WEALTH A HANDICAP.
One of the greatest handicaps that some young men have in the outset of their career is the possession of an income which will relieve them of the necessity of independently earning their own livelihood. This removes a great incentive for endeavor and is a decided disadvantage. For that reason I have always had a considerable sympathy for the sons of rich men. They are seriously handicapped in life unless they are young men of exceptionally high character and imbued with lofty aspirations. — John Hays Hammond.
