ART. XII. Canada Stoves. We now have on hand an assortment of Canada Plate Box Stoves, of the following sizes, 21, 24, 26, 30, 31, and 36 inch. The patterns are good.

ART. XIII. Physical Theory of Another Life. By the author of "Pantheism, natural History of Enthusiasm," "Spiritual Despotism," for sale by V. HARRINGTON.

ART. XIV. October 7th, 1836. LEMUEL CURTIS & CO. are now receiving and opening their Fall stock of Goods comprising altogether the richest assortment they have ever offered to the public, among which are:

IMPROVED ROTARY STOVE.

THE Subscriber would just say to the public, that he has received a large quantity of the Improved Rotary Stove, of different sizes and will keep them constantly on hand at his Store, North side of Court House Square.

Also, Parlor, B. & other Cook Stoves, of different Patterns.

Also, second hand Stoves to sell or Rent, cheap—also Pipe, stove trimmings, &c.

I would here remark that in consequence of the rapid sales that attended the Improved Rotary Stove the last season, it was impossible to manufacture them so as to supply over one half of the calls; but the public may be under no apprehension on that point this season, as I have over four times the amount now manufactured, that I had last season at this time, so that people from a distance may come without fear of disappointment. I have omitted a long list of Recommendations, believing that the Improved Rotary Stove has been sufficiently tested, to recommend itself in this vicinity.

The improvements that we have made upon the Stove for the last season are valuable; we now make the fire Plate nearly three times the weight of those last year and turn the friction Rollers on which the cap rests, and various other improvements not necessary to mention.

The Stoves are cast at the foundry of John D. Ward, and from the best Scotch and Moulton P. G. and are not surpassed, if equalled, for smoothness and beauty of finish, in this section of the country.

N. B. I have recently seen a few Stoves in this vicinity called Improved Rotary Stoves, that have no friction rollers under the cap, but turn upon a pivot in the same manner that I first fixed mine; but after using mine in that shape one year, I found that it did not answer my expectation. I discovered that heating the stove caused it to turn very hard, especially when the stove was loaded—when there was a kettle or boiler of water upon the top it was almost impossible to turn it without spilling the water. I did not at first understand the reason, as it would turn easy when cold, but finally ascertained that by heating the stove it expanded the iron, and as the boiler would rest upon one side, it caused so much friction that it was impossible to use them with safety or even convenience, and in order to get rid of this friction I have placed under the outer edge of the cap friction rollers, and have them turned so as to be perfectly true and smooth. The few Stoves above referred to are not made at Ward's Foundry, neither are they made from pig or re-melted iron, but from the raw ore, and the plates consequently are more porous and stoggy; and the back fire plate is not more than half the thickness of mine. Any person can very easily tell my stove, or those made at Ward's, by the friction rollers, as we make no others.

W. M. BLAKE. Burlington, Oct. 1, 1836.

Wanted, one thousand WHITE ASH LOGS—the standard log to be 22 inches diameter and fourteen feet long, sound and free from knots or shakes—to be delivered at the Mill during the ensuing winter, or at the wharf at Burlington in the month of May, 1837. GUY CATTIN. Burlington, Vt. 9th Sept. 1836.

9th Sept. 1836.

To our Agriculturalists success—To our Literary Institutions the high standing they merit—To our Manufacturers their supremacy in competition—and to commerce, Free Trade and Sailor's Rights. THE Go Ahead Principle is so predominant in our land at the present day, that the Car leaves him behind, who stops for trifles, or descends to particulars. We of the Green Mountain State having such conspicuous bumps of enterprise marked on our heads, need only know the Text, the rest is understood.

It is now this HOWARD, of the Cheap Cash Store, has been to the city of New York, the grand emporium of our country, and received his full supply of necessary and desirable goods, which were produced by a combination of all the natural intellectual mechanical and operative exertions of our above named motto. To conclude, the goods were bought to sell, and will be sold cheap for cash, no mistake.

New Goods—Sept. 8. COMPOUND Chlorine Tooth Wash, the discovery of the chloride of Soda & its uses by Labarraque of Paris, was an addition to the resources of medicine of the most important as a neutralizing agent. To counteract at once the principle of decay, which commencing imperceptibly, slowly gathers strength, and finally destroys, is the important service which can be derived from the use of chloride of soda, when administered with skill and care; the direct cause of the tooth being, in the great majority of cases, the result of neglect, and a gradual accumulation of the principle above alluded to, it became obvious, from the earliest experience, that the chloride was the proper remedy, and preferable to powders, dentrifices, &c. of whatever kind or pretension. By a chemical analysis it will be found that the greater part of the chloride compounds so extensively in use, do not contain a particle of the chloride of soda, on the agency of which their efficacy must necessarily depend. The article here advertised is confidently offered to the examination of the public, as possessing in an eminent degree, the virtue of neutralizing all that is offensive in the mouth and breath, removing soreness and sponginess of the gums, destroying the taint of tobacco, or any other effluvia from whatever cause.—In short, this preparation will be found to justify the various commendatory notices and recommendations it has received, where ever it has been introduced. Just received and for sale at the Variety Shop.

PANGBORN & BRINSMAD. Sept. 8, 1836.

