence.

A tradition says that Abraham of the Old Testament was when an infant hidden in a cave because of the persecutions of Nimrod. The first time the child came out of the cavern it was night, and he looked up at the star and cried: "This is my God," but the star disappeared, and Abraham said: "No, that cannot be my God."

We try to satisfy ourselves with saying: "It is natural law that controls things, gravitation is at work, centrifugal and centrifugal forces respond to each other." But what is natural law? It is only God's way of doing things.

BONE MEAL FOR PIGS. A Tablespoonful Daily for Two Animals Has a Most Marked Effect on Their Strength.

The pigs allowed neither bone meal nor wood ashes failed to develop any considerable frame, and became excessively fat, their bellies and jaws almost dragging on the ground.

We next burned the thigh bones, and found those of the pigs getting ashes or bone meal contained much more ash than those getting neither.

When Properly Made, Painted and Kept Dry When Not in Use, It Will Last a Lifetime. A STRONG HAY RACK.

In making a hay rack I would by all means use a low wagon; no other wagon is as handy for hauling hay or grain. Use strong pine and have it smoothed.

boards underneath sills to rest bottom boards on. Two boards (b), one on each side, the whole length of the rack, 1x10 inches, are placed on top of cross pieces.

Make the back (e) 6 inches narrower than front of bolster. This will be an advantage in turning. Bore 2-inch holes about 6 inches from each end of sills and insert uprights before putting rack together.

HELPFUL HINTS. Heating and constipative foods are bad for colts and for brood mares. Anything that adds to the comfort of a horse saves money for his owner.

Iron mangers for grain are preferable to others, as they are easily kept sweet and clean. The colt's future strength depends upon his development during the first two years of his life.

If a horse is inclined to stock up in a tie stall, he should have the freedom of a box stall. Try it. The hip-sprited, nervous horse will always do better in a box stall.

The feminine reasoning power generally stops this side of reason. What a Tale it Tells. If that mirror of yours shows a wretched, sallow complexion, a jaundiced look, moth patches and blotches on the skin, it's liver trouble.

wants to put out a fire she doesn't heap on oil and wood. She throws on water, knowing that water quenches fire. When a woman wants to get well from diseases peculiar to her sex, she should not add fuel to the fire.
