METHODIST CHURCH NOTES

Sunday, September 9th
Regular preaching service in the morning at 10:45.
Sunday school at 12:10.
Junior League at 3:30.

Thursday evening at 7:15, Epworth League Prayer meeting.
Usual preaching service at the Congregational church in the evening at 7:30, with the Methodist minister as the preacher.

CONG. CHURCH NOTES.

The average attendance at the morning services through the months of July and August has been exceedingly good, considering the congregation to attend and the summer months with the natural tendency to be away. Every department of the church is doing well with increasing interest. A most interesting C. E. meeting was held Sunday evening when Miss Florence Winget led, the topic being, "My Favorite Hymn, Tell Why." Many hymns were sung with touching remarks as to why they were favorites.

The Woman's Missionary meeting will be held at the Congregational parsonage Tuesday afternoon.

The ladies of the church will serve supper at 6 o'clock Friday afternoon until all are served.

On Friday evening the choir will rehearse in the church.

Sunday morning the pastor will speak on the subject of "Christ's Challenge to Manhood." In the evening there will be a union service. Rev. C. W. Kelley will give the address. All are very cordially invited to attend this service.

IRASBURG RED CROSS.

The headquarters for this branch have been changed for the present to the vestry of the Methodist church. This was made necessary on account of the schools using the hall until the schoolhouse has been renovated. The meetings are held on Wednesday after the noon hour. The surgical dressing class continues to be held at the home of John Carpenter.

The Red Cross greatly appreciates the generosity of Mr. Deane and the Chandler company in the gift of lumber for tables, and slab wood and of Mr. Aiken and others who are going to draw the wood and move the belongings of the Red Cross to the church vestry. What a lot of kind sympathetic people there are in Irasburg and elsewhere, who are so ready to give money or time or even themselves for the church or nation. And yet there are everywhere those slackers who show a streak of yellow in their natures. We must live with them but it isn't easy.

Three more boxes are to be shipped to Boston this week, two of hospital supplies and one of dressings.

What a pile of work the good women of Irasburg have turned out in the four months since we organized. An invitation is extended to every loyal woman to do sewing or knitting for us. See the energetic Mrs. Clough if you want to work. It is surprising she hasn't seen you before this.

See Mrs. Templeton if you want to enter the surgical dressing class.

MILES per GALLON

When you figure miles per gallon, there is no gasoline as cheap and efficient as SOCONY. Because SOCONY is not only pure and powerful, but uniform.

Every gallon is like every other gallon, no matter where you buy it—quick starting and chock full of energy. The SOCONY seal means that the gasoline it marks is the best that extensive sources of supply and highly scientific refining can produce.

SOCONY is so different from the inert mixtures that are often sold as gasoline that it pays to be particular what goes into your tank. Say "So-CO-ny" and look for the Red, White and Blue SOCONY sign.

EFFECT OF MIND-WANDERING

Day-Dreaming With a Purpose is All Right but Much Time is Lost in Kind That Serves No Purpose.

Have you ever stopped to think how much time is lost in mind-wandering? How many times during the day do you let your thoughts wander from the main task at hand? And once a person's thoughts start wandering, how they skip from one link of recollections to another until a chain of wasted moments is forged!

Mind-wandering seems to be a general characteristic of the human race, but those who have succeeded in conquering the characteristic and concentrating upon the task at hand have been the men who have moved ahead in the business and professional world.

Day-dreaming is all right when the dreams are busy with plans for promoting business methods or with ideas for practical inventions—and when other work is not being neglected.

The inventor of the steam engine, watching the steam in a kettle lifting the top of the pot and day-dreaming about what that power might be made to accomplish—was not wasting his time, but was advancing the human race.

Useful day-dreaming is all right, but mind-wandering should be relegated to the scrap heap.—Arkansas Democrat.