University of Pennsylvania

MEDICAL DEPARTMENT. THE next course of Lectures will commence on Tuesday, November the first, and be continued under the following arrangements:

Principles of Medicine Nathaniel Chapman, M.D. Chemistry Robert Hare, do Surgery William Gilman, do Anatomy Wm. E. Horner, do Lectures of Medicine Samuel Jackson, do Materia Medica George B. Wood, do Midwifery Hugh L. Hodge, do

Lectures on Clinical Medicine and Surgery are delivered at the Pennsylvania Hospital, and at the Philadelphia Hospital (Blockley). The whole amount of fees is the same as heretofore paid, notwithstanding the augmentation in the number of Professorships and improvement in the course of instruction. W. E. HORNER, M. D. Dean of Medical Faculty. Philadelphia, July 20th, 1836.

Harvard University.

THE Medical Lectures in Harvard University will begin at the Massachusetts Medical College in Mason St. Boston, the first Wednesday in November next, at 10 o'clock, A. M. and will continue three months. For one month after the end of the course, lectures will be delivered in the College, and the Dissecting Room will be open to such students as may remain, without additional fee. Such students may also attend the Practice of the Massachusetts General Hospital.

Anatomy and Operations in Surgery. Dr. Warren. Chemistry. Dr. Webster. Medical Jurisprudence. Dr. Bigelow. Principles of Surgery and Clinical Surgery. Dr. Hayward. Theory and Practice of Physic, Dr. Ware.

Clinical Lectures will be delivered as usual on the cases in the Massachusetts General Hospital.

NEW DISSECTING ROOM. A new Dissecting Room is now building, and will be finished before the Lectures begin. It will occupy all the vacant land east of the Medical College. Every care is taken to make this important part of the medical school as perfect as possible, so that it may furnish to the student ample facilities for prosecuting his Anatomical studies. The legal enactments of the state, so liberally and so wisely framed, will be faithfully and thoroughly applied to the accomplishment of their important objects.

WALTER CHANNING, Dean. Boston, July, 1836.

IMPORTANT. TO persons suffering from RHEUMATIC COMPLAINTS. To the Editor of the Enquirer—Sir, On the principle indicated by the great and good Dr. Franklin, to diffuse as widely as possible every means within our power to mitigate or soften the afflictions of suffering humanity, I feel it incumbent on me to make known through the medium of your useful paper, that on reading therein an advertisement of Dr. John's Lincture, for the cure of RHEUMATISM, I was forcibly impressed with a belief that it was calculated to remove the severe Rheumatic affection to which I had been for seven or eight years subjected, some times almost depriving me of the use of my limbs. I accordingly procured a bottle and before I had used the whole of it, found very sensible relief. This increased my confidence in it, and led me to obtain another bottle, the use of which has completely removed the swellings and pains of my limbs, together with the cramp, and restored them to their wonted vigor. I am respectfully yours, Geo. TAYLOR, jr. Hopedale, 1. 1 March 24.

Persons suffering from the above complaints, and in despair of a cure from the failure of the various remedies they have used, are invited to make trial of this long celebrated medicine, which has in years past cured and relieved, as it is now doing, thousands who had despaired of relief.—Nothing but a fair trial can give an idea of its unrivalled excellence. It is also one of the best applications known for stiffness of the joints, numbness, sprains and clabsins. Price 50 cents. For sale by J. & J. H. PECK & Co.

Medical's Patent Compound Oil for Painting. A perfect substitute for Linseed Oil for all kinds of Painting, is offered to the public by the subscribers with the fullest assurance of its utility. It is now about eight years since it was brought to its present state of perfection, and during that time has been extensively used & tested in every way which Linseed Oil is used for painting, for inside and outside house painting, on brick and on wood, and for coaches, signs, boats &c. As for spreading and drying for inside work it is not surpassed, and for body, and durability in situations exposed to the sun and weather, it is warranted far superior to the best Linseed Oil, and being light colored renders it preferable for white and all other delicate colors.

One of the first painting establishments in this city [of more than twenty years standing] say in their certificate "Having used Medical's Patent Paint Oil do certify that more surface and better painting can be done per gallon, than when mixed with pure Linseed Oil. This oil forms a combining substance when mixed with pure Leads that does not decompose and rub off by exposure to the sun, and by experience of two years, we are warranted in saying that painting done with this oil, will stand the weather much longer, and remain unimpaired, when painting done in the usual way will not, and for oil cloths, we think it surpasses every thing that we ever used." John N. Fassett has purchased the right to make and vend the "Patent Compound Oil" in the following States, viz: Pennsylvania, New York, Massachusetts, Vermont, Connecticut, New Jersey, South Carolina, Ohio, Michigan, Illinois and Indiana, and cauti-as all persons, against any infringement, as every offence will be met with rigorous prosecution. The price of the "Patent Oil" will be one quarton less than Linseed Oil. It is warranted and sold wholesale and retail by FASSETT, SELDEN & Co. Dealers in Paints, Oils, Varnishes, &c. 201 River street Troy N. Y. August 5, 1836.

FANATICISM—by the author of natural History of Enthusiasm. For sale by V. HARRINGTON. Aug. 26.
